In which step of the risk management technique do teams consider probability and impact of a risk?

- A. Implement
- B. Plan
- C. Assess
- D. Identify

**Answer: C**

Explanation:

The assess step involves evaluating the probability and impact of identified risks to determine their severity and prioritize them for management. This step is crucial for effective risk control and helps allocate resources appropriately.

Planning relates to defining how to manage risks, identification involves discovering risks, and implementation concerns applying risk responses.

#### NEW QUESTION # 67

Which of the following is a benefit of an organization being and doing agile?

- A. Focusing on completing tasks
- B. Using agile techniques
- C. Setting all tolerances to zero
- **D. Faster time-to-market**

**Answer: D**

Explanation:

A primary benefit of an organization being and doing agile is faster time-to-market. Agile methods emphasize iterative delivery, frequent releases, and continuous feedback, enabling organizations to deliver value sooner and adapt quickly to changes. This benefit directly supports business agility and competitive advantage.

Using agile techniques alone (B) is a means, not a benefit. Focusing solely on tasks (C) ignores value and flow, and setting tolerances to zero (D) is neither practical nor encouraged.
