SAP C_S4EWM_2023 Best Preparation Materials & Latest C_S4EWM_2023 Exam Practice

The SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C_S4EWM_2023) dumps PDF file can be used from any location and at any time. Furthermore, you can take print of SAP Questions PDF to do an off-screen study. The web-based C_S4EWM_2023 practice exam can be taken via the internet from any browser like Firefox, Safari, Opera, MS Edge, Internet Explorer, and Chrome. You don't need to install any excessive plugins and software to take this SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C_S4EWM_2023) practice test.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q52-Q57):

NEW QUESTION # 52

What is the stock in the warehouse assigned to? Note: There are 2 correct answers to this question.

- **A. Owner**
- B. Resource
- C. Shipping point
- **D. Party entitled to dispose**

Answer: A,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Stock in SAP EWM is assigned ownership attributes. Option B ("Owner") is correct as it identifies the stock's legal owner (e.g., company), and option D ("Party entitled to dispose") is correct because it specifies who can manage the stock (e.g., a customer), both maintained in the product master and stock data. Option A (resource) is temporary during handling, and option C (shipping point) is ERP-specific, not EWM stock assignment.

NEW QUESTION # 53

Your customer receives batch-relevant material in the warehouse. When do you have to create a batch?

- A. Before the goods receipt is posted in SAP EWM
- B. Before the warehouse task is created in SAP EWM
- **C. Before the inbound delivery is distributed from SAP ERP to SAP EWM**
- D. Before the inbound delivery is created in SAP EWM

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

For batch-managed materials, the batch must exist before processing begins. Option A ("Before the inbound delivery is distributed from SAP ERP to SAP EWM") is correct because the batch is created in ERP (e.g., via MIGO or material master) and included in the inbound delivery before distribution to EWM via qRFC.

Options B, C, and D occur too late in the process as the batch must already be specified in the inbound delivery.

NEW QUESTION # 54

What do you require for the use of Yard Management? Note: There are 2 correct answers to this question.

- **A. Doors**
- B. Resources
- C. Checkpoints
- **D. Vehicles**

Answer: A,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Yard Management in SAP EWM tracks vehicle movements. Option A ("Doors") is correct as they connect the yard to the warehouse, and option B ("Vehicles") is correct as they are the objects managed, both configured in SPRO: SCM Extended Warehouse Management > Yard Management. Option C (resources) is warehouse-specific, and option D (checkpoints) is

optional, not mandatory.

NEW QUESTION # 55

For which processes can you create a direct outbound delivery order? Note: There are 3 correct answers to this question.

- A. Replenishment
- B. Issue to cost center
- C. Direct sales
- D. Inventory difference
- E. Scrapping

Answer: B,C,E

Explanation:

A direct outbound delivery order is created for scenarios where goods are directly moved out of the warehouse without standard intermediate steps. The applicable processes include:

- * A. Scrapping:
* Used to dispose of damaged or obsolete stock directly from the warehouse.
- * D. Issue to Cost Center:
* Materials issued for internal consumption or to a specific cost center.
- * E. Direct Sales:
* Goods sold directly from the warehouse to customers, bypassing typical outbound processing.

Incorrect Options:

- * B: Replenishment involves internal movements and does not create outbound delivery orders.
- * C: Inventory differences are adjusted during inventory procedures, not via outbound deliveries.

References:

- * SAP Help Portal: Direct Outbound Delivery Order Scenarios
- * SAP EWM Documentation: Outbound Delivery Order Processing

NEW QUESTION # 56

What can you do with a hot-spot in the warehouse management monitor?

- A. Change from the list view to the form view of the selected object
- B. Call a method to perform actions on the selected object
- C. Call the corresponding user interface on the selected object
- D. Create a basic measurement service

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Hotspots in the SAP EWM warehouse management monitor (/SCWM/MON) are interactive links on objects (e.g., warehouse tasks, bins). Option A ("Call the corresponding user interface on the selected object") is correct because clicking a hotspot navigates to the detailed UI for that object (e.g., warehouse task details).

Options B, C, and D are incorrect: methods are executed via actions, not hotspots (B); view changes are manual (C); and measurement services are configured separately (D).

NEW QUESTION # 57

.....

From the moment you first touch C_S4EWM_2023 simulating exam, you can feel the sense of security we are trying to bring you. You are not only the user of C_S4EWM_2023 training prep, but also our family and friends.
