With the Salesforce Certified OmniStudio Consultant (OmniStudio-Consultant) certificate they can be competitive and updated in the highly competitive market. The Salesforce Certification Questions offers a great opportunity for beginners and experienced professionals to not only validate their skills but also advance their careers.

To become a Salesforce Certified OmniStudio Consultant, candidates must have a solid understanding of the Salesforce platform and its various products, as well as experience using the OmniStudio platform to design and implement solutions. Salesforce Certified OmniStudio Consultant certification exam covers a range of topics, including data modeling, solution design, integration, and security, among others.

Salesforce Certified OmniStudio Consultant Sample Questions (Q33-Q38):

NEW QUESTION # 33

A business needs a 360° view of their accounts, including a FlexCard to display all of the products sold to the account. The business identified 20 different data elements and 10 actions that users would need when viewing the product information. Once all of the

elements were collected together on the FlexCard, it looked cluttered.
What FlexCard feature should the consultant recommend to address this issue?

- A. Flyouts
- B. Zones
- C. States
- D. Actions

Answer: A

Explanation:

Explanation

The FlexCard feature that the consultant should recommend to address this issue is Flyouts. A Flyout is a pop-up window that can display additional information or actions for a FlexCard. The consultant can use Flyouts to show some of the data elements and actions that are not essential for the main view of the product information, such as product details, specifications, reviews, etc. This way, the consultant can reduce the clutter on the main FlexCard and improve the user experience

NEW QUESTION # 34

Agents for an insurance company need to know the current and past weather conditions when creating claims for customers. The consultant implements a FlexCard for weather conditions in the console to ensure the agents have access to the information. The FlexCard needs to provide fields extracted from a weather API and an account field from Salesforce. According to best practice, what data source should be used?

- A. Streaming API
- B. DataRaptor Extract
- C. REST
- D. Integration Procedure

Answer: D

Explanation:

Explanation

An Integration Procedure is the best data source to use for a FlexCard that needs to provide fields from both an external API and a Salesforce object. An Integration Procedure can combine multiple DataRaptor actions, such as Extract, Transform, and Load, and also invoke REST or SOAP services. This way, the FlexCard can display data from different sources in one place

NEW QUESTION # 35

A consultant must design a 360 view of the customer. The business requirements are:

- * A header card with account information (name, account number, next billing date, invoice method)
- * A list of related contacts (first name, last name, phone)
- * All the open cases related to the account (subject, priority, SLA)

An account will not have more than 2 contacts, but it could have more than 10 open cases. It is necessary to the different sections available at a glance.

Which two FlexCard features should the consultant recommend to improve the user experience?

Choose 2 answers

- A. Use a Custom Style to adjust height and width
- B. Use a Block Element with the Collapse property enabled
- C. Use a Zone Template
- D. Use a Datatable element

Answer: B,D

NEW QUESTION # 36

How should the consultant design the OmniScript solution to allow the user to stop and resume a process at a later time?

- A. Configure the Save property
- B. Use an Integration Procedure

- C. Configure a Resume Step
- D. Use a DataRaptor Post Action

Answer: A

NEW QUESTION # 37

An OmniScript saves data to Salesforce and to an external system. What OmniScript element could save all this data?

- A. HTTP Action
- B. DataRaptor Post Action
- C. DataRaptor Transform Action
- **D. Integration Procedure Action**

Answer: D

Explanation:

The OmniScript element that could save all this data is Integration Procedure Action. An Integration Procedure Action can execute an Integration Procedure that can combine multiple DataRaptor actions, such as Extract, Transform, and Load, and also invoke REST or SOAP services. This way, the Integration Procedure Action can write data to Salesforce using a DataRaptor Load action and to an external system using a REST or SOAP service

NEW QUESTION # 38
