

Free PDF 2025 Nutanix NCP-DB: High-quality Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 Exam Vce Format

P.S. Free 2025 Nutanix NCP-DB dumps are available on Google Drive shared by VCEdumps: https://drive.google.com/open?id=1UiS0AqBgNtdOegtGydSglwV-tm_U_x2u

Are you racking your brains for a method how to pass Nutanix NCP-DB exam? Nutanix NCP-DB certification test is one of the valuable certification in modern IT certification. Within the last few decades, IT got a lot of publicity and it has been a necessary and desirable part of modern life. Nutanix certification has been well recognized by international community. So, most IT people want to improve their knowledge and their skills by Nutanix certification exam. NCP-DB test is one of the most important exams and the certificate will bring you benefits.

Nutanix NCP-DB Exam Syllabus Topics:

Topic	Details
Topic 1	• Monitor Alerts and Storage Usage Within an NDB Implementation: It is all about monitoring alerts and management of storage usage.
Topic 2	• Administer an NDB Environment: While focusing on the administration of an NDB environment, this topic focuses on managing NDB profiles, applying procedural concepts, and managing networks in NDB. Lastly, the topic explains sub-topics of managing access controls in NDB and identifying how to use NDB APIs and CLI.
Topic 3	• Protect NDB-managed Databases Using Time Machine: SLA retention policies, source databases, clones, protection of databases, and Data Access Management (DAM) policies are discussed in this topic.

Dumps NCP-DB Discount, NCP-DB Reliable Source

Professional certification can not only improve staff's technical level but also enhance enterprise's competition. Valid Nutanix NCP-DB latest exam cram pdf will be necessary for every candidate since it can point out key knowledge and most of the real test question. NCP-DB Latest Exam Cram pdf provides you the simplest way to clear exam with little cost.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.5 Sample Questions (Q56-Q61):

NEW QUESTION # 56

A database is de-registered without removing the associated Time Machine. What is the status of the Time Machine?

- A. Ready
- B. Paused
- C. Active
- **D. Frozen**

Answer: D

Explanation:

When a database is de-registered from NDB without removing the associated Time Machine, the Time Machine enters a "Frozen" state. In this state, the Time Machine retains all existing snapshots and protection data but ceases to perform new snapshot captures or log catch-up operations. This allows the administrator to preserve the historical data for potential future use (e.g., auditing or recovery) while halting active management. The Frozen state prevents further modifications until the database is re-registered or the Time Machine is explicitly deleted.

* Option A (Ready) is incorrect because "Ready" implies the Time Machine is active and prepared for new operations, which is not the case post-de-registration.

* Option B (Frozen) is correct as it reflects the paused protection state after de-registration without removal.

* Option C (Paused) is incorrect because "Paused" is not a formal Time Machine state in NDB;

"Frozen" is the specific term.

* Option D (Active) is incorrect because the Time Machine cannot remain active without an associated registered database.

This state provides flexibility for data retention without ongoing resource use.

NEW QUESTION # 57

What must be configured in Prism Element to allow the NDB server and CVMs to facilitate iSCSI connections?

- **A. Data Services IP**
- B. Virtual IP
- C. Backplane IP
- D. Secondary DNS IP

Answer: A

Explanation:

To enable iSCSI connections between the Nutanix Database Service (NDB) server, Controller VMs (CVMs), and Prism Element, a Data Services IP must be configured in Prism Element. The Data Services IP acts as a cluster-wide address that facilitates iSCSI target discovery and connectivity. It is used by Nutanix Volumes (a block storage service) to present storage to external clients or services, such as the NDB server, via the iSCSI protocol. This IP ensures that iSCSI traffic is routed correctly and remains available even if a CVM fails, as ownership of the Data Services IP can move to another CVM in the cluster.

Configuring the Data Services IP is a prerequisite for integrating NDB with a Nutanix cluster, as NDB relies on iSCSI to manage database storage operations like provisioning and cloning. Without this configuration, the NDB server cannot establish the necessary connections to the CVMs for database-related tasks. Options like Virtual IP, Secondary DNS IP, and Backplane IP are not relevant in this context:

- * Virtual IP: This is typically associated with high-availability setups for applications, not iSCSI connectivity.
- * Secondary DNS IP: This pertains to network resolution, not storage connectivity.
- * Backplane IP: This is an internal network IP for cluster communication, not for external iSCSI access.

Thus, the correct and verified answer is the Data Services IP.

NEW QUESTION # 58

What is the first step to install NDB on a Nutanix AHV cluster?

- A. Open Prism Central and enable the NDB VM in the settings menu.
- B. Run LCM update to get the latest version of NDB.
- C. NDB is offered as a SaaS service and doesn't require any installations.
- D. Download the QCOW2 image file of NDB and upload it to Prism Element.

Answer: D

Explanation:

To install NDB on a Nutanix AHV cluster, you need to download the QCOW2 image file of NDB from the Nutanix Support Portal and upload it to Prism Element. This image file contains the NDB software and the CentOS operating system. After uploading the image, you need to create a VM from the image and configure the network settings. Then, you need to register the NDB VM with Prism Central and enable the NDB service in the settings menu. References: Nutanix Support & Insights, Professional Services: NDB Database Cloning

NEW QUESTION # 59

How can HA drivers for a Database VM be upgraded?

- A. One-click software upgrade
- B. LCM driver upgrade
- C. Database software patching
- D. Database VM OS patching

Answer: B

Explanation:

HA drivers are software components that enable high availability features for database VMs, such as failover, fencing, and heartbeat. HA drivers can be upgraded using the Life Cycle Management (LCM) feature of Nutanix Prism. LCM can detect the available updates for HA drivers and apply them to the database VMs in a non-disruptive manner. LCM can also perform health checks and pre-upgrade validations to ensure the successful completion of the upgrade process. One-click software upgrade is a feature of Nutanix Era that allows you to upgrade the Era software itself, not the HA drivers. Database VM OS patching is a feature of Nutanix Era that allows you to patch the operating system of the database VMs, not the HA drivers. Database software patching is a feature of Nutanix Era that allows you to patch the database software of the database VMs, not the HA drivers. References:

NEW QUESTION # 60

Which Time Machine feature allows developers to automate the data refresh for their clones?

- A. Log Catchup
- B. Schedule

- C. Manual Backup
- D. update

Answer: B

Explanation:

According to the Nutanix Database Automation (NCP-DB) learning documents, the Schedule feature of the Time Machine allows developers to automate the data refresh for their clones¹. This feature eliminates the time-consuming, complex process of database clone/refresh, allowing admins to create database clones

/refresh to any point in time in just a few minutes¹. Please refer to the official Nutanix documentation and training materials for more detailed information².

NEW QUESTION # 61

.....

Are you IT person? Do you want to succeed? If you want to succeed, please do to buy Pass4Tes's Nutanix NCP-DB exam training materials. Our training materials have through the test of practice. it can help you to pass the IT exam. With the VCEdumps's Nutanix NCP-DB exam training materials, you will have better development in the IT industry. You can enjoy the treatment of high-level white-collar, and you can carve out a new territory in the intertation. Are you still worried about your exam? VCEdumps's Nutanix NCP-DB Exam Training materials will satisfy your desire. We are through thick and thin with you and to accept this challenge together.
