Simplest Format of Salesforce OmniStudio-Developer Exam Practice Materials

There are thousands of customers have passed their OmniStudio-Developer exam successfully and get the related certification. After that, all of their OmniStudio-Developer exam torrents were purchase on our website. In addition to the industry trends, the OmniStudio-Developer test guide is written by lots of past materials' rigorous analyses. The language of our OmniStudio-Developer Study Materials are easy to be understood, only with strict study, we write the latest and the specialized OmniStudio-Developer study materials. We want to provide you with the best service and hope you can be satisfied.

Salesforce OmniStudio platform is a powerful tool that enables organizations to build custom applications and integrations quickly and easily. The platform is designed to be flexible and scalable, allowing developers to build solutions that meet the unique needs of their organization. The OmniStudio-Developer certification exam is designed to ensure that developers have the knowledge and skills necessary to build effective solutions on the platform.

Salesforce OmniStudio-Developer Certification Exam is designed for professionals who specialize in developing and implementing solutions using Salesforce's OmniStudio platform. Salesforce Certified OmniStudio Developer certification is intended for developers who have a strong understanding of Salesforce's development platform, including Apex, Visualforce, and Lightning components, as well as experience with the OmniStudio platform.

Salesforce Certified OmniStudio Developer Sample Questions (Q104-Q109):

NEW QUESTION # 104

Refer to the exhibit below. What JSON from the DRGetContactDetails action would display all six values correctly shown? BlkCases is a Repeat Block, and the names of the elements are the same as the label names without spaces.

The screenshot displays a Salesforce OmniStudio interface. At the top, there is a red icon and the text "DRGetContactsDetails" followed by "DataRaptor Extract Action". Below this is a blue icon and the text "StepContacts" followed by "Step". The main content area is titled "Contact & Case Information". It contains three input fields: "Contact Name", "Contact Phone", and a section titled "Cases" with a dropdown arrow. Under "Cases", there are two input fields: "Case Subject" and "Case Number". A blue "Add" button is to the right of the "Cases" section. At the bottom right, there is a blue "Next" button. A large blue cloud watermark with the word "salesforce" is overlaid on the right side of the interface.

```

    "Cases": [
      {
        "CaseSubject": "Cannot track our order.",
        "CaseNumber": "00001002"
      }, {
        "CaseSubject": "Billing status",
        "CaseNumber": "00001004"
      }
    ],
    "ContactPhone": "(212) 489-8979",
    "ContactName": "Leanne Tomlin"
  }
}

```

- A.

```

{
  "CaseSubject": "Cannot track our order.",
  "CaseNumber": "00001002",
  "CaseSubject": "Billing status",
  "CaseNumber": "00001004",
  "ContactPhone": "(212) 489-8979",
  "ContactName": "Leanne Tomlin"
}

```

- B.

```

{
  "BlkCases": [
    {
      "CaseSubject": "Cannot track our order.",
      "CaseNumber": "00001002"
    }, {
      "CaseSubject": "Billing status",
      "CaseNumber": "00001004"
    }
  ]
  "ContactPhone": "(212) 489-8979",
  "ContactName": "Leanne Tomlin"
}

```

- C.

```

{
  "BlkCases": [
    {
      "Subject": "Cannot track our order.",
      "Number": "00001002"
    }, {
      "Subject": "Billing status",
      "Number": "00001004"
    }
  ]
  "ContactPhone": "(212) 489-8979",
  "ContactName": "Leanne Tomlin"
}

```

- D.

Answer: C

Explanation:

According to the OmniScript Data JSON page, the OmniScript structure JSON defines the data elements and their properties that are used in an OmniScript. The exhibit shows an OmniScript structure JSON with six elements: ContactName, ContactPhone, ContactEmail, CaseNumber, CaseSubject, and CaseStatus. The DRGetContactDetails action is a DataRaptor Extract action that retrieves data from the Contact and Case objects in Salesforce. The BlkCases element is a Repeat Block that displays a list of cases related to the contact. Therefore, the JSON from the DRGetContactDetails action that would display all six values correctly shown is option A, which has the following structure:

```

{
  "ContactName": "Jane Doe",
  "ContactPhone": "(123) 456-7890",
  "ContactEmail": "jane.doe@example.com",
  "BlkCases": [
    {
      "CaseNumber": "00001234",
      "CaseSubject": "Billing Issue",
      "CaseStatus": "New"
    },
    {
      "CaseNumber": "00005678",
      "CaseSubject": "Product Inquiry",
      "CaseStatus": "Closed"
    }
  ]
}

```

The other options have different structures that do not match the OmniScript structure shown.

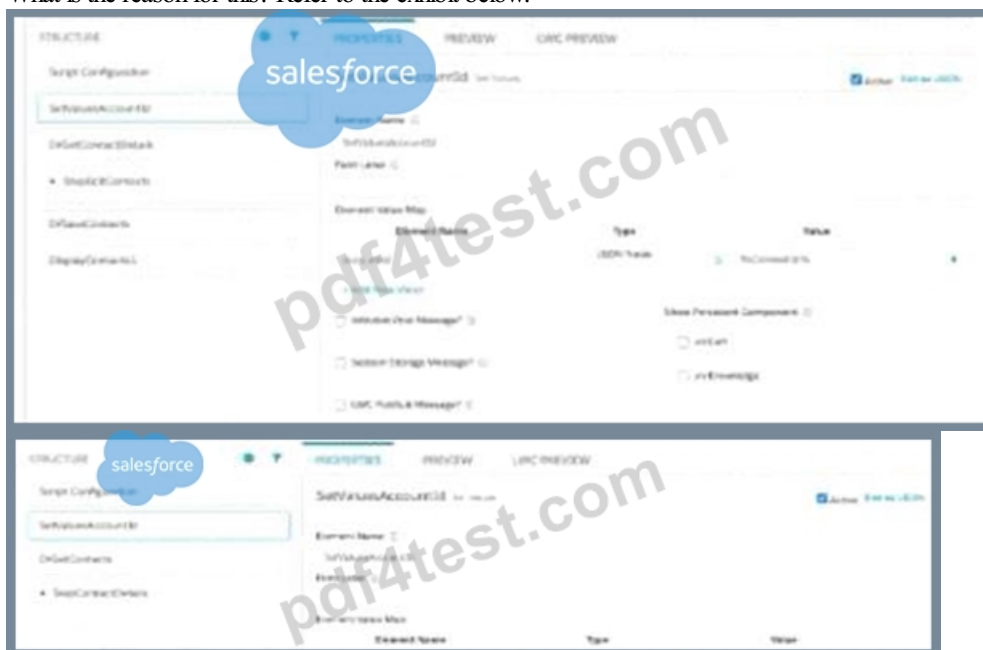

NEW QUESTION # 105

A customer sets up to LWC OmniScripts, one embedded into another. Account is set in a Set Values element in the parent OmniScript.

The AccountId set in the parent OmniScript is used to another Set Values element ContextAccountId in the embedded OmniScript. The embedded OmniScript is activated.

While previewing the OmniScript flow from the parent, it is found that Account is set correctly in the parent OmniScript. However, ContextAccountId in the embedded OmniScript is not set with the AccountId from parent OmniScript. On previewing the embedded OmniScript individually, it is found that ContextAccountId is set correctly.

What is the reason for this? Refer to the exhibit below.

- A. Both parent and embedded OmniScripts have the same element name for the Set values element.
- **B. A developer failed to include a Navigation Element to pass data from the parent OmniScript.**
- C. The LWC PubSub Message flag in the Set Values action of the parent has not been set.
- D. The flag pass Data JSON in the parent OmniScript in not configured correctly.

Answer: B

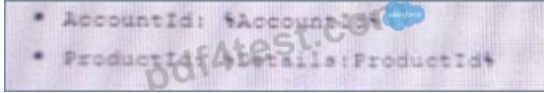

Explanation:

The LWC PubSub Message flag in the Set Values action of the parent OmniScript enables the parent OmniScript to send data to the embedded OmniScript using a custom event. If this flag is not set, the data will not be passed to the embedded OmniScript.

NEW QUESTION # 106

An integration procedure contains a Remote Action element that calls a method of an APEX class. The method requires two fields as input: AccountId and ProductId. The integration Procedure data JSON contains the following nodes:
How should the Remote Action element be configured to pass the data correctly to the method?

- A. Add the following to Send JSON Path: accountId: %%Accountd%% ProductId% Details Products%
- B. Set Return Only Additional Output to true, and add the following Key/Value pairs to additional input.

- C. Check the DataRaptor Transform checkbox, and add the following Key/Value pairs to Output JSON Path:

- D. Check the Send Only Additional Input checkbox, and the following/ value pairs to Additional input:

Answer: B

NEW QUESTION # 107

Refer to the exhibit below. What JSON from the DRGetContactDetails action would display all six values correctly shown? BlkCases is a Repeat Block, and the names of the elements are the same as the label names without spaces.

DRGetContactsDetails
 DataRaptor Extract Action

StepContacts
 Step

Contact & Case Information

Contact Name

Contact Phone

Cases

Case Subject

Case Number

• A.

```

{
  "CaseSubject": "Cannot track our order.",
  "CaseNumber": "00001002",
  "CaseSubject": "Billing status",
  "CaseNumber": "00001004",
  "Contact": "(212) 180-9979",
  "ContactName": "Leanne Tomlin"
}

```

• B.

```

{
  "BikCases": [
    {
      "CaseSubject": "Cannot track our order.",
      "CaseNumber": "00001002"
    },
    {
      "CaseSubject": "Billing status",
      "CaseNumber": "00001004"
    }
  ],
  "Contact": "(212) 180-9979",
  "ContactName": "Leanne Tomlin"
}

```

• C.

• D.

Answer: B

Explanation:

Explanation

According to the OmniScript Data JSON page, the OmniScript structure JSON defines the data elements and their properties that are used in an OmniScript. The exhibit shows an OmniScript structure JSON with six elements: ContactName, ContactPhone, ContactEmail, CaseNumber, CaseSubject, and CaseStatus. The DRGetContactDetails action is a DataRaptor Extract action that retrieves data from the Contact and Case objects in Salesforce. The BlkCases element is a Repeat Block that displays a list of cases related to the contact. Therefore, the JSON from the DRGetContactDetails action that would display all six values correctly shown is option A, which has the following structure:

The other options have different structures that do not match the OmniScript structure shown.

NEW QUESTION # 108

A developer needs to retrieve data from an external system that stores policy data. The external system supports REST APIs to access and update the policies. Due to the volume of the policy data and peak hours of business, calls to the REST APIs sometimes take longer than expected to respond.

The developer creates an Integration Procedure to retrieve the policy data for use in an OmniScript.

Given the external system's known performance issues, which two configurations should be used to implement the call to the external system?

Choose 2 answers

- A. Check the Chain On Step checkbox on the HTTP Action in the Integration Procedure
- B. Configure a Remote action with timeout settings of 120000

- Answer: B,C**
