Ensure Your Success With Valid & Updated Juniper JN0-224 Exam Questions [2026]

Download the free JN0-224 pdf demo file of DumpsTests brain dumps. Checking the worth of the JN0-224 exam questions and learns the format of questions and answers. A few moments are enough to introduce you to the excellent of the JN0-224 Brain Dumps and the authenticity and relevance of the information contained in them.

Juniper Automation and DevOps, Associate (JNCIA-DevOps) Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which development model is the classic approach to software development?

- A. Scrum
- B. Kanban
- C. Waterfall
- D. Lean

Answer: C

NEW QUESTION # 46

Which statement about the NETCONF content layer is true?

- A. It uses HTML for RPC request and response payloads.
- B. It uses YAML for RPC request and response payloads.
- C. It uses JSON for RPC request and response payloads.
- D. It uses XML for RPC request and response payloads.

Answer: D

Explanation:

The NETCONF protocol, used for network management, utilizes XML for encoding the RPC (Remote Procedure Call) requests and responses. XML is chosen because of its flexibility and ability to represent hierarchical data structures, making it well-suited for representing network configurations and states.

Option B is correct because XML is the standard format used for NETCONF RPC payloads.

Options A (YAML), C (JSON), and D (HTML) are incorrect because these formats are not used by NETCONF for its RPC payloads.

Supporting Reference:

RFC 6241 - NETCONF Protocol: This RFC describes the use of XML for encoding NETCONF messages.

NEW QUESTION # 47

Exhibit.

```

<rpc-reply xmlns:junos="http://xml.juniper.net/junos/20.1R0/junos">
  <configuration junos:commit-seconds="1589295982" junos:commit-localtime="2020-05-12 15:06:22
UTC" junos:commit-user="user">
    <interfaces>
      <interface>
        <name>ge-0/0/1</name>
        <unit>
          <name>0</name>
          <family>
            <inet>
              <address>
                <name>192.168.10.1/24</name>
              </address>
            </inet>
          </family>
        </unit>
      </interface>
      <interface>
        <name>fxp0</name>
        <unit>
          <name>0</name>
          <family>
            <inet>
              <address>
                <name>172.25.11.1/24</name>
              </address>
            </inet>
          </family>
        </unit>
      </interface>
    </interfaces>
  </configuration>
</rpc-reply>

```

Referring to the exhibit, which XML XPath expression will only show the IP address XML elements?

- A. //name
- B. /name
- C. //address/name
- D. /address/name

Answer: C

Explanation:

https://www.w3schools.com/xml/xpath_syntax.asp

NEW QUESTION # 48

What is the correct Python script syntax to prompt for input?

- A. hostIP = input"Device IP address: "
- B. hostIP = input("Device IP address: ")
- C. input("Device IP address: ") = hostIP
- D. hostIP = input {Device IP address: }

Answer: B

Explanation:

In Python, the correct syntax to prompt the user for input and store that input in a variable is:

input(prompt): The input() function is used to take input from the user. The string provided as an argument (inside the parentheses) is displayed as a prompt to the user. The input provided by the user is returned as a string and can be stored in a variable.

Example:

```
hostIP = input("Device IP address: ")
```

In this example, "Device IP address: " is the prompt displayed to the user, and the user's input will be stored in the variable hostIP.

Options B, C, and D are syntactically incorrect in Python.

Reference:

Python Official Documentation: Describes the use of the input() function for getting user input.

Python Tutorials: Various tutorials demonstrate how to properly use the input() function in scripts.

NEW QUESTION # 49

Which two statements are correct about a Python list data type? (Choose two.)

- A. The data contained in a list data type cannot be modified.
- B. The data contained in a list data type is not sequenced or indexed.
- C. The data contained in a list data type is sequenced and indexed starting from 0.
- D. The data contained in a list data type can be modified.

Answer: C,D

Explanation:

Python lists have the following characteristics:

Modifiable Data (A): Lists are mutable, meaning you can change, add, or remove elements after the list has been created.

Sequenced and Indexed (B): Lists maintain the order of their elements and are indexed starting from 0. This means you can access elements by their position in the list.

Option C is incorrect because lists are mutable, allowing modifications. Option D is incorrect because lists are indeed sequenced and indexed, unlike dictionaries.

Reference:

Python Official Documentation: Covers the properties of lists, including mutability and indexing.

Python Data Structures Guide: Explains list operations and how to manipulate them.

NEW QUESTION # 50

.....

You can get the authoritative JN0-224 certification exam in first try without attending any expensive training institution classes. The main reason that makes you get succeed is the accuracy of our JN0-224 test answers and the current exam pass guide. We provide you the Latest JN0-224 Dumps Pdf for exam preparation and also the valid study guide for the organized review. You can completely trust our learning materials.

Pdf JN0-224 Free: <https://www.dumpstests.com/JN0-224-latest-test-dumps.html>

Our Automation and DevOps, Associate (JNCIA-DevOps) (JN0-224) exam questions are the most cost-effective as we understand that you need low-cost material but are authentic and updated, DumpsTests is your ally in achieving your targeted Automation and DevOps certification, providing you easy and interactive JN0-224 exam dumps, We also have a professional service stuff to answer any your questions about JN0-224 exam dumps, Juniper Study JN0-224 Reference You will have good command knowledge with the help of our study materials.

Therefore, this month we resolved to become more JN0-224 proactive and change no" to yes, What we're seeing is that it used to be really clear, Our Automation and DevOps, Associate (JNCIA-DevOps) (JN0-224) exam questions are the most cost-effective as we understand that you need low-cost material but are authentic and updated.
