High Pass-Rate Latest SC-400 Test Fee | 100% Free SC-400 Exam Guide

If you are curious or doubtful about the proficiency of our SC-400 preparation quiz, we can explain the painstakingly word we did behind the light. By abstracting most useful content into the SC-400 exam materials, they have helped former customers gain success easily and smoothly. The most important part is that all contents were being sifted with diligent attention. No errors or mistakes will be found within our SC-400 Study Guide.

Microsoft SC-400 Exam is designed to assess the ability of candidates to implement and manage Microsoft Information Protection solutions across various Microsoft 365 workloads. It covers a wide range of topics, including data classification, labeling, and protection, data loss prevention, and data governance, among others. It is a comprehensive exam that requires a deep understanding of the Microsoft 365 ecosystem and its various components.

Microsoft SC-400 Exam is intended for professionals who specialize in information protection and have experience working with Microsoft 365 and Microsoft Azure. SC-400 exam consists of various topics that cover different aspects of information protection,

such as data classification, data loss prevention, data governance, and data retention. Candidates must demonstrate proficiency in these areas to pass the exam.

Microsoft Information Protection Administrator Sample Questions (Q259-Q264):

NEW QUESTION # 259

You have a Microsoft 365 E5 tenant that contains a sensitivity label named label1.

You plan to enable co-authoring for encrypted files.

You need to ensure that files that have label1 applied support co-authoring.

Which two settings should you modify? To answer, select the settings in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Answer Area

Encryption

Control who can access files and email messages that have this label applied. [Learn more about encryption settings](#)

☐ Remove encryption if the file or email is encrypted

☒ Configure encryption settings

i Turning on encryption impacts Office files (Word, PowerPoint, Excel) that have this label applied. Because the files will be encrypted for security reasons, performance will be slow when the files are opened or saved, and some SharePoint and OneDrive features will be limited or unavailable. [Learn more](#)

Assign permissions now or let users decide?

Assign permissions now v

The encryption settings you choose will be automatically enforced when the label is applied to email and Office files.

User access to content expires *i*

A number of days after label is applied

Access expires this many days after the label is applied

90

Allow offline access *i*

Always v

Assign permissions to specific users and groups * *i*

[Assign permissions](#)

Users and groups	Permissions
No data available	

v Use Double Key Encryption *i*

<https://sts.contoso.com> 

Explanation:

Co-authoring and AutoSave aren't supported and don't work for labeled and encrypted Office documents that use any of the following configurations for encryption:

* Let users assign permissions when they apply the label and the checkbox In Word, PowerPoint, and Excel, prompt users to specify permissions is selected. This configuration is sometimes referred to as "user-defined permissions".

* User access to content expires is set to a value other than Never.

* Double Key Encryption is selected.

NEW QUESTION # 260

You have a Microsoft 365 E5 tenant and the Windows 10 devices shown in the following table.

Name	Azure Active Directory (Azure AD)-joined	Configuration
Device1	Yes	Onboarded to the Microsoft 365 compliance center
Device2	Yes	Onboarded to Microsoft Defender for Endpoint
Device3	Yes	Enrolled in Microsoft Intune
Device4	No	Enrolled in Microsoft Intune

To which devices can you apply Microsoft 365 Endpoint data loss prevention (Endpoint DLP) settings?

- A. Device1 only
- B. Device1, Device3, and Device4 only
- C. Device1 and Device2 only
- D. Device1, Device2, Device3, and Device4
- E. Device1 and Device3 only

Answer: C

Explanation:

NEW QUESTION # 262

You implement Microsoft 365 Endpoint data loss prevention (Endpoint DLP).

You have computers that run Windows 10 and have Microsoft 365 Apps installed. The computers are joined to Azure Active Directory (Azure AD).

You need to ensure that Endpoint DLP policies can protect content on the computers.

Solution: You deploy the unified labeling client to the computers.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Q

💬

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

The outbound email message was [answer choice].

Microsoft

delivered to an administrator
delivered to User2
returned to User1

The outbound email message [answer choice].

was encrypted automatically
was encrypted manually
was not encrypted

Answer:

Explanation:

The screenshot shows the 'Answer Area' with the Microsoft logo. The first question, 'The outbound email message was [answer choice].', has three options: 'delivered to an administrator', 'delivered to User2', and 'returned to User1'. The third option is highlighted in green. The second question, 'The outbound email message [answer choice].', has three options: 'was encrypted automatically', 'was encrypted manually', and 'was not encrypted'. The third option is highlighted in green.
