

# Free E\_S4CPE\_2405 Download Pdf, Real E\_S4CPE\_2405 Torrent

DOWNLOAD the newest PrepAwayTest E\_S4CPE\_2405 PDF dumps from Cloud Storage for free:  
<https://drive.google.com/open?id=10BSDWa2vDfBKgQvTmc0FcoK7WYgBsNHj>

The passing rate of our E\_S4CPE\_2405 exam materials are very high and about 99% and so usually the client will pass the exam successfully. But in case the client fails in the exam unfortunately we will refund the client immediately in full at one time. The refund procedures are very simple if you provide the E\_S4CPE\_2405 exam proof of the failure marks we will refund you immediately. If any questions or doubts exist, the client can contact our online customer service or send mails to contact us and we will solve them as quickly as we can. We always want to let the clients be satisfied and provide the best E\_S4CPE\_2405 Test Torrent and won't waste their money and energy.

The E\_S4CPE\_2405 study braindumps are compiled by our professional experts who have been in this career for over ten years. Carefully written and constantly updated content of our E\_S4CPE\_2405 exam questions can make you keep up with the changing direction of the exam, without aimlessly learning and wasting energy. In addition, there are many other advantages of our E\_S4CPE\_2405 learning guide. Hope you can give it a look and you will love it for sure!

## Download PrepAwayTest SAP E\_S4CPE\_2405 Exam Real Questions and Start this Journey

If you want to progress and achieve their ideal life, if you are not satisfied with life now, if you still use the traditional methods by exam, so would you please choose the E\_S4CPE\_2405 test materials, it will surely make you shine at the moment. Our E\_S4CPE\_2405 latest dumps provide users with three different versions, including a PDF version, a software version, and an online version. Although involved three versions of the teaching content is the same, but for all types of users can realize their own needs, whether it is which version of E\_S4CPE\_2405 Learning Materials, believe that can give the user a better learning experience. Below, I would like to introduce you to the main advantages of our research materials, and I'm sure you won't want to miss it.

## SAP E\_S4CPE\_2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of application consultants and covers configuring SAP solutions to meet business needs, along with setting up and managing the SAP Fiori Launchpad. It also touches on customizing the user interface for an optimal and user-friendly experience.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops: This section of the exam measures skills of project managers and emphasizes the importance of adopting a cloud-first approach when implementing SAP solutions. It also includes building the right implementation team and running fit-to-standard workshops to align system configuration with best practices and standard business processes.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Extensibility, Integration, and Clean Core: This section of the exam measures skills of integration specialists and involves understanding the principles of extending SAP functionality without compromising the clean core approach. It includes integrating SAP with other systems, maintaining system integrity, and ensuring sustainable customizations.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>System Landscapes and Identity Access Management: This section of the exam measures skills of system administrators and focuses on designing and managing SAP system landscapes while ensuring secure and efficient identity access management. It includes concepts related to system environments, user authentication, and authorization controls.</li> </ul>

## SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q16-Q21):

### NEW QUESTION # 16

Which tool migrates the database and converts the data during a system conversion to SAP S/4HANA Cloud Private Edition?

- A. SAP S/4HANA migration cockpit
- B. SAP Data Services
- C. Custom Code Migration app
- D. Software Update Manager

### Answer: D

Explanation:

When performing a system conversion to SAP S/4HANA Cloud Private Edition (typically from an existing SAP ERP system like ECC), the process involves both database migration and data conversion to align with the S/4HANA data model (e.g., simplified tables, HANA database compatibility). Let's evaluate the options:

- \* A. SAP S/4HANA Migration Cockpit: This tool is primarily used for migrating data from legacy systems (SAP or non-SAP) to SAP S/4HANA during a new implementation. It facilitates data transfer using predefined templates and is not designed for system conversions, which involve upgrading an existing SAP system. Thus, it is incorrect in this context.
- \* B. Software Update Manager (SUM): This is the correct answer. The Software Update Manager (SUM) is SAP's standard tool for system conversions to SAP S/4HANA, including the Cloud Private Edition. SUM handles the technical conversion process, which includes migrating the database to SAP HANA (if not already on HANA) and converting the data to the S/4HANA data model (e.g., replacing old tables like BSEG with ACDOCA). For Private Edition conversions, SUM is used under the RISE with SAP methodology to ensure a smooth transition while retaining customizations where applicable.
- SAP documentation explicitly identifies SUM as the tool for this purpose.
- \* C. Custom Code Migration App: This app, part of the SAP Fiori suite, is used to analyze and adapt custom ABAP code to ensure compatibility with SAP S/4HANA. While it is a critical tool in the conversion process, it does not handle database migration or data conversion—it focuses solely on code adaptation. Therefore, it is not the correct answer.
- \* D. SAP Data Services: This is an ETL (Extract, Transform, Load) tool used for data integration and migration, often in data warehousing or new implementation scenarios. It is not designed for system conversions, which require a comprehensive upgrade of the existing system, including database and application layers. Hence, it is incorrect here.

In summary, the Software Update Manager (SUM) is the tool that migrates the database and converts the data during a system conversion to SAP S/4HANA Cloud Private Edition.

### NEW QUESTION # 17

Which of the following tasks are included in the SAP S/4HANA Cloud Private Edition standard services delivered by SAP for a new implementation? Note: There are 3 correct answers to this question.

- A. Configuring the SAP Best Practices business processes
- B. Implementing customizations to the SAP Best Practices business processes
- C. Activating required business functions in client 000
- D. Provisioning a client with the desired client setup alternative
- E. Activating SAP Best Practices content in the system

**Answer: A,D,E**

Explanation:

SAP provides standard services under RISE with SAP for a new implementation of SAP S/4HANA Cloud Private Edition. Let's evaluate:

- \* A. Configuring the SAP Best Practices business processes: This is correct. SAP standard services include configuring Best Practices processes (e.g., order-to-cash) based on customer requirements, typically during the Realize phase.
- \* B. Provisioning a client with the desired client setup alternative: This is correct. SAP provisions the initial system landscape, including setting up a client (e.g., client 100) with the agreed setup (e.g., organizational structure), as part of the Prepare phase services.
- \* C. Implementing customizations to the SAP Best Practices business processes: This is incorrect. Customizations (e.g., coding, extensions) beyond configuration are customer or partner responsibilities, not part of SAP's standard services.
- \* D. Activating required business functions in client 000: This is incorrect. Activating business functions in client 000 is a technical task for on-premise systems or conversions, not a standard service for a new cloud implementation, where Best Practices are deployed differently.
- \* E. Activating SAP Best Practices content in the system: This is correct. SAP standard services include activating Best Practices content (e.g., via SAP Solution Builder) to provide a preconfigured baseline for the Private Edition system.

In summary, tasks included in SAP's standard services are A(Configuring the SAP Best Practices business processes), B(Provisioning a client with the desired client setup alternative), and E(Activating SAP Best Practices content in the system).

### NEW QUESTION # 18

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. Target customer go-live date
- B. Known integration requirements
- C. SAP Fiori application extensions
- D. Business role requirements

**Answer: B,D**

Explanation:

The Digital Discovery Assessment (DDA) is a pivotal tool in the SAP S/4HANA Cloud implementation process, designed to align a customer's business requirements with the appropriate SAP solutions. It captures various critical aspects to ensure a successful deployment.

Option A: Business role requirements

This option is correct. The DDA involves identifying the specific business roles within an organization to tailor the SAP solution accordingly. Understanding these roles ensures that the system supports the necessary functions and responsibilities of each user group.

Option B: Known integration requirements

This option is correct. The assessment captures existing integration points with other systems, which is crucial for seamless data flow

and process efficiency. Documenting these requirements helps in planning and executing necessary integrations during implementation.

Option C: Target customer go-live date

This option is incorrect. While the go-live date is essential for project planning, it is typically determined during the project management phase rather than being a primary focus of the DDA.

Option D: SAP Fiori application extensions

This option is incorrect. The DDA primarily focuses on assessing current business processes and integration needs. Specifics like SAP Fiori application extensions are usually addressed later in the implementation process, during the design and customization phases.

In summary, the Digital Discovery Assessment captures business role requirements and known integration requirements to ensure that the SAP S/4HANA Cloud Private Edition solution aligns with the organization's operational needs.

## NEW QUESTION # 19

Which tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Build
- B. SAP Cloud SDK
- C. SAP Fiori extensibility apps
- D. SAP Business Application Studio

**Answer: A,C**

Explanation:

SAP provides tools that enable non-developers to create low-code/no-code extensions, facilitating customization without extensive programming knowledge.

Option A: SAP Business Application Studio

This option is incorrect. SAP Business Application Studio is a development environment designed for professional developers, offering comprehensive coding capabilities.

Option B: SAP Build

This option is correct. SAP Build is a suite of low-code/no-code tools that allow business users to create applications, automate processes, and design business sites with minimal coding. It includes SAP Build Apps, SAP Build Process Automation, and SAP Build Work Zone.

Option C: SAP Fiori extensibility apps

This option is correct. SAP Fiori extensibility apps are key user tools embedded in SAP S/4HANA that enable non-developers to adapt and extend SAP applications, such as adding custom fields or creating custom business objects, using a low-code/no-code approach.

Option D: SAP Cloud SDK

This option is incorrect. SAP Cloud SDK is intended for professional developers to build extensions and applications on SAP Cloud Platform, requiring coding expertise.

In summary, SAP Build and SAP Fiori extensibility apps empower non-developers to create low-code/no-code extensions within SAP S/4HANA Cloud Private Edition.

## NEW QUESTION # 20

What is in scope of Fit-to-Standard workshops in a new implementation? Note: There are 2 correct answers to this question.

- A. Estimating relative effort of the planned changes
- B. Teaching the customer LOB experts how to navigate end-to-end business processes
- C. Providing feedback if changes are necessary to make the process fit the customer's needs
- D. Completing the user acceptance testing on the business processes

**Answer: B,C**

## NEW QUESTION # 21

.....

With E\_S4CPE\_2405 guide torrent, you may only need to spend half of your time that you will need if you didn't use our products successfully passing a professional qualification exam. In this way, you will have more time to travel, go to parties and even prepare

for another exam. The benefits of E\_S4CPE\_2405 Study Guide for you are far from being measured by money. E\_S4CPE\_2405 guide torrent has a first-rate team of experts, advanced learning concepts and a complete learning model. You give us a trust and we reward you for a better future.
