The BraindumpsIT Veeam Certified Engineer v12 (VMCE_v12) exam dumps are ready for quick download. Just choose the right VMCE_v12 exam questions format and download it after paying an affordable Veeam Certified Engineer v12 in VMCE_v12 Practice Questions charge and start this journey. Best of luck in the Veeam VMCE_v12 exam and career!!!

Veeam VMCE_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.
Topic 2	<ul style="list-style-type: none">• Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Topic 3	<ul style="list-style-type: none">• Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.
Topic 4	<ul style="list-style-type: none">• Incident Response Planning: This section of the exam covers integrating Veeam Backup and Replication into the incident response strategy.
Topic 5	<ul style="list-style-type: none">• Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Topic 6	<ul style="list-style-type: none">• Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.

Topic 7	<ul style="list-style-type: none"> • Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.
Topic 8	<ul style="list-style-type: none"> • Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.
Topic 9	<ul style="list-style-type: none"> • Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.

Free PDF Quiz 2025 Veeam VMCE_v12: First-grade Minimum Veeam Certified Engineer v12 Pass Score

We strongly recommend using our Veeam VMCE_v12 exam dumps to prepare for the Veeam VMCE_v12 certification. It is the best way to ensure success. With our Veeam Certified Engineer v12 (VMCE_v12) practice questions, you can get the most out of your studying and maximize your chances of passing your Veeam Certified Engineer v12 (VMCE_v12) exam.

Veeam Certified Engineer v12 Sample Questions (Q92-Q97):

NEW QUESTION # 92

A Windows Server using the ReFS filesystem has been used as a standalone Veeam repository for several years and is due for replacement. A new Windows server using the ReFS filesystem has been created to replace the old server, with twice the capacity. Backup files need to be transferred to the new server with no disruptions to the existing backup chains.

The Veeam engineer has begun to move backup files to the new repository but is now getting alerts that it is running out of space. How could the engineer have avoided this issue?

- A. Use a Backup Copy Job
- B. Use the "Copy backup..." function
- C. Use Robocopy with the /compress switch
- D. Use the "Move backup..." function

Answer: D

Explanation:

To avoid running out of space when moving backups to a new repository, the "Move backup..." function in Veeam Backup & Replication should be used. This function allows you to relocate backup files to a new repository without duplicating data, which can save space. Unlike a simple copy action, the move function ensures that the backup chain remains intact and does not require additional space for a copy of the backups during the transfer. When the move is initiated, Veeam will also automatically update the configuration to point to the new backup location, thus preventing any disruptions in the backup chain.

NEW QUESTION # 93

A customer's NAS has multiple hardware failures, and the NAS is no longer accessible. All of the users are impacted as they need to access the NAS for day-to-day work.

Which restore method could minimize the service impact to the users?

- A. Rollback to a point in time
- B. Restore of files and folders
- C. Restore of the entire file share
- D. Instant file share recovery

Answer: D

NEW QUESTION # 94

An environment is using Veeam Agent for Microsoft Windows and has Microsoft Exchange 2016 with regular database availability groups (DAGs) configured. What option is required to properly back up the databases?

- A. Exchange Processing
- B. Advanced Exchange Backup
- **C. Failover Cluster**
- D. Standalone server

Answer: C

Explanation:

The procedure of adding a Microsoft Exchange Database Availability Group (DAG) to a Veeam Agent backup job differs depending on the type of the DAG that you want to process: For a regular DAG, the backup job configuration procedure is the same as for any failover cluster. To process a regular DAG, you must configure a Veeam Agent backup job for a failover cluster.

NEW QUESTION # 95

A company has separate networks for management traffic and data traffic. All Veeam components are communicating over the management network. How would they define the data network for backup data transfers?

- A. Re-add all Veeam components involved in data transfer through the required interfaces
- B. Create a global network traffic rule, set appropriate source and target IP range
- C. Update routing tables on the components involved in data transfer
- **D. Use the preferred network settings to switch to data network for the backup traffic**

Answer: D

Explanation:

https://helpcenter.veeam.com/docs/backup/vsphere/select_backup_network.html?ver=100

NEW QUESTION # 96

Veeam Backup & Replication is currently configured to keep backups for 14 days on a NAS repository. An engineer needs to enable GFS with 12 monthly and 5 yearly full backups to extend the retention for archival purposes but does not have enough space on the repository to store them. After adding the repository to Scale-Out-Backup Repository (SOBR) as Performance Tier, which option should the engineer choose to solve this issue?

- **A. Add an Object Storage as Capacity tier and set the policy to move backups older than 14 days**
- B. Add an Object Storage as Capacity tier and set the policy to copy backups to object storage as soon as they are created
- C. Add another NAS repository as Capacity tier and set the policy to move backups older than 14 days
- D. Add an Object Storage as Archive tier and set the policy to move all GFS backups

Answer: A

Explanation:

To solve the space issue while enabling GFS retention, the engineer should add an Object Storage as a Capacity tier to the Scale-Out Backup Repository (SOBR) and set the policy to move backups that are older than 14 days. This approach allows for efficient use of local NAS storage for short-term retention and leverages object storage for long-term archival purposes.

NEW QUESTION # 97

.....

Many candidates may take the price into consideration while buying VMCE_v12 exam materials. The price of VMCE_v12 exam materials is quite reasonable, you can afford it no matter you are students or the employees in the company. Furthermore the VMCE_v12 Exam Materials is high-quality, so that it can help you to pass the exam just one time, we will never let your money gets nothing returns. If you indeed fail the exam, money back will be guaranteed.
