Get Latest CompTIA CS0-002 Practice Test For Quick Preparation

Our company aimed to provide you with professional team, high quality service and reasonable price on our CS0-002 exam

questions. In order to help most customers solve their problems, our company always insist on putting them first and providing valued service on our CS0-002 training braindump. It has helped so many candidates passed their CS0-002 exam. We deeply believe that the CS0-002 test torrent of our company will help you pass the CS0-002 exam and get your certification successfully in a short time too.

CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q111-Q116):

NEW QUESTION # 111

A security analyst is running a tool against an executable of an unknown source. The Input supplied by the tool to the executable program and the output from the executable are shown below:

Input supplied by tool	Output from executable
asdfnerlajnvjanjkdfnvkjanakjdv	asdfnerlajnvjanjkdfnvkjanakjdv
klrejfkalsdjfklasdjffjladsf892	klrejfkalsdjfklasdjffjladsf892
ADSFQEDVASDASDFASDF;ADFASQWDF	command not found
qscTRGvcaDFcaDCasDC23rdcasdfAS	qscTRGvcaDFcaDCasDC23rdcasdfAS
lqkejfc934ejcjvsad:cmaoiwefasd	lqkejfc934ejcjvsad:cmaoiwefasd

Which of the following should the analyst report after viewing this Information?

- A. Input can be crafted to trigger an Infection attack in the executable
- B. The executable attempted to execute a malicious command
- C. A dynamic library that is needed by the executable a missing
- D. The toot caused a buffer overflow in the executable's memory

Answer: D

Explanation:
A buffer overflow is a type of attack that exploits a vulnerability in an application or program that does not properly check the size or boundaries of an input. A buffer overflow occurs when an attacker supplies more data than the buffer can hold, causing the excess data to overwrite adjacent memory locations. This can result in unpredictable behavior, such as crashes, errors, data corruption, or execution of malicious code2 The tool that the analyst ran against the executable supplied an input that was too long for the buffer allocated by the executable. This caused a buffer overflow in the executable's memory, as indicated by the error message "Segmentation fault (core dumped)".

NEW QUESTION # 112

A small business does not have enough staff in the accounting department to segregate duties. The controller writes the checks for the business and reconciles them against the ledger. To ensure there is no fraud occurring, the business conducts quarterly reviews in which a different officer in the business compares all the cleared checks against the ledger. Which of the following BEST describes this type of control?

- A. Preventive
- B. Detective
- C. Deterrent
- D. Compensating

Answer: D

Explanation:
A compensating control, also called an alternative control, is a mechanism that is put in place to satisfy the requirement for a security measure that is deemed too difficult or impractical to implement at the present time.
"Compensating controls are additional security measures that you take to address a vulnerability without remediating the underlying issue."

NEW QUESTION # 113

An organization has several system that require specific logons Over the past few months, the security analyst has noticed numerous
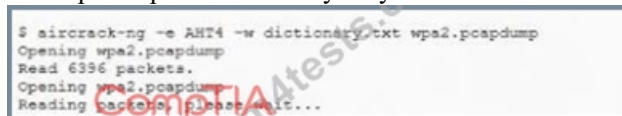

failed logon attempts followed by password resets. Which of the following should the analyst do to reduce the occurrence of legitimate failed logons and password resets?

- A. Implement multifactor authentication
- B. Perform a manual privilege review
- C. Use SSO across all applications
- D. Adjust the current monitoring and logging rules

Answer: B

NEW QUESTION # 114

The help desk provided a security analyst with a screenshot of a user's desktop:

```
$ aircrack-ng -e AHT4 -w dictionary.txt wpa2.pcapdump
Opening wpa2.pcapdump
Read 6396 packets.
Opening wpa2.pcapdump
Reading packets, please wait...
```

For which of the following is aircrack-ng being used?

- A. PCAP data collection
- B. Rainbow attack
- C. Brute-force attack
- D. Wireless access point discovery

Answer: B

NEW QUESTION # 115

An analyst wants to identify hosts that are connecting to the external FTP servers and what, if any, passwords are being used. Which of the following commands should the analyst use?

- A. ftp ftp.server -p 21
- B. tcpdump -X dst port 21
- C. nmap -o ftp.server -p 21
- D. telnet ftp.server 21

Answer: B

NEW QUESTION # 116
......

Our CS0-002 exam material boosts both the high passing rate which is about 98%-100% and the high hit rate to have few difficulties to pass the test. Our CS0-002 exam simulation is compiled based on the resources from the authorized experts' diligent working and the real exam and confer to the past years' exam papers thus they are very practical. The content of the questions and answers of CS0-002 Exam Questions is refined and focuses on the most important information. To let the clients be familiar with the atmosphere and pace of the real CS0-002 exam we provide the function of stimulating the exam.
