C-CPI-2506 Test Pass4sure | New C-CPI-2506 Test Registration

In order to meet the needs of all customers, our company employed a lot of leading experts and professors in the field. These experts and professors have designed our C-CPI-2506 exam questions with a high quality for our customers. We can promise that our C-CPI-2506 training guide will be suitable for all people, including students and workers and so on. You can use our C-CPI-2506 study materials whichever level you are in right now. And we can promise you will get success by our products.

SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details

Topic 1	• SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
Topic 2	• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 3	• Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 4	• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

SAP Certified Associate - Integration Developer Sample Questions (Q46-Q51):

NEW QUESTION # 46

You want to publish a new API product to the API business hub enterprise. What is a requirement?

- A. At least two deployed API Proxies
- B. At least one deployed API Provider
- **C. At least one deployed API Proxy**
- D. At least two deployed API Providers

Answer: C

Explanation:

In SAP API Management (Integration Suite):

An API Product is a bundle of one or more API Proxies for consumption.

To publish an API Product to API Business Hub Enterprise (Developer Portal), there must be at least one deployed API Proxy included.

Other options:

API Providers are required for connecting to backends, but publishing requires proxies.

No minimum of two is required - just one deployed API Proxy is enough.

NEW QUESTION # 47

What are target endpoints of an API? Note: There are 3 correct answers to this question.

- **A. URL of original API**
- B. Resources
- **C. API provider**
- D. API consumer
- **E. API proxy**

Answer: A,C,E

Explanation:

The target endpoints of an API are the API provider, the API proxy, and the URL of the original API. The API provider is the system or application that exposes the interface and functionality of the API. The API proxy is the intermediary component that mediates the requests and responses between the API consumer and the API provider. The URL of the original API is the address that identifies

the location and resource of the API. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 48

Which of the following does SAP Graph provide?

- A. Abstraction of business data for end users
- **B. Unified view of SAP-managed business data**
- C. Unified cache of SAP-managed business data

Answer: B

Explanation:

SAP Graph provides a unified API layer that offers a business-centric, semantically harmonized view of SAP-managed data across multiple SAP solutions (e.g., S/4HANA, SuccessFactors, Ariba).

It does not cache data; instead, it provides real-time access.

It is not only an abstraction for end users, but specifically designed as a unified view for developers and applications.

Thus, the correct answer is Unified view of SAP-managed business data.

NEW QUESTION # 49

Which data store operation can you use to save a customer ID?

- A. SELECT
- B. GET
- C. POST
- **D. WRITE**

Answer: D

Explanation:

To save a customer ID in a data store, you can use the WRITE operation. The WRITE operation allows you to store a value in a data store entry with a specified key. You can use the WRITE operation to create or update a data store entry with a customer ID as the key and a value as the payload. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 50

What are the key capabilities of the SAP BTP Integration Suite? Note: There are 2 correct answers to this question.

- **A. API Management**
- B. Open Connectors
- C. SAP Business Application Studio
- **D. Connectivity Service**

Answer: A,D

Explanation:

The key capabilities of the SAP BTP Integration Suite include API Management and Connectivity Service. API Management allows you to create, publish, monitor, and secure APIs across different environments and platforms. Connectivity Service enables you to establish secure and reliable connections between cloud applications and on-premise systems using various protocols and adapters.
