H13-321_V2.0-ENU Test Braindumps & H13-321_V2.0-ENU Exam Simulator Fee

We have the H13-321_V2.0-ENU Questions and answers with high accuracy and timely update. Our professional team checks H13-321_V2.0-ENU answers and questions carefully with their professional knowledge. We also have the latest information about the exam center, and will update the version according to the new requirements. Pass guarantee and money back guarantee are also our principles, and if you have any questions, you can also consult the service staff.

One of the main goals of the Huawei H13-321_V2.0 (HCIP-AI-EI Developer V2.0) Exam is to help developers gain a deep understanding of Huawei's AI and EI technologies and how they can be used to solve real-world problems. H13-321_V2.0-ENU exam is designed to be challenging, but also highly rewarding for those who pass. By passing the exam, developers can demonstrate their proficiency in working with these technologies and can become certified experts in the field.

Huawei H13-321_V2.0 certification exam validates the candidate's knowledge and skill level in developing AI solutions using the Huawei Cloud EI platform, which is a cornerstone of the Huawei Cloud ecosystem. It shows that the individual is capable of building and deploying advanced AI applications that can leverage the full capabilities of Huawei's AI technology stack. H13-321_V2.0-ENU Exam is suitable for developers, architects, and engineers who work with AI and want to specialize in Huawei's AI technologies.

Huawei HCIP-AI-EI Developer V2.0 Sample Questions (Q420-Q425):

NEW QUESTION # 420

Use OpenCV to directly mirror the image. Complete the following horizontal mirror code: `im_flip = cv2.flip(im, 0)`

Answer:

Explanation:

1

NEW QUESTION # 421

Which hardware is supported by ModelArts? (Multiple choice)

- A. GPU
- B. All of the above
- C. CPU
- D. Huawei self-developed Ascend AI chip

Answer: A,B,C,D

NEW QUESTION # 422

Regarding Gaussian mixture model, which of the following statements is correct? (Multiple choice)

- A. Gaussian mixture model can use EM algorithm to learn model parameters
- B. Gaussian mixture model is a linear combination of multiple single Gaussian models
- C. The number of sub-models K of the Gaussian mixture model needs to be given in advance
- D. Gaussian mixture model can theoretically simulate any form of distribution

Answer: A,B,C,D

NEW QUESTION # 423

When using ModelArts automatic learning to build image classification or object detection projects, which of the following image formats does the dataset not support?

- A. webp
- B. bmp
- C. png
- D. jpg

Answer: A

NEW QUESTION # 424

What is the usage process of ModelArts automatic learning?

- A. Data annotation -> model training -> deployment
- B. Data annotation -> deployment -> model training
- C. Model training -> data annotation -> deployment
- D. Deployment -> Model training -> Data labeling

Answer: A

NEW QUESTION # 425
