NABCEP PVIP Test Questions, PVIP Brain Dumps

Our PVIP test guide has become more and more popular in the world. Of course, if you decide to buy our PVIP latest question, we can make sure that it will be very easy for you to pass your exam and get the certification in a short time, first, you just need 5-10 minutes can receive PVIP Exam Torrent that you can learn and practice it. Then you just need 20-30 hours to practice our study materials that you can attend your exam. It is really spend your little time and energy.

NABCEP PV Installation Professional (PVIP) Board Certification Sample Questions (Q33-Q38):

NEW QUESTION # 33

A maintenance inspection reveals cracked module glass. What is the immediate action?

- A. Apply sealant to cracks
- B. Disconnect the string
- C. Monitor performance

- D. Replace the module

Answer: D

NEW QUESTION # 34

A PV system equipped with rapid shutdown requires a label stating "RAPID SHUTDOWN SWITCH FOR SOLAR PV SYSTEM".

Which is the BEST description of where this label is required?

- A. On or within 3 ft. of the ac disconnect
- B. On or within 3 ft. of the ac disconnect
- C. On or within 3 ft. of the ac disconnect
- D. On or within 3 ft. of the ac disconnect

Answer: C

NEW QUESTION # 35

When doing initial inspections on a PV system that was installed using racking that is not compliant with UL2703, an inspector should pay special attention to which electrical attribute?

- A. The equipment grounding conductor must be irreversibly spliced.
- B. Racking needs to be bonded to a supplemental grounding electrode conductor.
- C. The grounding conductor must be bonded directly to the primary grounding electrode.
- D. Each PV module needs to be bonded to the equipment grounding conductor.

Answer: D

NEW QUESTION # 36

A PV system was installed in July 2017 under the 2017 NEC. The system has a string inverter located inside a garage on a wall 10 ft. from the outside wall and 10 ft. from the ac load center at the point of utility connection. The PV system has a PV array on the roof. Which of the following represents the PV rapid shutdown system requirement for the controlled PV system conductors associated with this PV array?

- A. More than 1 ft. from the PV array and more than 5 ft. in length the building.
- B. Within the array boundary and more than 3 ft. from the point of entry of the building.
- C. More than 1 ft. from the PV array or more than 3 ft. from the point of entry of the building.
- D. More than 10 ft. from the PV array or more than 5 ft. in length inside the building

Answer: C

NEW QUESTION # 37

When installing an ungrounded PV system with an open-circuit voltage of 450Vdc and a maximum voltage of 3000Vdc which procedures should be followed to establish an electrically safe condition?

- A. Determine possible sources electrical supply and avoid exposure to energized conductors or parts.
- B. Apply lockout/tagout devices and install a listed isolation transformer.
- C. Mount inverters on nonconductive supports and temporarily ground one dc circuit conductor.
- D. Verify that disconnecting device blades are closed and test conductors using an adequately rated detector.

Answer: A

NEW QUESTION # 38

.....

Our PVIP guide torrent through the analysis of each subject research, found that there are a lot of hidden rules worth exploring, this

is very necessary, at the same time, our PVIP training materials have a super dream team of experts, so you can strictly control the proposition trend every year. In the annual examination questions, our PVIP study questions have the corresponding rules to summarize, and can accurately predict this year's test hot spot and the proposition direction. This allows the user to prepare for the test full of confidence.
