NEW QUESTION # 83

An engineer is implementing an import operation in Cisco UCS Manager. What is the impact of performing this operation?

- A. An import operation can be scheduled.
- B. A configuration can be imported from a higher release to a lower release.
- C. Only a configuration file that was exported from the same Cisco UCS Manager can be imported.

- D. Information can be modified on the management plane only.

Answer: D

Explanation:

The import function is available for all configuration, system configuration, and logical configuration files. You can perform an import while the system is up and running. An import operation modifies information on the management plane only. Some modifications caused by an import operation, such as a change to a vNIC assigned to a server, can cause a server reboot or other operations that disrupt traffic.
