ISACA COBIT 2019 Foundation Sample Questions (Q159-Q164):

NEW QUESTION # 159

Which of the following is MOST critical to ensuring the objective of managed availability and capacity?

- A. Allocation of budgets for business continuity
- B. Future prediction of I&T resource requirements
- C. Identification of single points of failure

Answer: B

Explanation:

Explanation

The most critical factor to ensuring the objective of managed availability and capacity is to predict future IT resource requirements based on current and projected business needs, service levels, and performance targets.

This factor enables the enterprise to plan, provision, and optimize IT resources in a timely and cost-effective manner, while ensuring that IT services are delivered with sufficient availability and capacity to meet business demands. The factor is based on the COBIT 2019 Design Guide², page 77. References: 2: COBIT 2019 Design Guide | Digital | English

NEW QUESTION # 160

Which of the following COBIT 2019 publications includes a workflow for planning a tailored governance system for the enterprise?

- A. COBIT 2019 Implementation Guide: Implementing and Optimizing an Information and Technology Governance Solution
- B. COBIT 2019 Framework: Governance and Management Objectives
- **C. COBIT 2019 Design Guide: Designing an Information and Technology Governance Solution**

Answer: C

Explanation:

The COBIT 2019 publication that includes a workflow for planning a tailored governance system for the enterprise is COBIT 2019 Design Guide: Designing an Information and Technology Governance Solution.

This publication provides guidance on how to design a customized governance system for information and technology using COBIT as a reference framework. It includes a workflow for planning a tailored governance system for the enterprise that consists of seven steps: define design factors; define focus areas; define current state; define target state; identify gaps; define roadmap; select implementation method.¹⁴ References: COBIT

NEW QUESTION # 161

Which enterprise role ensures the board is kept informed of major decisions related to value delivery of I&T deployment in accordance with the enterprise strategy?

- A. Executive committee
- **B. Chief information officer**
- C. Chief executive officer

Answer: B

Explanation:

The chief information officer (CIO) ensures the board is kept informed of major decisions related to value delivery of I&T deployment in accordance with the enterprise strategy. The CIO is the senior executive responsible for leading, directing, and managing the information and technology function of the enterprise.

The CIO has a strategic role in aligning I&T with business requirements, ensuring I&T performance, managing I&T risks, fostering innovation, etc. The CIO ensures the board is kept informed of major decisions related to value delivery of I&T deployment by providing regular reports, updates, feedback, recommendations, etc., as well as by participating in board meetings or committees.¹ References: COBIT
