The SAFe-Agilest certification exam is based on the latest version of the SAFe framework, which is SAFe 5.1.1. This version of SAFe is designed to help organizations implement agile and lean practices at scale. The SAFe-Agilest Certification Exam covers a wide range of topics, including agile and lean principles, SAFe implementation, team and program execution, and leadership skills.

Scaled Agile SAFe 6 Agilist - Leading SAFe (SA) (6.0) Sample Questions (Q81-Q86):

NEW QUESTION # 81

What is one key purpose of DevOps?

- A. DevOps joins development and operations to enable continuous delivery
- B. DevOps focuses on a set of practices applied to large systems
- C. DevOps focuses on automating the delivery pipeline to reduce transaction cost
- D. DevOps enables continuous release by building a scalable Continuous Delivery Pipeline

Answer: A

NEW QUESTION # 82

What is one example of differentiating business objectives?

- A. Strategic Themes
- B. Enterprise Goals
- C. Solution Intent
- D. Portfolio Vision

Answer: A

Explanation:

Strategic themes are an example of differentiating business objectives. Strategic themes are specific, itemized business objectives that connect a portfolio to the enterprise strategy. Strategic themes provide guidance and direction for portfolio vision, budget allocation, value stream identification, epic prioritization, and metric definition. Strategic themes help differentiate a portfolio from its competitors and create a unique value proposition for its customers. References: SAFe Portfolio, Strategic Themes

NEW QUESTION # 83

Which statement is a value from the Agile Manifesto?

- A. Customer collaboration over a constant indefinite pace
- B. Customer collaboration over contract negotiation
- C. Customer collaboration over Feature negotiation
- D. Customer collaboration over ongoing internal conversation

Answer: B

Explanation:

This statement is one of the values from the Agile Manifesto. The Agile Manifesto is a declaration of four values and twelve principles that guide Agile software development. The four values are: individuals and interactions over processes and tools; working software over comprehensive documentation; customer collaboration over contract negotiation; and responding to change over following a plan. Customer collaboration over contract negotiation means that Agile teams value building strong relationships with their customers based on trust, feedback, and shared understanding, rather than relying on rigid contracts that limit flexibility and creativity. References: Thriving in the Digital Age, Agile Manifesto

NEW QUESTION # 84

Which implementation step follows Coach ART Execution on the SAFe Implementation Roadmap?

- A. Train Executives, Leaders, and Managers
- B. Accelerate
- C. Launch more ARTs and Value Streams
- D. Organize Around Value

Answer: C

Explanation:

Explanation

Launching more ARTs and Value Streams is the implementation step that follows Coach ART Execution on the SAFe Implementation Roadmap. The SAFe Implementation Roadmap is a guide that helps enterprises implement SAFe in a structured and reliable way. The roadmap consists of 12 critical moves that span from reaching the tipping point to extending to the portfolio and beyond. Coach ART Execution is the seventh move, where the first ART is launched and coached by a SAFe Program Consultant (SPC) or other expert.

Launch more ARTs and Value Streams is the eighth move, where the enterprise expands the implementation of SAFe to other value streams and ARTs, based on the learnings and successes of the first ART. References:

SAFe Implementation Roadmap, Coach ART Execution, Launch more ARTs and Value Streams

NEW QUESTION # 85

What triggers the need for a Value Stream?

- A. Spike request
- B. Epic request
- C. User Story request
- D. Feature request

Answer: D

Explanation:

According to the SAFe Agilist 6.0 domain of Lean Thinking, a value stream is triggered by a demand for some value, such as a new feature, a change request, or a defect fix1. A feature is a service that fulfills a stakeholder need2. Therefore, a feature request is a valid trigger for a value stream

A spike request is a type of exploration enabler that addresses technical uncertainty or risk3. A user story request is a type of backlog item that represents an end user goal or function4. These are not triggers for a value stream, but rather work items that flow through a value stream
