

Free PDF 2025 156-836: Accurate Check Point Certified Maestro Expert - R81 (CCME) Certification Training

P.S. Free 2025 CheckPoint 156-836 dumps are available on Google Drive shared by ITdumpsfree: https://drive.google.com/open?id=1jptO1KzMX2KSQ8JBrg__Xotrxr4JQH9G

First and foremost, we have high class operation system so we can assure you that you can start to prepare for the 156-836 exam with our 156-836 study materials only 5 to 10 minutes after payment. Second, once we have compiled a new version of the 156-836 test question, we will send the latest version of our 156-836 Training Materials to our customers for free during the whole year after purchasing. Last but not least, our worldwide after sale staffs will provide the most considerate after sale service on 156-836 training guide for you in twenty four hours a day, seven days a week.

People is faced with many unknown factors and is also surrounded by unknown temptations in the future. Therefore, we must lay a solid foundation for my own future when we are young. Are you ready? ITdumpsfree CheckPoint 156-836 practice test is the best. Just for the exam simulations, you will find it will be useful to actual test. More information, please look up our CheckPoint 156-836 free demo. After you purchase our products, we offer an excellent after-sales service.

156-836 Exam Dumps Collection, 156-836 New Exam Bootcamp

ITdumpsfree CheckPoint 156-836 desktop practice exam software is usable on Windows computers without an active internet connection. It creates the complete scenario of the Check Point Certified Maestro Expert - R81 (CCME) (156-836) real test through its multiple mock tests. Our practice software contains all the questions which you will encounter in the CheckPoint final test.

CheckPoint Check Point Certified Maestro Expert - R81 (CCME) Sample Questions (Q43-Q48):

NEW QUESTION # 43

What can be learned from the output of `sx_api_ports_dump.py` command?

- A. Information about Security Groups
- B. Orchestrator port status
- C. Information about downlink ports only
- D. Information about backplane bonds

Answer: D

NEW QUESTION # 44

What command can be run to show which SGM is selected to receive traffic?

- A. asg monitor
- B. g_tcpdump
- C. dsl calc
- D. asg calc

Answer: D

Explanation:

The asg calc command is a tool to show which SGM is selected to receive traffic based on the distribution mode and the packet parameters. It takes the port number, the source IP, the destination IP, and optionally the source port and the destination port as arguments and returns the SGM ID and the hash value. For example, asg calc 1 10.0.0.1 20.0.0.2 1234 80 will show which SGM will receive the traffic from 10.0.0.1:1234 to 20.0.0.2:80 on port 1.

NEW QUESTION # 45

There are two appliances within the same Security Group. One of them is connected by One downlink only, another one by Two downlinks. Assuming there's no NAT and no VPN, what would be proportion of traffic distribution done by Orchestrator?

- A. 33%/66%
- B. 100%/0%
- C. 50%/50%
- D. 66%/33%

Answer: C

Explanation:

Explanation

The proportion of traffic distribution done by Orchestrator depends on the traffic distribution mode that is configured for the Security Group. There are three modes: Round Robin, Load Sharing, and Active/Standby1.

*Round Robin mode distributes the traffic equally among all the appliances in the Security Group, regardless of the number of downlinks they have. This mode is suitable for scenarios where all the appliances have similar performance and capacity. In this mode, the proportion of traffic distribution would be 50%/50% for two appliances with one and two downlinks respectively.

*Load Sharing mode distributes the traffic proportionally to the number of downlinks each appliance has. This mode is suitable for scenarios where the appliances have different performance and capacity. In this mode, the proportion of traffic distribution would be 33%/66% for two appliances with one and two downlinks respectively.

*Active/Standby mode distributes the traffic to only one appliance at a time, while the other appliances are in standby mode. This mode is suitable for scenarios where high availability is required. In this mode, the proportion of traffic distribution would be 100%/0% or 0%/100% for two appliances with one and two downlinks respectively, depending on which appliance is active. Since the question does not specify the traffic distribution mode, the default mode is Round Robin2.

Therefore, the proportion of traffic distribution would be 50%/50% for two appliances with one and two downlinks respectively.

NEW QUESTION # 46

When a VPN tunnel is formed with a Maestro SGM,

- **A. The MHO handles the IKE before distributing the traffic to a SGM to handle all encrypted traffic. This helps to prevent any issues with the correction layer.**
- B. SGM 1 analyzes the policy and topology. If encryption is required, it calculates the tunnel owner's IP address. SGM 1 sends a clear packet to the tunnel owner. SGM 2 is now the connection and tunnel owner.
- C. The receiving SGM makes an encryption decision. The SGM then syncs the traffic to two backup SGMs: one for clear traffic and one for encrypted traffic.
- D. The MHO distributes copies of the packets to two different SGMs because SGM 1 will handle the clear traffic IKE exchange packets, while SGM2 handles encrypted packets.

Answer: A

Explanation:

Explanation

In scalable security environments, initial IKE (Internet Key Exchange) handling by a central orchestrator before distributing traffic for encryption is a common approach to maintain efficiency and security.

NEW QUESTION # 47

How does HyperSync work in a Dual Site environment?

- A. Each active connection has two local backups (on the local site) and a third backup connection on the second site (remote site.)
- B. Each active connection has a backup connection on the second site (remote site.)
- C. Each active connection has a local backup (on the local site) and a second backup connection on each of the MHOs.
- **D. Each active connection has a local backup (on the local site) and a second backup connection on the second site (remote site.)**

Answer: D

NEW QUESTION # 48

.....

Many candidates know our exam bootcamp materials are valid and enough to help them clear CheckPoint 156-836 exams. But they are afraid that purchasing on internet is not safe, money unsafe and information unsafe. In fact you may worry too much. Online sale is very common. Every year there are thousands of candidates choose our 156-836 Exam Bootcamp materials and pass exam surely. Money is certainly safe. PayPal will guarantee your money and your benefits safe. We have strict information secret system to guarantee that your information is safe too.
