We all harness talents with professional skills. Mastering the certificate of the ANS-C01 practice exam is essential for you. With all instability of the society, those knowledge and profession certificate mean a lot for you. So it is unquestionable the ANS-C01 learning questions of ours can do a big favor. And we have become the most popular exam braindumps provider in this career and supported by numerous of our loyal customers. You will be satisfied with our ANS-C01 study guide as well.

To become AWS Certified Advanced Networking Specialty, candidates must have a solid understanding of various networking concepts, such as routing, switching, VPN, network security, and network optimization. They must also have hands-on experience in configuring and managing network infrastructure on the AWS platform. The ANS-C01 exam consists of multiple-choice and multiple-response questions that test the candidate's knowledge and skills in designing, deploying, and managing complex networking solutions on AWS. ANS-C01 exam takes approximately 170 minutes to complete, and the passing score is 750 out of 1000 points.

The ANS-C01 Exam covers a wide range of topics related to AWS networking, including designing and implementing hybrid IT network architectures, automating AWS tasks using AWS services, optimizing network performance, and troubleshooting complex networks. Candidates must have prior experience with AWS networking and be familiar with various AWS services, including Amazon VPC, AWS Direct Connect, Amazon Route 53, and Amazon CloudFront.

ANS-C01 exam dumps & ANS-C01 torrent pdf & ANS-C01 training guide

Subjects are required to enrich their learner profiles by regularly making plans and setting goals according to their own situation, monitoring and evaluating your study. Because it can help you prepare for the ANS-C01 exam. If you want to succeed in your exam and get the related exam, you have to set a suitable study program. We believe that if you purchase ANS-C01 Test Guide from our company and take it seriously into consideration, you will gain a suitable study plan to help you to pass your ANS-C01 exam in the shortest time.

Amazon AWS Certified Advanced Networking Specialty Exam Sample Questions (Q204-Q209):

NEW QUESTION # 204

A company provisions an AWS Direct Connect connection to permit access to Amazon EC2 resources in several Amazon VPCs and to data stored in private Amazon S3 buckets. The Network Engineer needs to configure the company's on-premises router for this Direct Connect connection.

Which of the following actions will require the LEAST amount of configuration overhead on the customer router?

Response:

- A. Configure private virtual interfaces for the VPC resources and for Amazon S3
- B. Configure private virtual interfaces for the VPC resources and a public virtual interface for Amazon S3
- C. Configure a private virtual interface to a Direct Connect gateway for the VPC resources and for Amazon S3
- **D. Configure a private virtual interface to a Direct Connect gateway for the VPC resources and a public virtual interface for Amazon S3**

Answer: D

NEW QUESTION # 205

You have 3 VPCs that need to be able to pass traffic. In what two ways can you achieve this?

(Choose two.)

Note: Answers to this question are not verified by our experts, please study yourself and select the appropriate answers.

Contribute: Please send the correct answers with reference text/link on feedback@VMexam.com to get up to 50% cashback.

Response:

- A. Create VPNs between them and adjust the routing tables accordingly.
- **B. Peer them, VPC peering allows transitive peering as of December 2017.**
- C. Call AWS to enable transitive peering.
- **D. Peer each VPC to every other VPC to create a full mesh peering.**

Answer: B,D

NEW QUESTION # 206

What are two ways to influence the direction of Dynamic VPN traffic over multiple links?

(Choose two.)

Response:

- **A. MED**
- **B. AS_PATH Prepending**
- C. Shouting at it
- D. BFD

Answer: A,B

NEW QUESTION # 207

A company has 10 web server Amazon EC2 instances that run in an Auto Scaling group in a production VPC. The company has 10 other web servers that run in an on-premises data center. The company has a 10 Gbps AWS Direct Connect connection between the on-premises data center and the production VPC. The company needs to implement a load balancing solution that receives HTTPS traffic from thousands of external users. The solution must distribute the traffic across the web servers on AWS and the web servers in the on-premises data center. Regardless of the location of the web servers, HTTPS requests must go to the same web server throughout the entire session. Which solution will meet these requirements?

- **A. Create a Network Load Balancer (NLB) in the production VPC. Create a target group. Specify instance as the target type. Register the EC2 instances and the on-premises servers with the target group. Enable session affinity (sticky sessions) on the NLB.**
- B. Create a Network Load Balancer (NLB) in the production VPC. Create a target group. Specify ip as the target type. Register the EC2 instances and the on-premises servers with the target group. Enable connection draining on the NLB.
- C. Create an Application Load Balancer (ALB) in the production VPC. Create a target group. Specify instance as the target type. Register the EC2 instances and the on-premises servers with the target group. Enable application-based session affinity (sticky sessions) on the ALB.
- D. Create an Application Load Balancer (ALB) in the production VPC. Create a target group. Specify ip as the target type. Register the EC2 instances and the on-premises servers with the target group. Enable application-based session affinity (sticky sessions) on the ALB.

Answer: A

NEW QUESTION # 208

A company is planning a migration of its critical workloads from an on-premises data center to Amazon EC2 instances. The plan includes a new 10 Gbps AWS Direct Connect dedicated connection from the on-premises data center to a VPC that is attached to a transit gateway. The migration must occur over encrypted paths between the on-premises data center and the AWS Cloud. Which solution will meet these requirements while providing the HIGHEST throughput?

- A. Configure a transit VIF on the Direct Connect connection. Configure an IPsec VPN connection to an EC2 instance that is running third-party VPN software.
- **B. Configure MACsec for the Direct Connect connection. Configure a transit VIF to a Direct Connect gateway that is associated with the transit gateway.**
- C. Configure a public VIF on the Direct Connect connection. Configure two AWS Site-to-Site VPN connections to the transit gateway. Enable equal-cost multi-path (ECMP) routing.
- D. Configure a public VIF on the Direct Connect connection. Configure an AWS Site-to-Site VPN connection to the transit gateway as a VPN attachment.

Answer: B

Explanation:

<https://aws.amazon.com/blogs/networking-and-content-delivery/adding-macsec-security-to-aws-direct-connect-connections/>

NEW QUESTION # 209

.....

The three versions of our ANS-C01 training materials each have its own advantage, now I would like to introduce the advantage of the software version for your reference. On the one hand, the software version can simulate the real ANS-C01 examination for all of the users in windows operation system. On the other hand, if you choose to use the software version, you can download our ANS-C01 Exam Prep on more than one computer. We strongly believe that the software version of our study materials will be of great importance for you to prepare for the exam and all of the employees in our company wish you early success.
