Chrome, Internet Explorer, Firefox, Safari, Opera, and all the major browsers support the web-based Canadian Securities Course Exam 1 (CSC1) practice exam.

CSI Canadian Securities Course Exam 1 Sample Questions (Q77-Q82):

NEW QUESTION # 77

Which group is generally considered a primary derivative dealer in the over-the-counter markets?

- A. insurance companies.

- B. Commodity exporters.
- **C. Chartered banks.**
- D. Professional individual investors.

Answer: C

Explanation:

Chartered banks are generally considered primary derivative dealers in the over-the-counter (OTC) markets.

They act as intermediaries and market makers for derivatives like swaps, options, and forwards, facilitating trades between other financial institutions, corporations, and investors.

Their extensive resources, expertise, and regulatory compliance capabilities make them dominant players in the OTC derivatives market.

Study Document References:

* Volume 1, Chapter 10: Primary Derivative Dealers and OTC Markets, explaining the role of chartered banks in derivatives.

NEW QUESTION # 78

What is the main benefit for the investors when a company announces a stock split?

- A. An increase in the shares' market price.
- **B. An increase in the shares' affordability.**
- C. An Increase in the proportion of the shareholder's stake.
- D. An increase in the value of the shareholder stake

Answer: B

Explanation:

A stock split reduces the price per share, making the shares more affordable to smaller or retail investors. This does not increase the market capitalization or shareholder value but makes trading easier by improving liquidity and accessibility.

References:

* Volume 1, Chapter 8: Equity Securities, section on "Stock Splits and Consolidations," describes the purpose and benefits of stock splits for investors, particularly in terms of affordability and liquidity.

NEW QUESTION # 79

Which derivatives transaction has the greatest default risk?

- **A. Interest rate forward agreement between an investment dealer and a corporation.**
- B. Individual investor entering future contract with an institutional investor.
- C. Exchange-traded equity option contract between an individual investor and a dealer.
- D. Individual investor buying shares on an exchange during the ex-rights period.

Answer: A

Explanation:

An interest rate forward agreement (FRA) is an over-the-counter (OTC) derivative contract. Unlike exchange-traded derivatives, OTC contracts are not centrally cleared, meaning there is no intermediary to guarantee performance. This increases counterparty (default) risk, making FRAs inherently riskier than exchange-traded contracts.

* A. Individual investor buying shares on an exchange during the ex-rights period: This is a standard transaction involving equity securities, not derivatives, and carries no default risk.

* C. Exchange-traded equity option contract between an individual investor and a dealer: Exchange-traded derivatives are backed by a clearinghouse, which mitigates default risk.

* D. Individual investor entering a futures contract with an institutional investor: Futures contracts are also exchange-traded and centrally cleared, reducing default risk.

NEW QUESTION # 80

Keith has a \$150,000 term deposit with ABC Trust Company and a \$75,000 term deposit with XYZ Trust Company. Both term deposits have a maturity date of four years and both trust companies are member institutions of the CDIC. How much is Keith covered for under COIC if both trust companies become insolvent?

- A. \$200,000
- B. \$175,000
- C. \$225,000
- D. \$100,000.

Answer: A

Explanation:

The Canada Deposit Insurance Corporation (CDIC) insures eligible deposits (e.g., term deposits) up to a maximum of \$100,000 per depositor per member institution. In this case:

* Keith has \$150,000 in ABC Trust Company # \$100,000 is insured.

* Keith has \$75,000 in XYZ Trust Company # Entire \$75,000 is insured.

Total insured amount = \$100,000 (ABC) + \$75,000 (XYZ) = \$200,000.

References: Volume 1, Chapter 3 ("Investor Protection Funds and Insurance").

NEW QUESTION # 81

Which investment dealer category do discount brokers belong to?

- A. Institution firms
- B. Boutique firms
- C. Integrated firm
- D. Retail firms

Answer: D

Explanation:

Discount brokers fall under the category of retail firms. Retail firms cater to individual investors and often provide services such as executing trades at reduced commission rates, but they typically do not offer financial advice or portfolio management. Discount brokers provide online platforms for self-directed investors.

* A. Institutional firms: These firms serve large-scale investors such as pension funds or mutual funds, not individual investors.

* C. Integrated firms: These firms operate in both retail and institutional markets, but discount brokers are specifically associated with retail services.

* D. Boutique firms: These firms specialize in niche markets or services, such as wealth management or specific industry securities, rather than general retail brokerage.

NEW QUESTION # 82

.....

CSC1 real dumps revised and updated according to the syllabus changes and all the latest developments in theory and practice, our Canadian Securities Course Exam 1 real dumps are highly relevant to what you actually need to get through the certifications tests.
