Our company is trying to satisfy every customer's demand. Of course, we also attach great importance on the quality of our SPLK-1002 real test. Every product will undergo a strict inspection process. In addition, there will have random check among different kinds of SPLK-1002 Study Materials. The quality of our SPLK-1002 exam quiz deserves your trust. Most of our customers are willing to introduce their friends to purchase our SPLK-1002 learning dumps.

The SPLK-1002 certification is an important credential for professionals who use Splunk to analyze and visualize data. Splunk Core Certified Power User Exam certification validates the skills and knowledge needed to effectively use Splunk and can help individuals stand out in a competitive job market. With the right preparation and dedication, candidates can successfully pass the SPLK-1002 exam and gain the benefits of this valuable certification.

The SPLK-1002 Certification Exam is a comprehensive test designed to evaluate a candidate's proficiency in using Splunk Core. SPLK-1002 exam focuses on the skills and knowledge required to operate and troubleshoot a Splunk environment. Splunk Core Certified Power User Exam certification is aimed at IT professionals, data analysts, and system administrators who work with Splunk and want to demonstrate their expertise in the platform.

## Exam SPLK-1002 Dump | Practice SPLK-1002 Exam

We have experienced education technicians and stable first-hand information to provide you with high quality & efficient SPLK-1002 training dumps. If you are still worried about your exam, our exam dumps may be your good choice. Our SPLK-1002 training dumps cover nearly 85% real test materials so that if you master our dumps questions and answers you can clear exams successfully. Don't worry over trifles. If you purchase our SPLK-1002 training dumps you can spend your time on more significant work.

### Splunk Core Certified Power User Exam Sample Questions (Q304-Q309):

#### NEW QUESTION # 304

Which of the following searches show a valid use of macro? (Select all that apply)

- A. `index=main source=mySource oldField=* | eval newField='makeMyField(oldField)' | table _time newField`
- B. `index=main source=mySource oldField=* | stats if('makeMyField(oldField)') | table _time newField`
- C. `index=main source=mySource oldField=* |'makeMyField(oldField)' | table _time newField`
- D. `index=main source=mySource oldField=* | "newField('makeMyField(oldField)')"' | table _time newField`

**Answer: A,C**

Explanation:

#### NEW QUESTION # 305

Which of the following examples would use a POST workflow action?

- A. Launch secondary Splunk searches that use one or more field values from selected events.
- B. Perform an external IP lookup based on a domain value found in events.
- C. **Use the field values in an HTTP error event to create a new ticket in an external system.**
- D. Open a web browser to look up an HTTP status code.

**Answer: C**

Explanation:

The correct answer is B. Use the field values in an HTTP error event to create a new ticket in an external system.

A workflow action is a knowledge object that enables a variety of interactions between fields in events and other web resources.

Workflow actions can create HTML links, generate HTTP POST requests, or launch secondary searches based on field values<sup>1</sup>.

There are three types of workflow actions that can be set up using Splunk Web: GET, POST, and Search2.

\* GET workflow actions create typical HTML links to do things like perform Google searches on specific values or run domain name queries against external WHOIS databases<sup>2</sup>.

\* POST workflow actions generate an HTTP POST request to a specified URI. This action type enables you to do things like creating entries in external issue management systems using a set of relevant field values<sup>2</sup>.

\* Search workflow actions launch secondary searches that use specific field values from an event, such as a search that looks for the occurrence of specific combinations of `ipaddress` and `http_status` field values in your index over a specific time range<sup>2</sup>.

Therefore, the example that would use a POST workflow action is B. Use the field values in an HTTP error event to create a new ticket in an external system. This example requires sending an HTTP POST request to the URI of the external system with the field values from the event as arguments.

The other examples would use different types of workflow actions. These examples are:

\* A. Perform an external IP lookup based on a domain value found in events: This example would use a GET workflow action to create a link to an external IP lookup service with the domain value as a parameter.

\* C. Launch secondary Splunk searches that use one or more field values from selected events: This example would use a Search workflow action to run another Splunk search with the field values from the event as search terms.

\* D. Open a web browser to look up an HTTP status code: This example would also use a GET workflow action to create a link to a web page that explains the meaning of the HTTP status code.

### NEW QUESTION # 306

Highlighted search terms indicate \_\_\_\_\_ search results in Splunk.

- A. Matching
- B. Sorted
- C. Display as selected fields.
- D. Charted based on time

**Answer: A**

Explanation:

Highlighted search terms indicate matching search results in Splunk, which means that they show which parts of your events match your search string. For example, if you search for error OR fail, Splunk will highlight error or fail in your events to show which events match your search string. Therefore, option D is correct, while options A, B and C are incorrect because they are not indicated by highlighted search terms.

### NEW QUESTION # 307

Which of the following statements are true for this search? (Select all that apply.) SEARCH: sourcetype=access\* |fields action productid status

- A. limits the fields are extracted
- B. is looking for all events that include the search terms: fields AND action AND productid AND status
- C. uses the table command to improve performance
- D. returns a table with 3 columns

**Answer: A**

### NEW QUESTION # 308

By default, how is acceleration configured in the Splunk Common Information Model (CIM) add-on?

- A. Turned off
- B. Turned on
- C. Determined automatically based on the data source.
- D. Determined automatically based on the sourcetype.

**Answer: C**

### NEW QUESTION # 309

.....

As you can find on our website, we have three versions of our SPLK-1002 learning questions: the PDF, Software and APP online. The online test engine and window software need to run on computers. The PDF version of the SPLK-1002 training engine is easy to make notes. In short, all of the three packages are filled with useful knowledge. You can try our free trails before making final decisions since we also have demos of our SPLK-1002 Exam Materials for you to free download before your payment.
