

Free PDF 2025 H19-301_V4.0: High Hit-Rate HCSA-Presales-IP Network V4.0 Study Materials Review

What's more, part of that PrepAwayETE H19-301_V4.0 dumps now are free: https://drive.google.com/open?id=1OTOGzBD5KPBCtBrN0s5__xRiuqTLDwl7

In recent years, our H19-301_V4.0 Test Torrent has been well received and have reached 99% pass rate with all our dedication. As a powerful tool for a lot of workers to walk forward a higher self-improvement, our H19-301_V4.0 certification training continue to pursue our passion for advanced performance and human-centric technology. As a matter of fact, our company takes account of every client's difficulties with fitting solutions. As long as you need help, we will offer instant support to deal with any of your problems about our HCSA-Presales-IP Network V4.0 guide torrent. Any time is available; our responsible staff will be pleased to answer your questions.

Customizable practice tests comprehensively and accurately represent the actual Professional Huawei H19-301_V4.0 Certification Exam pattern. Many students have studied from product and passed the HCSA-Presales-IP Network V4.0 (H19-301_V4.0) test with ease. Our customers can receive questions updates for up to 1 year after purchasing the product. These free updates of questions will help them to prepare according to the latest syllabus.

Exam Huawei H19-301_V4.0 Flashcards & H19-301_V4.0 New Questions

There is always a fear of losing H19-301_V4.0 exam and causes you loss of money and waste time on some unless materials. However, these risks will never exist in our H19-301_V4.0 exam materials. Your money and exam attempt is bound to award you a sure and definite success with 100% money back guarantee. You can claim for the refund of money if you do not succeed and achieve your target. Our H19-301_V4.0 exam materials have a most reliable guarantee. We ensure you that you will be paid back in full without any deduction and you can easily pass the H19-301_V4.0 Exam by using our H19-301_V4.0 dumps. Moreover, you will get all the updated H19-301_V4.0 questions with verified answers. If you want to prepare yourself for the real exam, then it is one of the most effect ways to improve your H19-301_V4.0 exam preparation level.

Huawei HCSA-Presales-IP Network V4.0 Sample Questions (Q58-Q63):

NEW QUESTION # 58

Huawei's data center network solution boasts ultra-stable and reliable core capabilities. Built on the open programmability platform AOC, it enables end-to-end deployment across clouds and vendors, with cross- cloud services going live in minutes. In collaboration with Ascend, the Huawei solution allows for plug-and- play network deployment and same-day delivery.

- A. True
- B. False

Answer: A

Explanation:

Huawei's CloudFabric 3.0 solution for data center networks:

Leverages AOC (Application-Oriented Cloud-network) for open programmability Enables cross-cloud, multi-vendor interoperability Supports minute-level deployment of cross-cloud services Works with Ascend AI chips and platforms to support AI-native networking, including plug-and-play and same-day delivery These capabilities are officially highlighted in Huawei's DCN solution documentation.

NEW QUESTION # 59

Which of the following technologies implements inter-device link aggregation, and can be used to build an active-active system to provide traffic load balancing and backup protection?

- A. Stack
- **B. M-LAG**
- C. LLDP
- D. Eth-Trunk

Answer: B

Explanation:

M-LAG (Multi-Chassis Link Aggregation Group) is a technology that implements link aggregation across two or more independent physical devices (i.e., switches).

It enables downstream devices (such as servers or switches) to connect to two upstream devices as if they were one logical device.

This allows for:

Active-active forwarding (traffic load balancing)

Device-level redundancy (if one upstream device fails, the other continues forwarding traffic) Eth-Trunk refers to link aggregation but generally within a single device.

Stack creates a logical switch from multiple physical switches, but it does not address inter-device aggregation in the same distributed manner as M-LAG.

LLDP (Link Layer Discovery Protocol) is a Layer 2 protocol for device discovery and has no role in link aggregation.

NEW QUESTION # 60

Which of the following statements are true about the highlights of CloudEngine S12700E series switches?

- **A. Ultra-large buffer and HQoS scheduling, ensuring user experience of key applications**
- **B. Control and switching separation architecture, enabling on-demand configuration and flexible capacity expansion**
- **C. Redundancy design for key components, providing 99.999% reliability**
- **D. 4.8 Tbps/slot super forwarding, building a high-speed channel for Wi-Fi 6**

Answer: A,B,C,D

Explanation:

Huawei's CloudEngine S12700E series is a high-end campus core switch series with the following highlights:

A: Control and switching separation: Improves scalability and flexibility B: 4.8 Tbps/slot forwarding: Provides high-speed backbone for Wi-Fi 6/6E traffic C: Redundancy design: Includes power supplies, fans, and control boards with carrier-grade reliability (99.999%) D: Ultra-large buffer & HQoS: Guarantees traffic for video conferencing, VoIP, and mission-critical services All listed features are core strengths of this switch family.

NEW QUESTION # 61

Which of the following are the highlights of Huawei CloudEngine S16700 series switches? (Select all that apply)

- A. Ultra-high reliability: dual-input power supply
- B. M-LAG for zero service interruptions during upgrade
- C. All-new architecture: backplane-free orthogonal architecture, improving switching capacity by 50%
- D. Ultra-large capacity: 4.8 Tbps per slot, scalable to 14.4 Tbps in the future

Answer: B,C,D

Explanation:

Huawei CloudEngine S16700 is a next-gen modular core switch for large campus networks. Its key features include:

Ultra-large capacity: Each slot supports up to 4.8 Tbps throughput and can be scaled up to 14.4 Tbps (Option A - True)

Backplane-free orthogonal architecture: Significantly enhances switching efficiency and simplifies cooling (Option B - True) M-LAG support: Enables in-service software upgrades and link-level redundancy (Option D - True) However, while dual-input power supplies are standard, this alone is not highlighted as an "ultra-high reliability" feature in Huawei documentation (Option C - Not a core highlight).

#####

NEW QUESTION # 62

Which of the following are the three levels of high reliability provided by Huawei's Xinghe Intelligent Ultra- Resilient Multi-DC Network Solution? (Select all that Apply)

- A. Network-level high reliability with zero impact on services
- B. High O&M reliability with hour-level fault locating
- C. Device-level high reliability with zero data loss
- D. Link-level high reliability with zero traffic interruption

Answer: A,C,D

Explanation:

Huawei's Xinghe Multi-DC Network Solution provides three levels of ultra-high reliability:

A: Device-level high reliability: Achieves zero data loss through component redundancy C: Network-level high reliability: Ensures no service disruption even during faults or upgrades D: Link-level high reliability: Uses intelligent rerouting to prevent traffic interruption B: High O&M reliability with hour-level fault locating is not listed as a core reliability tier; Huawei emphasizes minute-level AI-driven fault detection instead.

NEW QUESTION # 63

.....

Dear everyone, are you still confused about the H19-301_V4.0 exam test. Do you still worry about where to find the best valid Huawei H19-301_V4.0 exam cram? Please do not search with aimless. PrepAwayETE will drag you out from the difficulties. All the questions are edited based on lots of the data analysis by our IT experts, so the authority and validity of Huawei H19-301_V4.0 Practice Test are without any doubt. Besides, H19-301_V4.0 training dumps cover almost the key points, which can ensure you pass the actual test with ease. Dear, do not hesitate anymore. Choose our PrepAwayETE Huawei exam training test, you can must success.
