Want to get a high-paying job? Hurry to get an international NCS-Core certificate! You must prove to your boss that you deserve his salary. You may think that it is not easy to obtain an international certificate. Don't worry! Our NCS-Core Guide materials can really help you. And our NCS-Core exam questions have helped so many customers to pass their exam and get according certifications. You can just look at the warm feedbacks to us on the website.

You can read the Nutanix NCS-Core Exam certified salary:

The approximate salary of Nutanix NCS-Core Certified Professionals from different countries are as follows:

- UK: 49,165.20
- USA: \$118,231.00
- Canada: \$65,978.00
- Australia: \$60,266.00
- India: 27,00,000 INR

Nutanix NCS-Core Exam consists of 60 multiple-choice questions and is administered in a computer-based format. NCS-Core Exam Duration is 90 minutes, and candidates must achieve a minimum passing score of 300 out of 500 to earn the certification.

NCS-Core exam is available in multiple languages and can be taken at any authorized Pearson VUE testing center worldwide.

NCS-Core Latest Test Simulator, Intereactive NCS-Core Testing Engine

Will you feel nervous while facing the real exam? Choose us, since we will help you relieve your nerves. NCS-Core Soft test engine can stimulate the real exam environment, so that you can know the procedure of the exam, and your confidence for the exam will be strengthened. In addition, NCS-Core exam dumps are edited by professional experts, who are quite familiar with the exam center, therefore the quality can be guaranteed. We offer you free demo for NCS-Core to have a try before buying. And you will receive the downloading link and password within ten minutes for NCS-Core exam materials, so that you can start your learning immediately.

Nutanix NCS-Core exam is aimed at professionals who have experience in designing, deploying, and managing hyper-converged infrastructure solutions. NCS-Core exam is designed to test their knowledge of Nutanix core infrastructure technologies, including storage, networking, virtualization, and security. NCS-Core Exam is a comprehensive test of the skills and knowledge required to work with Nutanix infrastructure solutions.

Nutanix Certified Services Core Infrastructure Professional Sample Questions (Q183-Q188):

NEW QUESTION # 183

An administrator is responsible for the following Nutanix Enterprise Cloud environment:

- * A central datacenter with a 20-node cluster with 1.5PB of storage
- * Five remote sites each with a 4-node cluster with 200TB storage

The remote sites are connected to the datacenter via 1GB links with an average latency of 6 ms RTT. What is the minimum RPO the administrator can achieve for this environment?

- A. 1 hour
- **B. 15 minutes**
- C. 6 hours
- D. 0 minutes

Answer: B

Explanation:

NEW QUESTION # 184

An administrator inherits a new Nutanix environment and logs in to a CVM to check the network configuration. The configuration is as follows:

```

nutanix@NTNX-16xxxxxxxxx5-A-CVM:xx.xx.xx.76:~$ manage_ova show_uplinks
Bridge: br0
Bond: br0-up
    bond_mode: active-backup
    interfaces: eth3 eth2
    lacp: off
    lacp-fallback: True
    lacp_speed: slow
Bridge: br1
Bond: eth0
    bond_mode: active-backup
    interfaces: eth0
    lacp: off
    lacp-fallback: false
    lacp_speed: slow
Bridge: br2
Bridge: br5

nutanix@NTNX-16xxxxxxxxx5-A-CVM:xx.xx.xx.76:~$ manage_ova show_interfaces
name  mode  link  speed
eth0   1000  True   1000
eth1   1000  True   1000
eth2   10000 True   10000
eth3   10000 True   10000

```

Which action should the administrator take to improve network performance?

- A. Configure balance-sib or balance-tcp mode for br0-up if switch configuration allows
- B. Configure VLAN tagging both on br0 and br1 and their physical interfaces.
- C. Remove one 10 Gbs interface from br0-up to make sure all 10 Gbs can be used.
- D. Add eth0 and eth1 to the br0-up bond

Answer: A

Explanation:

Upon reviewing the network configuration in the provided image and considering the setup in a Nutanix environment, the best action to improve network performance is to adjust the bonding mode for the bridge that includes multiple high-bandwidth interfaces.

Option C, "Configure balance-sib or balance-tcp mode for br0-up if switch configuration allows," is the most effective choice. The bonding mode "balance-sib" (source IP-based load balancing) or "balance-tcp" (TCP/IP layer balancing) can optimize the distribution of network traffic across multiple interfaces, thereby enhancing throughput and redundancy.

This approach utilizes the capabilities of multiple network interfaces more efficiently, distributing the load to prevent any one interface from becoming a bottleneck while providing failover redundancy.

References: This configuration strategy aligns with best practices for network setup in high-performance virtualized environments, as detailed in Nutanix's networking configuration guides and the Nutanix Bible, ensuring optimal performance and reliability.

NEW QUESTION # 185

After a recent installation using a flat switch, a consultant notices issues migrating the Nutanix nodes to the customer's network. The customer states that they are using VLANs on the production switch but not on the dedicated switch for IPMI. The customer does not require a manual configuration of the host and CVM.

What network changes need to be made to correct the issues?

- A. Use tagged VLANs for the CVM and host and access mode for IPMI.
- B. Use Native VLANs for the CVM and host and access mode for IPMI.
- C. Use Native VLANs for the CVM and host and trunk mode for IPMI.
- D. Use untagged VLANs for the CVM and host and trunk mode for IPMI.

Answer: B

NEW QUESTION # 186

In a 20-node ESXi deployment, the customer needs additional resiliency to survive the loss of two nodes concurrently. Which configuration should the consultant use to ensure that the appropriate resources are available?

- Answer: B**

Answer: B
