## UiPath-TAEPv1 - High-quality Reliable UiPath Test Automation Engineer Professional v1.0 Test Blueprint

cracking the UiPath UiPath-TAEPv1 examination needs preparation from an updated UiPath UiPath-TAEPv1 exam questions. To pave your way towards exam success, CertkingdomPDF has hired a team of professionals. They have compiled real UiPath-TAEPv1 Exam Dumps after thorough analysis of past exams and examination content. These UiPath-TAEPv1 Exam Dumps are actual, authentic, realistic, and will eliminate your chance of failure in the UiPath Test Automation Engineer Professional v1.0 UiPath-TAEPv1 examination.

## UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q69-Q74):

### NEW QUESTION # 69

What is the purpose of using test case templates in UiPath?

- A. To be used as a direct replacement for regular test cases.
- B. To store them in a library alongside their respective test data variations.
- C. To use them as base models for the test cases needed.
- D. To convert them into workflows and publish them for execution.

**Answer: C**

Explanation:

The purpose of using test case templates in UiPath is to serve as base models for creating new test cases. They define a reusable structure and logic that ensures consistency and speeds up the test development process.

#### NEW QUESTION # 70

Where can robot authentication settings be seen and configured?

- A. Tenant > Preferences, on the Robot connection tab.
- **B. Tenant > Settings, on the Robot security tab.**
- C. Tenant > Settings, on the Robot connection tab.
- D. Tenant > Preferences, on the Robot security tab.

**Answer: B**

Explanation:

Robot authentication settings can be seen and configured in UiPath Orchestrator by navigating to Tenant > Settings, under the Robot security tab. This is where you manage how robots authenticate with Orchestrator.

#### NEW QUESTION # 71

What is the purpose of the RunTest block in the Test Automation Framework?

- A. RunTest block is where the Test Case should be invoked. The RunTest should be replaced at design time with an Invoke Workflow activity referencing the Test Case at the execution time. At the execution time, the Test Case will run instead of the RunTest block.
- **B. RunTest block is where the Test Case is executed. The Placeholder activity changes at runtime into an Invoke Workflow File activity.**
- C. RunTest block is where workflows specific to the Test Case should be invoked. If an Application Exception occurs, the current transaction is being retried. If a Business Rule Exception occurs, the block will skip the transaction.
- D. RunTest block is where the Test Case should be created. The RunTest should contain the actions specific to the Test Case.

**Answer: B**

Explanation:

The RunTest block in the Test Automation Framework is where the Test Case is executed. At runtime, the Placeholder activity within the block dynamically changes into an Invoke Workflow File activity that points to the actual test case implementation. This allows for a flexible and modular test execution design.

#### NEW QUESTION # 72

What are the steps to delete a test schedule in UiPath Orchestrator?

- A. Open your folder, move to Testing > Test Schedules, open a test schedule, and click on Delete, click OK to confirm.
- B. Open your folder, navigate to Testing > Test Schedules, select a test schedule, and go to More Actions > Edit, click Delete click OK to confirm.
- C. Open your project, navigate to Testing > Test Schedules, select a test schedule, click on More Options > Remove, click Confirm for deletion.
- **D. Open your folder, navigate to Testing > Test Schedules, select a test schedule, and go to More Actions > Delete, click OK to confirm.**

**Answer: D**

Explanation:

To delete a test schedule in UiPath Orchestrator, navigate to your folder, then go to Testing > Test Schedules, select the test schedule, choose More Actions > Delete, and confirm the deletion by clicking OK.

#### NEW QUESTION # 73

There is a test case that performs multiple verifications.

How can the test case be configured so that the execution stops when a verification fails?

- A. Use a Terminate Workflow activity after each verification.
- B. Use a Stop Job activity after each verification.
- C. Set the property ContinueOnFailure of the first Verify activity to False.
- **D. Set the property ContinueOnFailure of the Verify activities to False.**

**Answer: D**

Explanation:

To ensure that the test case stops execution when a verification fails, you should set the ContinueOnFailure property of the Verify activities to False. This way, any failed verification will halt the test case immediately.

## NEW QUESTION # 74

.....

As long as you get to know our UiPath-TAEPv1 exam questions, you will figure out that we have set an easier operation system for our candidates. Once you have a try, you can feel that the natural and seamless user interfaces of our UiPath-TAEPv1 study materials have grown to be more fluent and we have revised and updated UiPath-TAEPv1 learning braindumps according to the latest development situation. Without doubt, we are the best vendor in this field and we also provide the first-class service for you.
