

Free PDF 2025 Microsoft DP-700: Implementing Data Engineering Solutions Using Microsoft Fabric–High-quality Free Exam

BTW, DOWNLOAD part of ExamsLabs DP-700 dumps from Cloud Storage: <https://drive.google.com/open?id=1ISuqLU76FylWksD8apCd3af0yNawvnbh>

DP-700 practice materials stand the test of time and harsh market, convey their sense of proficiency with passing rate up to 98 to 100 percent. They are 100 percent guaranteed DP-700 practice materials. And our content of them are based on real exam by whittling down superfluous knowledge without delinquent mistakes. Our DP-700 practice materials comprise of a number of academic questions for your practice, which are interlinked and helpful for your exam. So their perfection is unquestionable.

Microsoft DP-700 Exam Syllabus Topics:

Topic	Details
Topic 1	Implement and manage an analytics solution: This section of the exam measures the skills of Microsoft Data Analysts regarding configuring various workspace settings in Microsoft Fabric. It focuses on setting up Microsoft Fabric workspaces, including Spark and domain workspace configurations, as well as implementing lifecycle management and version control. One skill to be measured is creating deployment pipelines for analytics solutions.
Topic 2	Monitor and optimize an analytics solution: This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.
Topic 3	Ingest and transform data: This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.

DP-700 Valid Vce & Reliable DP-700 Exam Pdf

When you know you will enjoy one year free update after purchase, you may consider how to get the latest Microsoft DP-700 exam torrent. Here, we will tell you, the ExamsLabs system will send the update DP-700 exam dumps to you automatically. You can pay attention to your payment email. If you find there is update and do not find any update email, do not worry, you can check your spam. If there is still not, please contact us by email or online chat. Besides, if you have any questions about Microsoft DP-700,

please contact us at any time. Our 7/24 customer service will be always at your side and solve your problem at once.

Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q85-Q90):

NEW QUESTION # 85

What should you do to optimize the query experience for the business users?

- A. Introduce primary keys.
- B. Enable V-Order.
- C. Run the VACUUM command.
- D. Create and update statistics.

Answer: D

NEW QUESTION # 86

You are building a data loading pattern by using a Fabric data pipeline. The source is an Azure SQL database that contains 25 tables. The destination is a lakehouse.

In a warehouse, you create a control table named Control.Object as shown in the exhibit. (Click the Exhibit tab.) You need to build a data pipeline that will support the dynamic ingestion of the tables listed in the control table by using a single execution. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
⋮ Add a Get metadata activity to query Control.Object and generate a list of schemas and tables to copy.	
⋮ Add an Until activity to iterate over the list of tables and copy the source data to the lakehouse Delta tables.	
⋮ Add a Lookup activity to query Control.Object and generate a list of the schemas and tables to copy.	
⋮ Add a ForEach activity to iterate over the list of tables and copy the source data to the lakehouse Delta tables.	
⋮ Add a Copy data activity as an inner activity to the iterator activity.	

Answer:

Explanation:

Actions	Answer Area
⋮ Add a Get metadata activity to query Control.Object and generate a list of schemas and tables to copy.	⋮ Add a Lookup activity to query Control.Object and generate a list of the schemas and tables to copy.
⋮ Add an Until activity to iterate over the list of tables and copy the source data to the lakehouse Delta tables.	⋮ Add a ForEach activity to iterate over the list of tables and copy the source data to the lakehouse Delta tables.
⋮ Add a Lookup activity to query Control.Object and generate a list of the schemas and tables to copy.	⋮ Add a Copy data activity as an inner activity to the iterator activity.
⋮ Add a ForEach activity to iterate over the list of tables and copy the source data to the lakehouse Delta tables.	
⋮ Add a Copy data activity as an inner activity to the iterator activity.	

NEW QUESTION # 87

Your company has three newly created data engineering teams named Team1, Team2, and Team3 that plan to use Fabric. The teams have the following personas:

- * Team1 consists of members who currently use Microsoft Power BI. The team wants to transform data by using a low-code approach.
- * Team2 consists of members that have a background in Python programming. The team wants to use PySpark code to transform data.
- * Team3 consists of members who currently use Azure Data Factory. The team wants to move data between source and sink

environments by using the least amount of effort.

You need to recommend tools for the teams based on their current personas.

What should you recommend for each team? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

 Microsoft

Team1: Dataflow Gen2 dataflows
Data pipelines
Notebooks
Dataflow Gen2 dataflows

Team2: Notebooks
Data pipelines
Notebooks
Dataflow Gen2 dataflows

Team3: Data pipelines
Data pipelines
Notebooks
Dataflow Gen2 dataflows

Answer:

Explanation:

Answer Area

Team1: Dataflow Gen2 dataflows
Data pipelines
Notebooks
Dataflow Gen2 dataflows

Team2: Notebooks
Data pipelines
Notebooks
Dataflow Gen2 dataflows

Team3: Data pipelines
Data pipelines
Notebooks
Dataflow Gen2 dataflows

Explanation:

Answer Area

 Microsoft

Team1: Dataflow Gen2 dataflows

Team2: Notebooks

Team3: Data pipelines

NEW QUESTION # 88

You have a Fabric F32 capacity that contains a workspace. The workspace contains a warehouse named DW1 that is modelled by using MD5 hash surrogate keys.

DW1 contains a single fact table that has grown from 200 million rows to 500 million rows during the past year. You have Microsoft Power BI reports that are based on Direct Lake. The reports show year-over-year values. Users report that the performance of some of the reports has degraded over time and some visuals show errors. You need to resolve the performance issues. The solution must meet the following requirements:

- Provide the best query performance.
- Minimize operational costs.

Which should you do?

- **A. Create views.**
- B. Change the MD5 hash to SHA256.
- C. Modify the surrogate keys to use a different data type.
- D. Increase the capacity. C Enable V-Order

Answer: A

Explanation:

In this case, the key issue causing performance degradation likely stems from the use of MD5 hash surrogate keys. MD5 hashes are 128-bit values, which can be inefficient for large datasets like the 500 million rows in your fact table. Using a more efficient data type for surrogate keys (such as integer or bigint) would reduce the storage and processing overhead, leading to better query performance. This approach will improve performance while minimizing operational costs because it reduces the complexity of querying and indexing, as smaller data types are generally faster and more efficient to process.

NEW QUESTION # 89

You have an Azure key vault named KeyVault1 that contains secrets.

You have a Fabric workspace named Workspace-!. Workspace! contains a notebook named Notebook1 that performs the following tasks:

- * Loads stage data to the target tables in a lakehouse
- * Triggers the refresh of a semantic model

You plan to add functionality to Notebook1 that will use the Fabric API to monitor the semantic model refreshes. You need to retrieve the registered application ID and secret from KeyVault1 to generate the authentication token.

Solution: You use the following code segment:

Use notebookutils.credentials.getSecret and specify the key vault URL and key vault secret. Does this meet the goal?

- **A. Yes**
- B. No

Answer: A

NEW QUESTION # 90

.....

Trying before buying DP-700 exam braindumps can help you have a deeper understanding of what you are going to buy. We offer you free demo for you to have a try, and you can know what the complete version is like through the free demo. Moreover, DP-700 exam braindumps are high quality and accuracy, and you can use them at ease. We have online and offline service for you, and they possess the professional knowledge for DP-700 Exam Materials, and if you have any questions, you can contact with us, and we will give you reply as soon as we can.
