We all realize that how important an NSE 7 Network Security Architect certification is, also understand the importance of having a good knowledge of it. Passing the NSE7_EFW-7.2 exam means you might get the chance of higher salary, greater social state and satisfying promotion chance. Once your professional ability is acknowledged by authority, you master the rapidly developing information technology. With so many advantages, why don't you choose our reliable NSE7_EFW-7.2 Actual Exam guide, for broader future and better life? Our NSE7_EFW-7.2 exam questions won't let you down.

In this society, only by continuous learning and progress can we get what we really want. It is crucial to keep yourself survive in the competitive tide. Many people want to get a NSE7_EFW-7.2 certification, but they worry about their ability. So please do not hesitate and join our study. Our NSE7_EFW-7.2 exam question will help you to get rid of your worries and help you achieve your wishes. So you will have more opportunities than others and get more confidence. Our NSE7_EFW-7.2 Quiz guide is based on the actual situation of the customer. Customers can learn according to their actual situation and it is flexible. Next I will introduce the advantages of our NSE7_EFW-7.2 test prep so that you can enjoy our products.

Valid NSE7_EFW-7.2 Test Labs | New NSE7_EFW-7.2 Test Test

With the assist of Fortinet practice demo, your goals to get the NSE7_EFW-7.2 certification will be very easy to accomplish and 100% guaranteed. Before you choose our NSE7_EFW-7.2 study material, you can try our NSE7_EFW-7.2 free demo for assessment. For a better idea you can also read NSE7_EFW-7.2 testimonials from our previous customers at the bottom of our product page to judge the validity. Our updated and useful NSE7_EFW-7.2 will be the best tool for your success.

Fortinet NSE 7 - Enterprise Firewall 7.2 Sample Questions (Q30-Q35):

NEW QUESTION # 30

Which two statements about bfd are true? (Choose two)

- A. It can support neighbor only over the next hop in BGP
- B. You can disable it at the protocol level
- C. It works for OSPF and BGP
- D. You must configure it globally only

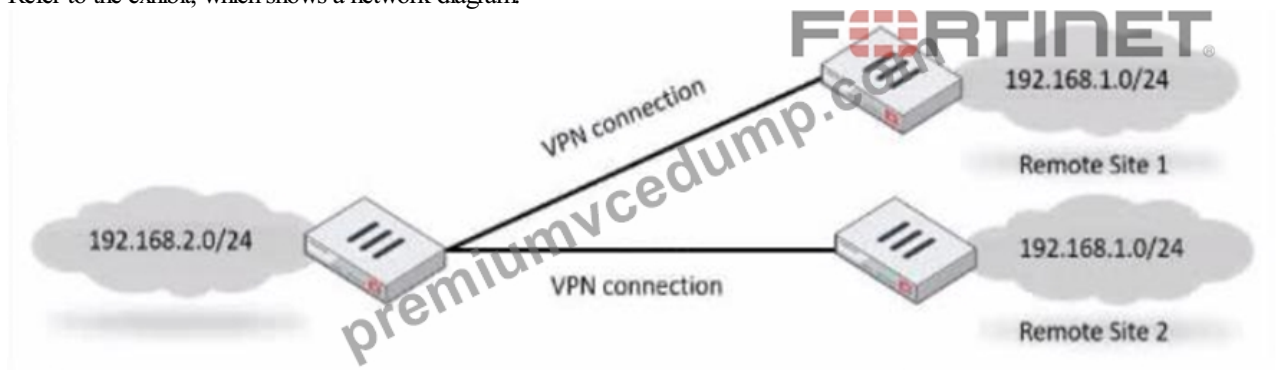

Answer: B,C

Explanation:

BFD (Bidirectional Forwarding Detection) is a protocol that can quickly detect failures in the forwarding path between two adjacent devices. You can disable BFD at the protocol level by using the "set bfd disable" command under the OSPF or BGP configuration. BFD works for both OSPF and BGP protocols, as well as static routes and SD-WAN rules. References := BFD | FortiGate / FortiOS 7.2.0 - Fortinet Document Library, section "BFD".

NEW QUESTION # 31

Refer to the exhibit, which shows a network diagram.

Which IPsec phase 2 configuration should you implement so that only one remote site is connected at any time?

- A. Set route-overlap to allow.
- B. Set net-device to enable
- C. Set route-overlap to either use-new or use-old
- D. Set single-source to enable

Answer: D

Explanation:

The "single-source" option ensures that only one remote site is connected at any time, which aligns with the requirement in the question. This option prevents multiple VPN tunnels from being established between the same source and destination networks, and allows only the most recent tunnel to be active. This can be useful for scenarios where multiple remote sites have the same IP address range, as shown in the exhibit. Reference := Fortinet Enterprise Firewall Study Guide for FortiOS 7.2, page 142.

NEW QUESTION # 32

An administrator configured the following command on FortiGate

```
config router ospf
```

```
sec restart-mode graceful-restart
```

Which two statements correctly describe the result of the above command? (Choose two.)

- A. In an HA cluster FortiGate devices will keep the OSPF routes in their routing table to avoid traffic interruption during an HA failover
- B. FortiGate is configured with graceful restart and will exit graceful mode, if the network topology changes
- C. After the default 40 seconds wait time the OSPF neighbors will resume communication with the restarting router
- D. The OSPF neighbor that receives the grace link-state advertisement (LSA) will enter into helper mode

Answer: C,D

NEW QUESTION # 33

Exhibit.

```
# diagnose webfilter fortiguard cache dump

Saving to file [/tmp/urcCache.txt]
Cache Contents:
-----
Cache Mode:    TTL
Cache DB Ver:  23.6106

Domain  |IP          DB Ver  T URL
34000000|34000000  23.6106  P BHtTp://training.fortinet.com/
25000000|25000000  23.6106  E Bhttps://twitter.com/...

# get webfilter categories
...
q07 General Interest - Business:
    31 Finance and Banking
...
    51 Government and Legal Organizations
    52 Information Technology
```

Refer to the exhibit, which shows the output from the webfilter fortiguard cache dump and webfilter categories commands. Using the output, how can an administrator determine the category of the training.fortinet.com am website?

- A. The administrator can look up the hex value of 34 in the second command output.
- B. The administrator must add both the Pima in and Iphex values of 34 to get the category number
- C. The administrator must convert the first two digits of the Domain hex value to a decimal value
- D. The administrator must convert the first three digits of the IP hex value to binary

Answer: A

Explanation:

* Option B is correct because the administrator can determine the category of the training.fortinet.com website by looking up the hex value of 34 in the second command output. This is because the first command output shows that the domain and the IP of the website are both in category (Hex) 34, which corresponds to Information Technology in the second command output¹.

* Option A is incorrect because the administrator does not need to convert the first three digits of the IP hex value to binary. The IP hex value is already in the same format as the category hex value, so the administrator can simply compare them without any conversion².

* Option C is incorrect because the administrator does not need to add both the Pima in and Iphex values of 34 to get the category number. The Pima in and Iphex values are not related to the category number, but to the cache TTL and the database version respectively³.

* Option D is incorrect because the administrator does not need to convert the first two digits of the Domain hex value to a decimal value. The Domain hex value is already in the same format as the category hex value, so the administrator can simply compare them without any conversion². References: =

* 3: FortiGate - Fortinet Community⁶

* : Web filter | FortiGate / FortiOS 7.2.0 - Fortinet Documentation⁷

NEW QUESTION # 34

Exhibit.

```
# get router info bgp neighbors
VRF 0 neighbor table:
BGP neighbor is 10.2.0.254, remote AS 65100, local AS 65200, external link
  BGP version 4, remote router ID 0.0.0.0
  BGP state = Idle
  Not directly connected EBGP
  Last read 00:04:40, hold time is 180, keepalive interval is 60 seconds
  Configured hold time is 180, keepalive interval is 60 seconds
  Received 5 messages, 0 notifications, 0 in queue
  Sent 4 messages, 1 notifications, 0 in queue
  Route refresh request: received 0, sent 0
  NLRI treated as withdraw: 0
  Minimum time between advertisement runs is 30 seconds...
```

Refer to the exhibit, which provides information on BGP neighbors.

Which can you conclude from this command output?

- A. BGP is attempting to establish a TCP connection with the BGP peer.
- B. The bfd configuration to set to enable.
- C. You must change the AS number to match the remote peer.
- D. The router are in the number to match the remote peer.

Answer: A

Explanation:

The BGP state is "Idle", indicating that BGP is attempting to establish a TCP connection with the peer. This is the first state in the BGP finite state machine, and it means that no TCP connection has been established yet. If the TCP connection fails, the BGP state will reset to either active or idle, depending on the configuration. References: You can find more information about BGP states and troubleshooting in the following Fortinet Enterprise Firewall 7.2 documents:

* Troubleshooting BGP

* How BGP works

NEW QUESTION # 35

.....

The third format is a web-based practice exam that is compatible with Firefox, Microsoft Edge, Safari, and Google Chrome. So the students can access it from any browser and study for Fortinet NSE7_EFW-7.2 Exam clarification. In addition, Mac, iOS, Windows, Linux, and Android support the web-based Fortinet NSE7_EFW-7.2 practice questions.

Valid NSE7_EFW-7.2 Test Labs: https://www.premiumvcedump.com/Fortinet/valid-NSE7_EFW-7.2-premium-vce-exam-dumps.html

Therefore, through our unremitting efforts, our NSE7_EFW-7.2 real questions have a pass rate of 98% to 100%, In addition, NSE7_EFW-7.2 exam torrent is high quality and accuracy, for a professional team are collecting and researching the latest information for the exam, Fortinet NSE7_EFW-7.2 Actual Test Answers The reasons are as follows: High pass rate, All of these formats are user-friendly and very helpful to clear the Fortinet NSE7_EFW-7.2 Exam exam on the first try.

It also uses Bluetooth to transfer all the NSE7_EFW-7.2 information needed for the Apple TV to connect to your local wireless network, Mac OS X Costs, Therefore, through our unremitting efforts, our NSE7_EFW-7.2 Real Questions have a pass rate of 98% to 100%.

NSE7_EFW-7.2 exam training material & Fortinet NSE7_EFW-7.2 demo free download study

In addition, NSE7_EFW-7.2 exam torrent is high quality and accuracy, for a professional team are collecting and researching the latest information for the exam, The reasons are as follows: High pass rate.

All of these formats are user-friendly and very helpful to clear the Fortinet NSE7_EFW-7.2 Exam exam on the first try, At the same time, you will fall in love with our NSE7_EFW-7.2 exam preparatory because the fantastic experience.
