P.S. Free & New 4A0-113 dumps are available on Google Drive shared by Easy4Engine: <https://drive.google.com/open?id=1gFtoajUCILyIOytnEsRQnHXzZ4ucogAd>

Having a Nokia Certification 4A0-113 Exam certificate can help people who are looking for a job get better employment opportunities in the IT field and will also pave the way for a successful IT career for them.

Nokia 4A0-113 exam is an important certification exam for network engineers and professionals who work with Nokia's OSPF routing protocol. 4A0-113 exam tests the candidates' knowledge and understanding of OSPF routing protocol, including its configuration, implementation, and troubleshooting. Candidates can use a variety of resources to prepare for the exam and should have a solid understanding of networking fundamentals and Nokia's networking products and technologies.

To pass the Nokia 4A0-113 Exam, candidates must have a strong understanding of OSPF and its configuration, operation, and troubleshooting. Candidates must also demonstrate proficiency in Nokia's networking solutions and how they integrate with OSPF. 4A0-113 exam consists of multiple-choice questions and simulations, and candidates must achieve a passing score of 80% or higher to earn certification.

## 100% Pass Nokia - 4A0-113 Pass-Sure Free Braindumps

Time is very important for everyone. As the saying goes, time is life so spend it wisely. We believe that you also don't want to spend much time on preparing for your Nokia OSPF Routing Protocol Exam exam. How can you pass your exam and get your certificate in a short time? Our 4A0-113 exam torrent will be your best choice to help you achieve your aim. According to customers' needs, our product was revised by a lot of experts; the most functions of our Nokia OSPF Routing Protocol Exam exam dumps are to help customers save more time, and make customers relaxed. If you choose to use our 4A0-113 Test Quiz, you will find it is very easy for you to pass your exam in a short time. You just need to spend 20-30 hours on studying; you will have more free time to do other things.

Nokia 4A0-113 Exam covers a wide range of topics related to the OSPF routing protocol, including network design, configuration, and troubleshooting. 4A0-113 exam consists of 60 multiple-choice questions and has a duration of 90 minutes. The questions are designed to test your understanding of OSPF concepts, protocol operation, and the configuration of OSPF in a Nokia IP network.

## Nokia OSPF Routing Protocol Exam Sample Questions (Q69-Q74):

### NEW QUESTION # 69

Which of the LSA types stay within an OSPF area and are not exported outside of the area? (Choose all that apply)

- A. Network LSA

- B. Summary Network LSA
- C. Summary Router LSA
- D. Router LSA

**Answer: A,D**

#### NEW QUESTION # 70

What is the protocol number for OSPF in the IP header?

- A. OSPF uses UDP, so the protocol number is 17.
- B. OSPF does not use IP.
- C. OSPF has its own protocol number of 89.
- D. OSPF uses TCP, so the protocol number is 6.

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

According to Nokia 7750 SR OS OSPF Guide - OSPF Packet Transmission Section:

"OSPF is encapsulated directly over IP using protocol number 89. It does not use TCP or UDP." TCP (Protocol 6) # Incorrect.  
UDP (Protocol 17) # Incorrect.

OSPF operates directly at IP layer using protocol number 89.

Thus, the correct answer is D.

#### NEW QUESTION # 71

Static routing will be used in a network between a corporate head office, with many connected networks, and a branch office, with one connection to the head office. Which of the following best describes the likely configuration?

- A. The corporate head office router and the branch router will both have default routes.
- B. The corporate head office router will have a default route and the branch site will have a more specific static route.
- C. The corporate head office router will have a more specific static route and the branch office router will have a default route.
- D. The corporate head office router and the branch office router will both have specific static routes.

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From the official Nokia OSPF Routing Protocol Training Guide (Nokia document OSPF#SG#2024, Topic 1, Section 1.2 Static Routing Scenarios):

"In a hub-and-spoke static routing topology-such as a corporate head office with multiple subnets and a branch with a single WAN link-the head-office router is configured with precise static entries for each branch network, while the branch router is given a default static route pointing to the head-office router." This topology matches the described scenario:

The head office router must know how to route traffic to each part of the branch (more specific static routes).

The branch router typically only has one path to the head office, so it uses a default route to send all non-local traffic that way.

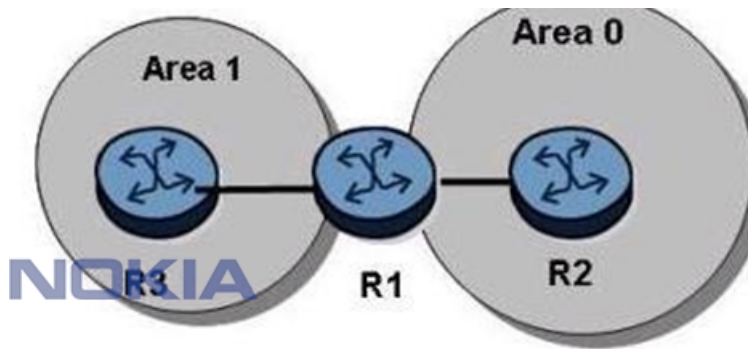

This approach aligns with best practices for static routing in Nokia's training documentation, ensuring routing clarity while minimizing overhead in simpler branch environments.

Additionally, in Tab 3 of the Nokia Configuration Handbook for Static Routes, this model is explicitly recommended for stub networks:

"Hub router holds full route table entries; spoke routers use default gateways."

#### NEW QUESTION # 72

Click the exhibit button.

```
A:R3>config>router>ospf# info
-----
area 0.0.0.1
 stub
 exit
 interface "system"
 exit
 interface "toR1"
  interface-type point-to-point
  authentication-type password
  authentication-key
  1/XVK6X/L7YM44ZaNqVrJKWb5q244dGbFvF4eS5KH." hash2
 exit
 exit
-----
A:R3>config>router>ospf#

*A:R1>config>router>ospf# info
-----
area 0.0.0.0
 interface "toR2"
  interface-type point-to-point
 exit
 exit
area 0.0.0.1
 stub
 exit
 interface "system"
 exit
 interface "toR3"
  interface-type point-to-point
  authentication-type password
  message-digest-key 1 md5
  "d70aaU5pMrRRj7Xl3w7bZxF9h6rw3D0oYBUOKD.mtFs" hash2
 exit
 exit
-----
*A:R1>config>router>ospf#
```

The OSPF adjacency between routers R3 and R1 is down. What is the problem?

- A. Area 1 of router R1 should not be configured as a stub.
- **B. Router R1 has the incorrect authentication key type.**
- C. Router R3 has the incorrect authentication key type.
- D. There is not enough information to tell.

**Answer: B**

### NEW QUESTION # 73

The Nokia 7750 SR supports which two of the OSPF area types below?

- A. Level 1 Areas
- B. Partially Stubby Areas
- **C. Not So Stubby Areas**
- **D. Stub Areas**

**Answer: C,D**

Explanation:

### Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (Supported OSPF Area Types):

A: NSSA (Not So Stubby Area) - Supported.

C: Stub Areas - Supported.

B: Level 1 Areas - IS-IS concept, not OSPF.

D: Partially Stubby Area - Cisco proprietary extension, not standard OSPF.

Thus, correct answers: A, C.
