Microsoft Power Platform Solution Architect Sample Questions (Q172-Q177):

NEW QUESTION # 172

A company plans to use Microsoft Power Pages. The company gathers business requirements. You need to identify the functional requirements.

Which two requirements should you gather? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Users must be able to submit a service request on a Power Pages site.
- B. Azure Front Door and Power Pages must be used to improve caching capabilities.
- C. Users must be able to control the use of their personal data in Microsoft Dataverse.
- D. A Power Pages site must be able to handle 100 concurrent external site visitors.
- E. Users must be able to log in to a Power Pages site by using single sign-on.

Answer: A,E

NEW QUESTION # 173

You are implementing a Microsoft Power Platform solution for a customer to include data migration from multiple legacy systems. The data includes lead and contact data. The environment includes an assigned security group.

The following issues have occurred during a go-live deployment attempt:

- * Lookup values are not populated when data migration is complete.
- * Data is being added to the contacts table that is not part of the data migration.
- * Various users do not appear in the list of users available for record assignment.

You need to resolve the go-live deployment issues.

How should you resolve the issue? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Solution
Lookup values are not populated when data migration is complete.	Split the import data into smaller import batches. Import the data by using an application user. Split the import data into smaller import batches. Disable all Power Automate flows, plug-ins, and workflows. Run data migration in a specific order.
Data is being added to the contacts table that is not part of the data migration.	Disable all Power Automate flows, plug-ins, and workflows. Disable auditing. Import the data by using an application user. Disable all Power Automate flows, plug-ins, and workflows. Split the import data into smaller import batches.
Various users do not appear in the list of users available for record assignment.	Add to a security group. Add to a security group. Add a security role. Add a Microsoft 365 role. Add a field security profile.

Answer:

Explanation:

Answer Area

**Microsoft**

NEW QUESTION # 174

You need to provide the IT specialists with design diagrams.
What should you provide?

- A. Business process modeler (BPM)
- B. AI Builder
- **B. Dynamics 365 Product Visualize**
- C. Entity relationship diagram (ERD)

Answer: B

Explanation:

Explanation

Scenario: IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system. Business process modeler (BPM) in Microsoft Dynamics Lifecycle Services (LCS) is a tool that you can use to create, view, and modify repeatable implementations that are based on business process libraries. BPM helps you align your business processes with industry-standard processes that are described by the American Productivity & Quality Center (APQC) Reference: <https://docs.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/lifecycle-services/bpm-overview>

NEW QUESTION # 175

You are a Power Apps architect for a company. The IT administrator designs a Power Apps app that is ready to be tested. The company uses application lifecycle management (ALM).

Each version and solution component must be tracked as it is tested.

You need to recommend a strategy to deploy solutions for the user acceptance testing environment.

What should you recommend?

- A. Use Package Deployer and deploy an unmanaged solution.
- **B. Use Solution Packager and deploy an unmanaged solution.**
- C. Use Solution Packager and deploy a managed solution.
- D. Use Package Deployer and deploy a managed solution.

Answer: B

Explanation:

Solution Packager is a tool that can unpack a compressed solution file into multiple XML files and other files, so they can be easily

managed by a source control system.

Unmanaged solution: An open solution with no restrictions on what can be added, removed, or modified. This is recommended during development of a solution.

C: Managed solution

A completed solution ready to be imported into an organization. Once imported, components can't be added or removed, although they can optionally allow further customization. This is recommended when development of the solution is complete.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/solution-packager-tool>

NEW QUESTION # 176

A company is undergoing digital transformation.

You must conduct an in-person workshop with several business stakeholders to learn more about the company and its solution requirements. You have limited time to get the information from the stakeholders.

You need to ensure that the workshop is set up for success.

Which two actions should you perform? Each correct answer presents a complete solution. Choose two.

NOTE: Each correct selection is worth one point.

- **A. Publish the agenda in advance of the workshop.**
- B. Present the proposed solution as part of the workshop.
- **C. Keep to the agenda by minimizing side conversations.**
- D. Explain the technical aspects of the solution to the stakeholders.

Answer: A,C

NEW QUESTION # 177

.....

"There is no royal road to learning." Learning in the eyes of most people is a difficult thing. People are often not motivated and but have a fear of learning. However, the arrival of PL-600 study materials will make you no longer afraid of learning. PL-600 study material provides you with a brand-new learning method that lets you get rid of heavy schoolbags, lose boring textbooks, and let you master all the important knowledge in the process of making a question. Please believe that with PL-600 Study Materials, you will fall in love with learning.
