## Free PL-400 Exam Dumps & PL-400 Reliable Test Simulator

Since it is obvious that different people have different preferences, we have prepared three kinds of different versions of our PL-400 practice test, PDF, Online App and software version. Last but not least, our customers can accumulate PL-400 exam experience as well as improving their exam skills in the mock exam. What's more, our software version of PL-400 practice materials can best simulate the real exam, but it can only be operated under the Windows operation system. I strongly believe that you can find the version you want in multiple choices of our PL-400 practice test.

## Microsoft Power Platform Developer Sample Questions (Q357-Q362):

### NEW QUESTION # 357

You are creating a model-driven app.

Users need to see only the entities in the app navigation that are relevant to their role and their method of accessing the app.

You need to restrict entities on the sub-areas in the SiteMap.

Which properties should you use? To answer, drag the appropriate properties to the correct requirements. Each property may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

## Answer Area

### Properties

### Requirement

### Property

Client	Ensure that the entity is visible only if the user can create records.	
Offline Availability	Ensure that the entity is not visible if the user is using an on-premises deployment.	
Privileges	Ensure that the entity is visible only if the user is accessing the app with a web browser.	
SKUs		

Answer:

Explanation:

## Answer Area

### Properties

### Requirement

### Property

Client	Ensure that the entity is visible only if the user can create records.	Privileges
Offline Availability	Ensure that the entity is not visible if the user is using an on-premises deployment.	SKUs
Privileges	Ensure that the entity is visible only if the user is accessing the app with a web browser.	Client
SKUs		

Explanation

Properties	Requirement	Property
Client	Ensure that the entity is visible only if the user can create records.	Privileges
Offline Availability	Ensure that the entity is not visible if the user is using an on-premises deployment.	SKUs
Privileges	Ensure that the entity is visible only if the user is accessing the app with a web browser.	Client
SKUs		

Box 1: Privileges

Privileges: This defines whether a subarea is displayed based on privileges available in any security roles that are assigned to the user.

Box 2: SKU

SKUs: Select the versions of Dynamics 365 that display this subarea.

Box 3: Client

Client: Select the type of client that displays this subarea.

## NEW QUESTION # 358

A travel company has a Common Data Service (CDS) environment.

The company requires the following:

- \* Custom entities that track which countries/regions their clients have traveled.
- \* The dates their clients traveled to these countries/regions.

You need to create the entities and relationships to meet the requirements.

Which three actions should perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct order you select.

### Actions

On the main form for ContactCountry, add the lookup fields for the Contact and Country, and a date field for the visit date.

Create a 1:N relationship from Contact to the Country entity.

Create a N:N relationship from Contact to the Country entity.

Create a 1:N relationship from ContactCountry intersect entity and Country.

Create the Country entity.

On the main form for ContactCountry, add a sub grid to view the country information.

Create an intersect entity named ContactCountry and create two N:1 relationships to Contact and Country.

Create an intersect entity named ContactCountry and create two 1:N relationships to Contact and Country.

### Answer Area

### Answer:

#### Explanation:

### Actions

On the main form for ContactCountry, add the lookup fields for the Contact and Country, and a date field for the visit date.

Create a 1:N relationship from Contact to the Country entity.

Create a N:N relationship from Contact to the Country entity.

Create a 1:N relationship from ContactCountry intersect entity and Country.

Create the Country entity.

On the main form for ContactCountry, add a sub grid to view the country information.

Create an intersect entity named ContactCountry and create two N:1 relationships to Contact and Country.

Create an intersect entity named ContactCountry and create two 1:N relationships to Contact and Country.

### Answer Area

Create the Country entity.

Create a 1:N relationship from Contact to the Country entity.

On the main form for ContactCountry, add a sub grid to view the country information.

#### Explanation

Create the Country entity.

Create a 1:N relationship from Contact to the Country entity.

On the main form for ContactCountry, add a sub grid to view the country information.

You can configure a sub-grid on a form to display a list of records or a chart.

### NEW QUESTION # 359

A company is configuring Microsoft Power Virtual Agents and Power Automate flows that use model-driven apps. The company has a website that uses Power Pages. You create Power Virtual Agents bot topics. You must configure the following:

- \* Use a bot on the website.
- \* Create Bot Framework skills.
- \* Create a support request from the bot without human interaction.

You need to configure the website.

Which applications should you configure?

To answer, drag the appropriate applications to the correct requirements. Each application may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Applications	Requirement	Application
Power Virtual Agents	Use a bot on the website.	
Power Pages	Create Bot Framework skills.	
Power Automate	Create support request from the bot.	
Power App		

**Answer:**

Explanation:

Applications	Requirement	Application
Power Virtual Agents	Use a bot on the website.	Power Pages
Power Pages	Create Bot Framework skills.	Power App
Power Automate	Create support request from the bot.	Power Virtual Agents
Power App		

Explanation:

Applications	Requirement	Application
Power Virtual Agents	Use a bot on the website.	Power Pages
Power Pages	Create Bot Framework skills.	Power App
Power Automate	Create support request from the bot.	Power Virtual Agents
Power App		

### NEW QUESTION # 360

You are developing a Power Platform solution.

You must add a custom control slider to a specific step in a business process flow.

You need to add the custom control.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Action	Answer area
Import customizations into the Microsoft Dataverse environment.	
Modify columns in the default solution.	
Create a Power Automate flow to activate the custom controls.	
Generate and export the business process flow form.	
Configure custom controls on a related entity form.	
Copy custom control configurations to the FormXML for the business process flow.	

**Answer:**

Explanation:

Action	Answer area
Import customizations into the Microsoft Dataverse environment.	Configure custom controls on a related entity form.
Modify columns in the default solution.	Generate and export the business process flow form.
Create a Power Automate flow to activate the custom controls.	Copy custom control configurations to the FormXML for the business process flow.
Generate and export the business process flow form.	Import customizations into the Microsoft Dataverse environment.
Configure custom controls on a related entity form.	
Copy custom control configurations to the FormXML for the business process flow.	

Explanation

Graphical user interface, text, application, email Description automatically generated

Configure custom controls on a related entity form.
Generate and export the business process flow form.
Copy custom control configurations to the FormXML for the business process flow.
Import customizations into the Microsoft Dataverse environment.

Here are the steps you must follow to add custom controls to a business process flow:

Step 1: Configure custom controls on a related entity.

Step 2: Generate and exporting the business process flow form.

Step 3: Copy custom control configurations to the FormXML for the business process flow.

Step 4: Import customizations into the Microsoft Dataverse environment.

Note:

Configure custom controls on a related table form.

Generate and exporting the business process flow form.

Copy custom control configurations to the business process flow form from the related table form.

Import the customizations back into Microsoft Dataverse.
