New SAP C_SAC_2501 Practice Questions & Reliable C_SAC_2501 Test Question

We offer you free demo for you to have a try before buying for C_SAC_2501 learning materials, so that you can have a deeper understanding of what you are doing to buy. We recommend you to have a try before buying. What's more, C_SAC_2501 training materials cover most of knowledge points for the exam, and you can master major knowledge points for the exam as well as improve your professional ability in the process of learning. In order to build up your confidence for C_SAC_2501 Exam Braindumps, we are pass guarantee and money back guarantee, and if you fail to pass the exam, we will give you refund.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q11-Q16):

NEW QUESTION # 11
For which activities must you enable Advanced Mode in story design? Note: There are 2 correct answers to this question.

- A. Add a popup
- B. Add JavaScript to a button
- C. Add a custom widget
- D. Add a layer to a geo map

Answer: A,B

NEW QUESTION # 12
You have a dataset that extracts data from an SAP Business Warehouse (SAP BW) system. The data in the SAP BW system changes. How can you update the dataset?

- A. You must refresh the story that uses the dataset.
- B. You must manually reimport the data.
- C. You can schedule the dataset to update on a regular basis.
- D. You must create a new dataset.

Answer: C

Explanation:
For datasets that extract data from external systems like SAP Business Warehouse (SAP BW), SAP Analytics Cloud provides the capability to schedule updates on a regular basis. This feature ensures that the dataset within SAP Analytics Cloud remains up-to-date with the latest changes from the SAP BW system, without the need for manual reimport or creating a new dataset. Scheduled updates can be configured to run at specific intervals, automating the data refresh process.

SAP Analytics Cloud User Guide: Automating Dataset Updates from External Sources

NEW QUESTION # 13
You have a dimension with members for product groups and products. Each product group has associated products. You want to plan by product group without disaggregating into the products. How can you do this?

- A. Use two hierarchies
- B. Use two properties
- C. Dis-able distribution
- D. Dis-able allocations

Answer: A

Explanation:
When you have a dimension with members for product groups and associated products and want to plan by product group without disaggregating into the individual products, using two hierarchies is the best approach. One hierarchy can represent the product groups at a higher level, allowing for planning and analysis at the group level. The second hierarchy can include both the product groups and their associated individual products for more detailed analysis when needed. This approach provides flexibility in planning and analyzing data at different levels of detail without the necessity of disaggregating data at the product group level.

NEW QUESTION # 14
How can you limit the refresh time of a story?

- A. Create calculated measures
- B. Use canvas pages
- C. Implement a value driver tree
- D. Collapse the hierarchy

Answer: D

Explanation:
Collapsing the hierarchy in a story can help limit the refresh time, as it reduces the amount of data that needs to be processed and displayed at any given time. By presenting data at a higher aggregation level initially, you can improve performance and allow users to expand specific sections of the hierarchy as needed for more detailed analysis.

SAP Analytics Cloud User Guide: Managing Data Hierarchy for Performance

NEW QUESTION # 15
You are creating a styling rule for a table with a hierarchy of Country, Region, and City. You want to apply the styling rule only to countries. Which level option must you use?

- A. Self and Children
- B. Self
- C. Self and Siblings
- D. Self and Descendants

Answer: B

Explanation:
To apply a styling rule only to countries in a table with a hierarchy of Country, Region, and City in SAP Analytics Cloud, you must use the "Self" level option. This option ensures that the styling rule is applied specifically to the level of the hierarchy representing countries, without affecting the styling of regions, cities, or any other hierarchical levels.
