

Free Download Exam 1z0-1080-24 Questions & High-quality Test 1z0-1080-24 Questions Pdf Ensure You a High Passing Rate

Question No. 1

You want to distribute DNS traffic to different endpoints based on the location of the end user. Which Traffic Management Steering Policy would you use?

- A. IP Prefix
- B. Load Balancer
- C. Geolocation
- D. Failover

Answer: C

Question No. 2

What should be created before provisioning an Oracle Cloud Infrastructure (OCI) DB System?

- A. Bucket in Object Storage
- B. Virtual Cloud Network
- C. Compute Instance
- D. Compartment

Answer: B

Question No. 3

In which two ways can Oracle Security Zones assist with the cloud security shared responsibility model?

- A. Encrypt storage resources with a customer-managed key.
- B. Allow access to an unsecured compartment, which is moved from a standard compartment.
- C. Deny public access to Oracle Cloud Infrastructure resources, such as databases and object storage buckets.
- D. Add or move a standard compartment to a highly secured security zone compartment.

Answer: A, C

Question No. 4

You have a high-demand web application running on Oracle Cloud Infrastructure (OCI). Your tenancy administrator has set up a schedule-based autoscaling policy on instance pool with an initial size of 5 instances for the application.

Policy 1:

Target pool size:10 instances

Execution time:8:30 a.m. on every Monday through Friday, in every month, in every year

Cron expression:0 30 8 ? * MON-FRI *

Which statement accurately explains the goal of this policy?

- A. Goal: A one-time schedule with only one scaling out event. At 8:30 a.m., on December 31,

1z0-1080-24 study material is suitable for all people. Whether you are a student or an office worker, whether you are a veteran or a rookie who has just entered the industry, 1z0-1080-24 test answers will be your best choice. For office workers, 1z0-1080-24 test dumps provide you with more flexible study time. You can download learning materials to your mobile phone and study at anytime, anywhere. And as an industry rookie, those unreadable words and expressions in professional books often make you feel mad, but 1z0-1080-24 Study Materials will help you to solve this problem perfectly. All the language used in 1z0-1080-24 study materials is very simple and easy to understand. With 1z0-1080-24 test answers, you don't have to worry about that you don't understand the content of professional books. You also don't need to spend expensive tuition to go to tutoring class. 1z0-1080-24 test dumps can help you solve all the problems in your study.

Oracle 1z0-1080-24 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Introduction to Planning Modules: This section of the exam measures the skills of module planners and introduces Planning modules. It includes integrating modules, leveraging best practices for module planning, and configuring Financials, Workforce, Capital, and Projects.
Topic 2	<ul style="list-style-type: none"> Manage Rules: This section of the exam measures the skills of business rule developers and focuses on designing business rules and rulesets. It explains the benefits of Groovy Rules in enhancing performance and flexibility within Planning applications.
Topic 3	<ul style="list-style-type: none"> Introduction to Strategic Modelling: This section of the exam measures the skills of strategic modelers and covers strategic modeling concepts. It includes setting up models, running simulations, and understanding their impact on decision-making processes.
Topic 4	<ul style="list-style-type: none"> Manage Metadata and Data: This section of the exam measures the skills of data integration specialists and covers metadata and data management in Planning. It includes identifying metadata and data load options, importing and exporting metadata and data, setting up and running data maps, creating data integrations, and mapping data across applications.
Topic 5	<ul style="list-style-type: none"> Planning Overview: This section of the exam measures the skills of planning administrators and focuses on understanding the features of Planning applications. It includes setting up Planning and Freeform applications, managing dimensions, and explaining the impact of dimension hierarchies. It also covers configuring valid and invalid intersections and cell-level security.
Topic 6	<ul style="list-style-type: none"> Maintain Planning: This section of the exam measures the skills of system administrators and focuses on monitoring maintenance tasks for Planning applications. It includes scheduling jobs, managing EPM Automate for automation tasks, backing up data, migrating metadata, cloning environments, and maintaining system updates.
Topic 7	<ul style="list-style-type: none"> Set Up Planning Security: This section of the exam measures the skills of security administrators and focuses on provisioning users and groups. It includes assigning access permissions to artifacts and cells in Planning to ensure secure access to critical information.
Topic 8	<ul style="list-style-type: none"> Configure Intelligent Performance Management: This section of the exam measures the skills of machine learning specialists and focuses on configuring IPM components. It includes setting up machine learning models for predictive analytics within Planning applications.
Topic 9	<ul style="list-style-type: none"> Manage Approvals: This section of the exam measures the skills of approval process managers and covers setting up approval workflows in Planning. It explains how to configure approval processes to streamline decision-making within organizations.
Topic 10	<ul style="list-style-type: none"> Manage Forms, Dashboards, and Navigation Flows: This section of the exam measures the skills of dashboard designers and covers designing forms, dashboards, and validation rules. It also includes creating and managing navigation flows to streamline user experience within Planning applications.

Test 1z0-1080-24 Questions Pdf - Detailed 1z0-1080-24 Study Dumps

Our system is high effective and competent. After the clients pay successfully for the 1z0-1080-24 study materials the system will send the products to the clients by the mails. The clients click on the links in the mails and then they can use the 1z0-1080-24 Study Materials immediately. Our system provides safe purchase procedures to the clients and we guarantee the system won't bring the virus to the clients' computers and the successful payment for our 1z0-1080-24 study materials.

Oracle Planning 2024 Implementation Professional Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which statement describes infolets?

- A. Infolets are predefined dashboards that give you insight into the overall project financials and expense and revenue metrics.
- B. Infolets help you organize, track, and prioritize your workload.
- **C. Infolets help you quickly analyze data and understand key business questions by presenting a visual overview of high-level, aggregated information.**
- D. Infolets give business process designers control over how various roles or groups interact with a business process.
- E. Infolets are a form type that provides flexible row management where dimension and member row cells and all data cells are unprotected.

Answer: C

Explanation:

In Oracle Planning 2024 Implementation, infolets are a feature designed to provide users with quick, visual insights into critical business data. They are not full dashboards, task management tools, or process control mechanisms, but rather compact, high-level representations of aggregated information.

* C. Infolets help you quickly analyze data and understand key business questions by presenting a visual overview of high-level, aggregated information: This statement accurately describes infolets.

They are visual tiles or widgets that display summarized data (e.g., KPIs, trends) to help users grasp key business insights at a glance. Infolets are typically found on the home page or navigation clusters and are customizable to highlight specific metrics relevant to the user's role or application.

* A. Infolets are predefined dashboards that give you insight into the overall project financials and expense and revenue metrics: While infolets provide insights, they are not full "predefined dashboards." Dashboards are more comprehensive, whereas infolets offer concise, targeted views of data.

* B. Infolets help you organize, track, and prioritize your workload: This describes task management or navigation features (e.g., task lists), not infolets, which focus on data visualization rather than workload management.

* D. Infolets give business process designers control over how various roles or groups interact with a business process: Infolets are not about process design or role interaction; they are about displaying data, not controlling processes.

* E. Infolets are a form type that provides flexible row management where dimension and member row cells and all data cells are unprotected: Infolets are not a form type; they are separate from forms and focus on visualization, not data entry or row management.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Using Infolets" (docs.oracle.com, updated 2024). Describes infolets as "visual overviews of high-level, aggregated information to quickly analyze data and answer business questions."

* Oracle Planning 2024 Implementation Study Guide: Defines infolets as tools for presenting summarized data visually for quick analysis.

NEW QUESTION # 14

You are preparing to design a report in Cloud EPM Planning using Report Designer. Which two statements are true about data sources in reports?

- **A. Include a chart in your report without displaying the underlying data grid.**
- **B. Control the way a report object is printed on the page relative to other report objects.**
- C. Insert charts in the report header to provide a quick visual summary of data.
- D. Insert a report object into the report if you are in Modify mode.

Answer: A,B

Explanation:

When designing reports in Oracle Cloud EPM Planning using Report Designer, data sources and report objects (e.g., grids, charts) have specific capabilities. The two true statements about data sources in reports are:

* A. Insert charts in the report header to provide a quick visual summary of data: Incorrect. Report Designer does not support inserting charts directly into the report header; charts are added as objects within the report body, linked to data sources.

* B. Include a chart in your report without displaying the underlying data grid: Correct. You can create a chart object tied to a data source (e.g., a grid) and configure it to display only the chart, suppressing the grid for a cleaner visual presentation.

* C. Control the way a report object is printed on the page relative to other report objects: Correct. Report Designer allows you to adjust the layout and positioning of report objects (e.g., grids, charts) relative to each other, controlling how they appear when printed or exported.

* D. Insert a report object into the report if you are in Modify mode: Incorrect. While you modify reports in Report Designer, there's no specific "Modify mode" restriction-objects can be inserted during initial design or edits, but this is not a data source-specific

feature.

The Oracle documentation verifies that B and C reflect Report Designer's flexibility with data sources and object management, making them the correct answers.

References:

- * Oracle Planning 2024 Implementation Study Guide: "Designing Reports with Report Designer" (docs.oracle.com, Published 2024-09-30).
- * Oracle EPM Cloud Documentation: "Report Designer Data Sources" (docs.oracle.com, Published 2023-12-05, updated for 2024).

NEW QUESTION # 15

Which item CANNOT be pushed between cubes using data maps?

- A. Supporting detail
- B. Attachments
- C. Comments
- D. Data change history

Answer: D

Explanation:

In Oracle Planning 2024, data maps with Smart Push or manual execution can push various types of data between cubes within the same application or across applications. However, not all items can be transferred.

The item that cannot be pushed is:

- * A. Comments: Incorrect. Comments (cell-level annotations) can be pushed between cubes using data maps, provided the mappings include the necessary dimensions.
- * B. Attachments: Incorrect. Attachments linked to data cells can be transferred via data maps, as long as the target cube supports them and the mapping is configured correctly.
- * C. Data change history: Correct. Data change history (audit trails tracking who changed what and when) is not transferable via data maps. It is metadata tied to the source cube's audit log, not a pushable data element.
- * D. Supporting detail: Incorrect. Supporting detail (breakdowns of aggregated values) can be pushed between cubes if the target cube is configured to accept it and the mapping includes it.

The Oracle documentation specifies that data change history is excluded from data map transfers, as it's a system-maintained log, not a user-editable or movable data type, making C the correct answer.

References:

- * Oracle Planning 2024 Implementation Study Guide: "Data Maps and Pushable Items" (docs.oracle.com, Published 2024-10-05).
- * Oracle EPM Cloud Documentation: "Smart Push Capabilities" (docs.oracle.com, Published 2023-12-15, updated for 2024).

NEW QUESTION # 16

After enabling and configuring Financials, which of the following is a recommended post-configuration task?

- A. Specify the days in Period and to modify account signage for alternate reporting methods
- B. Map and rename custom dimensions in Financials that will be used to integrate with other modules
- C. Disable features that you do not plan to use
- D. Plan headcount and detailed employee compensation by employee, job code, or both

Answer: B

Explanation:

After enabling and configuring the Financials module in Oracle Planning 2024, post-configuration tasks are recommended to optimize its functionality and integration. The most relevant task among the options is:

- * A. Plan headcount and detailed employee compensation by employee, job code, or both: Incorrect. This is a Workforce module task, not a post-configuration task for Financials, which focuses on revenue, expenses, and financial statements, not employee-level planning.
- * B. Specify the days in Period and to modify account signage for alternate reporting methods: Incorrect. While period setup occurs during initial configuration (e.g., Planning and Forecast Preparation), modifying account signage or days in periods is not a recommended post-configuration task—it's either part of initial setup or an ad-hoc adjustment.
- * C. Map and rename custom dimensions in Financials that will be used to integrate with other modules: Correct. Post-configuration, mapping and renaming custom dimensions (e.g., Department, Product) ensures seamless integration

with other modules like Workforce or Projects. This task aligns dimensions across the application, a common best practice after enabling Financials.

* D. Disable features that you do not plan to use: Incorrect. Disabling features is not a typical post- configuration task; features are enabled/disabled during initial configuration via the Configure card, not as a follow-up step.

The Oracle documentation highlights mapping custom dimensions as a recommended post-configuration task to facilitate data integration and reporting, making C the correct answer.

References:

* Oracle Planning 2024 Implementation Study Guide: "Post-Configuration Tasks for Financials" (docs.oracle.com, Published 2024-09-20).

* Oracle EPM Cloud Documentation: "Configuring Financials and Integration" (docs.oracle.com, Published 2023-11-10, updated for 2024).

NEW QUESTION # 17

You want to develop your forecast with Forms 2.0. Which statement about Forms 2.0 setup is true?

- A. Switch between Forms 1.0 and Forms 2.0 by selecting the Forms Version in Application Settings.
- B. Set up Forms 2.0 in your environment one time and it will work with all your applications.
- **C. Migrate the forms you want to work with in Forms 2.0 from Forms 1.0 to Forms 2.0.**
- D. Redesign forms 1.0 forms so that they are set up to work with Forms 2.0.

Answer: C

Explanation:

In Oracle Planning 2024 Implementation, Forms 2.0 represents an enhanced version of the form design and functionality framework compared to Forms 1.0. To develop forecasts using Forms 2.0, existing forms must be transitioned from the older version to the newer one, as they are not automatically compatible or universally enabled.

* D. Migrate the forms you want to work with in Forms 2.0 from Forms 1.0 to Forms 2.0: This is the correct statement. Oracle provides a migration process to convert Forms 1.0 forms to Forms 2.0, enabling users to leverage the advanced features of Forms 2.0 (e.g., improved navigation, dynamic rows

/columns, and enhanced usability). This migration is selective, meaning only the forms you choose to use with Forms 2.0 need to be migrated, and it is not a one-time global setup.

* A. Set up Forms 2.0 in your environment one time and it will work with all your applications:

Forms 2.0 is not a one-time environment-wide setup. It requires specific forms to be migrated or designed for Forms 2.0 compatibility, and not all applications automatically adopt it.

* B. Switch between Forms 1.0 and Forms 2.0 by selecting the Forms Version in Application Settings: There is no such toggle in Application Settings to switch between Forms 1.0 and Forms 2.0.

The transition to Forms 2.0 involves migration rather than a simple version switch.

* C. Redesign forms 1.0 forms so that they are set up to work with Forms 2.0: While redesigning is an option for creating new Forms 2.0-compatible forms, the standard process for existing forms is migration, not a complete redesign from scratch. Migration preserves the form structure while adapting it to Forms 2.0.

The migration process ensures that users can take advantage of Forms 2.0's capabilities while maintaining continuity with existing form designs, aligning with Oracle's recommended approach.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Working with Forms - Forms 2.0" (docs.oracle.com, updated 2024). States that "to use Forms 2.0, migrate existing Forms 1.0 forms to Forms 2.0 using the provided migration tools."

* Oracle Planning 2024 Implementation Study Guide: Confirms that migrating Forms 1.0 to Forms 2.0 is the true setup process for leveraging Forms 2.0 in forecasting.

NEW QUESTION # 18

.....

You must have thought about moving forward successfully in this competitive and fast-changing technological world. If you want to boost your career Oracle 1z0-1080-24 certification is the most acclaimed and honorable certificate in the tech sector. But the confusion regarding the preparation and relevant Oracle 1z0-1080-24 Practice Test questions must have emerged in your mind too.
