We know high efficient AZ-140 practice materials play crucial roles in your review. Our experts also collect with the newest contents of AZ-140 Study Guide and have been researching where the exam trend is heading and what it really want to examine you.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q244-Q249):

NEW QUESTION # 244

You have an Azure subscription that contains the storage accounts shown in the following table.

Name	Performance	Type
storage1	Standard	General purpose v2
storage2	Premium	BlockBlobStorage
storage3	Premium	Page blobs
storage4	Premium	FileStorage

You have a custom generalized Windows 10 image.

You plan to deploy an Azure Virtual Desktop host pool that will use the custom image and FSLogix profile containers.

You need to recommend which storage accounts to use for the custom image and the profile containers. The solution must meet the following requirements:

Minimize costs to store the image.

Maximize performance of the profile containers.

Which account should you recommend for each type of content? To answer, drag the appropriate accounts to the correct content type. Each account may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 245

You have an Azure virtual machine named VM1 that runs Windows 10 Enterprise multi-session.

You plan to add language packs to VM1 and create a custom image of VM1 for a Windows Virtual Desktop host pool.

You need to ensure that modern apps can use the additional language packs when you deploy session hosts by using the custom image.

Which command should you run first? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

-TaskPath "\\Microsoft\Windows\AppxDeploymentClient\" -TaskName

Disable-ScheduledTask	"License Validation"
Enable-ScheduledTask	"Pre-staged app cleanup"
New-ScheduledTask	"RemoteFXvGPUDisableTask"
Start-AppBackgroundTask	

Answer:

Explanation:

-TaskPath "\\Microsoft\Windows\AppxDeploymentClient\" -TaskName

Disable-ScheduledTask	"License Validation"
Enable-ScheduledTask	"Pre-staged app cleanup"
New-ScheduledTask	"RemoteFXvGPUDisableTask"
Start-AppBackgroundTask

NEW QUESTION # 246

You need to configure a conditional access policy to meet the authentication requirements.

What should you include in the policy configuration? To answer, select the appropriate options in the answer area.

NOTE Each correct selection is worth one point.

Answer Area

Set Cloud apps or actions to include:

- Azure Virtual Desktop
- Azure Virtual Desktop Azure Resource Manager Provider
- Azure Virtual Desktop Client

Set Session controls to include:

- Persistent browser session
- Sign-in frequency
- Use app enforced restrictions

Microsoft

Answer:

Azure Virtual Desktop Client

Set Session controls to include:

Persistent browser session
Sign-in frequency
Use app enforced restrictions

NEW QUESTION # 247

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have the following:

- * A Microsoft 365 E5 tenant
- * An on-premises Active Directory domain
- * A hybrid Azure Active Directory (Azure AD) tenant
- * An Azure Active Directory Domain Services (Azure AD DS) managed domain
- * An Azure Virtual Desktop deployment

The Azure Virtual Desktop deployment contains personal desktops that are hybrid joined to the on-premises domain and enrolled in Microsoft Intune.

You need to configure the security settings for the Microsoft Edge browsers on the personal desktops.

Solution: You configure a compliance policy in Intune.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Explanation

You need to configure a Configuration Profile in Intune or use Group Policy.

NEW QUESTION # 248

-

You have an Azure Virtual Desktop deployment that contains the resources shown in the following table.

Name	Description
Pool1	Personal host pool
Host1	Windows 11 session host in Pool1
Host2	Windows 11 session host in Pool1
AG1	RemoteApp app group that contains an app named App1
WS1	Workspace that publishes AG1

You need to perform the following configurations:

- * Enable a managed identity for App1.

- * Enable Clipboard redirection for App1.

On which resources should you perform the configurations? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Managed identity:

☐ AG1

☐ Host1 and Host2

☐ Pool1

☐ WS1

Clipboard redirection:

☐ AG1

☐ Host1 and Host2

☐ Pool1

☐ WS1

Answer:
