Instant 1Z0-1126-1 Download, 1Z0-1126-1 Frequent Updates

Our 1Z0-1126-1 training materials are designed to help users consolidate what they have learned, will add to the instant of many training, the user can test their learning effect in time after finished the part of the learning content, have a special set of wrong topics in our 1Z0-1126-1 guide torrent, enable users to find their weak spot of knowledge in this function, iterate through constant practice, finally reach a high success rate. As a result, our 1Z0-1126-1 study questions are designed to form a complete set of the contents of practice can let users master knowledge to pass the 1Z0-1126-1 exam.

Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q61-Q66):

NEW QUESTION # 61

Which analytics dashboard is used to provide insight about user behavior in the application?

- A. Optimization dashboard
- B. Smart Tips dashboard
- C. Hotspots dashboard
- D. Process guides dashboard

Answer: C

Explanation:

The Hotspots dashboard in OGL is specifically designed to provide insights into user behavior within the host application by tracking where users click, hover, or encounter difficulties. It uses heatmaps or similar visualizations to highlight high-interaction areas, revealing patterns like frequent errors or popular navigation paths. This behavioral focus sets it apart from other dashboards: a Smart Tips dashboard (option A) would focus on tip-specific usage (not a standard OGL dashboard), a Process guides dashboard (option C) isn't a recognized entity in OGL analytics, and an Optimization dashboard (option D) is vague and not standard. The Hotspots dashboard's ability to map user interactions makes it invaluable for optimizing content placement and improving user experience, directly addressing the question's intent.

NEW QUESTION # 62

Where in the OGL console can users provide step-level feedback on a guide?

- A. In the Step Settings section of the Full Editor
- B. In the Description field of the Guide Settings modal
- C. In the Guide or Step Comments fields within the Content Editor
- D. In the feedback field within the Feedback Analytics dashboard

Answer: C

Explanation:

In the OGL console, step-level feedback is provided directly within the Content Editor, specifically in the Guide or Step Comments fields. This allows users to annotate specific steps or the entire guide during development or review, ensuring detailed and contextual feedback. The Feedback Analytics dashboard (option A) is for analyzing feedback trends, not submitting it. Step Settings (option C) adjusts configurations, and the Description field in Guide Settings (option D) is for metadata, not feedback. The Content Editor is the correct tool for this purpose.

NEW QUESTION # 63

In the Enable phase, which activities are the Organizational Change and Training Leads responsible for?

- A. Developing knowledge and skills with project governance plans
- B. Establishing mechanisms for collecting feedback and insights from end users
- C. Communicating known and new issues, and workarounds that will impact users

Answer: A

Explanation:

In the Enable phase of an OGL project, Organizational Change and Training Leads focus on developing knowledge and skills among

users and stakeholders, often aligned with project governance plans to ensure adoption and competency (option C). This phase emphasizes training delivery and change management to enable successful use of OGL. Establishing feedback mechanisms (option A) and communicating issues (option B) are typically responsibilities of other roles (e.g., administrators or support leads) during later phases like Refine or Hypercare. Option C reflects the Leads' strategic role in building capability, ensuring the organization is equipped to leverage OGL effectively as part of the broader deployment approach.

NEW QUESTION # 64

Which platform provides learning paths to help you access digital content on OGL?

- A. Learning Management System
- B. Cloud Customer Connect
- C. Oracle MyLearn
- D. Internet Browser

Answer: C

Explanation:

Oracle MyLearn is the dedicated platform for OGL learning paths, offering digital content and training. LMS (option A) is generic, Internet Browser (option B) is a tool, and Cloud Customer Connect (option D) is a community, not a learning platform.

NEW QUESTION # 65

What are the deliverables of an OGL project?

- A. Job aids
- B. OGL KPIs
- C. Total number of content items

Answer: B

Explanation:

The deliverables of an OGL project are OGL Key Performance Indicators (KPIs) (option B), which measure success through metrics like user adoption, content usage, and feedback scores. These KPIs provide a quantifiable assessment of the project's impact, aligning with Oracle's outcome-focused approach. The total number of content items (option A) is a byproduct, not a deliverable, while job aids (option C) are specific content types, not the overarching output. KPIs encapsulate the project's effectiveness and value, offering stakeholders a clear, data-driven evaluation of OGL's contribution to business objectives.

NEW QUESTION # 66

.....

For most users, access to the relevant qualifying examinations may be the first, so many of the course content related to qualifying examinations are complex and arcane. According to these ignorant beginners, the 1Z0-1126-1 Exam Questions set up a series of basic course, by easy to read, with corresponding examples to explain at the same time, the Oracle Guided Learning Project Management Foundations Associate - Rel 1 study question let the user to be able to find in real life and corresponds to the actual use of learned knowledge, deepened the understanding of the users and memory. Because many users are first taking part in the exams, so for the exam and test time distribution of the above lack certain experience, and thus prone to the confusion in the examination place, time to grasp, eventually led to not finish the exam totally.
