CrowdStrike CCFA-200b Reliable Study Notes | Latest CCFA-200b Test Sample

If you are preparing for the practice exam, we can make sure that the CCFA-200b test practice files from our company will be the best choice for you, and you cannot find the better study materials than our company'. There are a lot of advantages of our CCFA-200b preparation materials, and you can free download the demo of our CCFA-200b training guide to know the special functions of our CCFA-200b prep guide in detail. And you will know the quality of our CCFA-200b study prep as well. We are hopeful that you will like our CCFA-200b exam questions.

CrowdStrike Falcon Administrator Sample Questions (Q155-Q160):

NEW QUESTION # 155

What best describes what happens to detections in the console after clicking "Disable Detections" for a host from within the Host Management page?

- A. The detections for the host are removed from the console immediately and no new detections will display in the console going forward
- B. Preventions will be disabled for the host
- C. You cannot disable detections for a host
- D. Existing detections for the host remain, but no new detections will display in the console going forward

Answer: A

Explanation:

The option that best describes what happens to detections in the console after clicking "Disable Detections" for a host from within the Host Management page is that the detections for the host are removed from the console immediately and no new detections will display in the console going forward. The "Disable Detections" feature allows you to enable or disable the detection and prevention capabilities of the Falcon sensor on a specific host. When you disable detections for a host, the sensor will stop sending any detection or prevention events to the Falcon console, and any existing events for that host will be removed from the console. When you enable detections for a host, the sensor will resume sending any new detection or prevention events to the Falcon console, but any previous events for that host will not be restored to the console.

NEW QUESTION # 156

Which of the following policies allowlist network traffic even while a host is Network Contained?

- A. Firewall Policy
- B. Containment Policy
- **C. IP Allowlist Policy**
- D. Response Policy

Answer: C

NEW QUESTION # 157

When a host is placed in Network Containment, which of the following is TRUE?

- A. The host machine is unable to send or receive network traffic outside of the local network
- B. The host machine is unable to send or receive network traffic except to/from the Falcon Cloud and traffic allowed in the Firewall Policy
- C. The host machine is unable to send or receive any network traffic
- **D. The host machine is unable to send or receive network traffic except to/from the Falcon Cloud and any resources allowlisted in the Containment Policy**

Answer: D

Explanation:

When a host is placed in Network Containment, the host machine is unable to send or receive network traffic except to/from the Falcon Cloud and any resources allowlisted in the Containment Policy. This allows users to isolate a host from the network, while still allowing it to communicate with the Falcon Cloud and other essential services. The other options are either incorrect or not true of Network Containment.

NEW QUESTION # 158

Which of the following tools developed by CrowdStrike is intended to help with removal of the CrowdStrike Windows Falcon Sensor?

- A. FalconUninstall.exe
- B. UninstallTool.exe
- C. CrowdStrikeRemovalTool.exe
- **D. CSUninstallTool.exe**

Answer: D

NEW QUESTION # 159

Which of the following is NOT an available action for an API Client?

- **A. Retrieve an API Client Secret**
- B. Edit an API Client
- C. Delete an API Client

- D. Reset an API Client Secret

Answer: A

Explanation:

The option that is not an available action for an API Client is Retrieve an API Client Secret. An API Client is an entity that represents a user or application that can access the Falcon platform programmatically via the Falcon APIs. An API Client has an API Client ID and an API Client Secret, which are used for authenticating and authorizing API requests. You can create and manage API Clients in the API Clients and Keys page in the Falcon console. The available actions for an API Client are Edit an API Client, Reset an API Client Secret, and Delete an API Client. You cannot retrieve an API Client Secret after it has been created, as it is only displayed once during creation for security reasons.

NEW QUESTION # 160

.....

Practice what you preach is the beginning of success. Since you have chosen to participate in the demanding IT certification exam. Then you have to pay your actions, and achieve excellent results.
