Excellent Free CS0-002 Sample & Leader in Certification Exams Materials & Practical CS0-002 Dumps PDF

When candidates decide to pass the CS0-002 exam, the first thing that comes to mind is to look for a study material to prepare for their exam. The most people will consider that choose CS0-002 question torrent, because it has now provided thousands of online test papers for the majority of test takers to perform simulation exercises, helped tens of thousands of candidates pass the CS0-002 Exam, and got their own dream industry certificates. That is to say, there is absolutely no mistake in choosing our CS0-002 test guide to prepare your exam, you will pass your exam in first try and achieve your dream soon.

CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q232-Q237):

NEW QUESTION # 232

A large software company wants to move its source control and deployment pipelines into a cloud- computing environment. Due to the nature of the business, management determines the recovery time objective needs to be within one hour. Which of the following strategies would put the company in the BEST position to achieve the desired recovery time?

- A. Set up every cloud component with duplicated copies and auto-scaling turned on
- B. Configure a duplicate environment in the same region and load balance between both instances
- C. Create a duplicate copy on premises that can be used for failover in a disaster situation
- **D. Establish an alternate site with active replication to other regions**

Answer: D

NEW QUESTION # 233

An analyst must review a new cloud-based SIEM solution. Which of the following should the analyst do FIRST prior to discussing the company's needs?

- A. Perform a vulnerability scan against a test instance.
- B. Download the product security white paper.
- **C. Ensure a current non-disclosure agreement is on file**
- D. Check industry news feeds for product reviews.

Answer: C

NEW QUESTION # 234

A security analyst is evaluating two vulnerability management tools for possible use in an organization. The analyst set up each of the tools according to the respective vendor's instructions and generated a report of vulnerabilities that ran against the same target server.

Tool A reported the following:

```
The target host (192.168.10.13) is missing the following patches:
CRITICAL KB50227328: Windows Server 2016 June 2019 Cumulative Update
CRITICAL KB50255293: Windows Server 2016 July 2019 Cumulative Update
HIGH MS19-055: Cumulative Security Update for Edge (2863871)
```

Tool B reported the following:

```
Methods GET HEAD OPTIONS POST TRACE are allowed on 192.168.10.13:80
192.168.10.13:443 uses a self-signed certificate
Apache 4.2.x < 4.2.28 Contains Multiple Vulnerabilities
```

Which of the following BEST describes the method used by each tool? (Choose two.)

- A. Tool A used fuzzing logic to test vulnerabilities.
- **B. Tool A is unauthenticated.**
- C. Tool B utilized machine learning technology.
- D. Tool B is unauthenticated.
- E. Tool A is agent based.
- **F. Tool B is agent based.**

Answer: B,F

NEW QUESTION # 235

An analyst reviews a recent report of vulnerabilities on a company's financial application server.

Which of the following should the analyst rate as being of the HIGHEST importance to the company's environment?

- **A. Remote code execution**
- B. SQL injection
- C. Susceptibility to XSS
- D. Banner grabbing
- E. Use of old encryption algorithms

Answer: A

NEW QUESTION # 236

A help desk technician inadvertently sent the credentials of the company's CRM in clear text to an employee's personal email account. The technician then reset the employee's account using the appropriate process and the employee's corporate email, and notified the security team of the incident. According to the incident response procedure, which of the following should the security team do NEXT?

- **A. Perform postmortem data correlation.**
- B. Contact the CRM vendor.
- C. Update the incident response plan.
- D. Prepare an incident summary report.

Answer: A

Explanation:

The security team should perform postmortem data correlation next after receiving notification of the incident from the help desk technician. Postmortem data correlation is an activity that involves analyzing data from various sources (such as logs, alerts, reports, etc.) to identify root causes, impacts, indicators of compromise (IoCs), lessons learned, and recommendations for improvement after an incident³. Postmortem data correlation can help the security team to:

Determine how the incident occurred and how it was detected and resolved
Assess the scope and severity of the incident and its effects on confidentiality, integrity, and availability
Identify any gaps or weaknesses in security controls or processes that contributed to the incident
Develop action plans or remediation strategies to prevent recurrence or mitigate future incidents

NEW QUESTION # 237

.....

The main objective of Pass4guide CS0-002 practice test questions features to assist the CS0-002 exam candidates with quick and complete CS0-002 exam preparation. The CompTIA CS0-002 exam dumps features are a free demo download facility, real, updated, and error-free CompTIA CS0-002 Test Questions, 12 months free updated CompTIA CS0-002 exam questions and availability of CS0-002 real questions in three different formats.
