Pass-Sure Exam 350-701 Preparation & Perfect 350-701 Test Fee & Updated Study 350-701 Plan

In order to help customers solve problems, our company always insist on putting them first and providing valued service. We deeply

believe that our 350-701 question torrent will help you pass the exam and get your certification successfully in a short time. Maybe you cannot wait to understand our 350-701 Guide questions; we can promise that our products have a higher quality when compared with other study materials. At the moment you can free download the demo of our 350-701 guide torrents, and I can make a bet that you will be fond of our 350-701 exam questions if you understand it.

Cisco 350-701 Exam covers a wide range of topics related to security technologies, including the implementation of secure network infrastructure, secure access, and secure endpoint protection. 350-701 exam also covers the implementation of network security and cloud security solutions, as well as the implementation of network visibility and enforcement solutions.

Secure Network Visibility, Access, and Enforcement – 15%

- Describing the exfiltration methods, including HTTPS, IRC, DNS tunneling, email, Messenger, and others;
- Configuring and verifying the function of network access device, such as 802.1X, WebAuth, and MAB;
- Explaining identity management & secure network access concepts, such as profiling, posture assessment, guest services, as well as BYOD;
- Explaining network access with the use of CoA;
- Describing the network telemetry benefits;

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q489-Q494):

NEW QUESTION # 489
Which attack is preventable by Cisco ESA but not by the Cisco WSA?

- A. buffer overflow
- B. phishing
- C. DoS
- D. SQL injection

Answer: B

Explanation:
Explanation:
The following are the benefits of deploying Cisco Advanced Phishing Protection on the Cisco Email Security Gateway:
Prevents the following:
+ Attacks that use compromised accounts and social engineering.
+ Phishing, ransomware, zero-day attacks and spoofing.
+ BEC with no malicious payload or URL.

NEW QUESTION # 490
Which type of dashboard does Cisco DNA Center provide for complete control of the network?

- A. application management
- B. centralized management
- C. distributed management
- D. service management

Answer: B

Explanation:
Cisco's DNA Center is the only centralized network management system to bring all of this functionality into a single pane of glass.
Cisco's DNA Center is the only centralized network management system to bring all of this functionality into a single pane of glass.
Cisco's DNA Center is the only centralized network management system to bring all of this functionality into a single pane of glass.

NEW QUESTION # 491
Which RADIUS attribute can you use to filter MAB requests in an 802.1 x deployment?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:
Because MAB uses the MAC address as a username and password, you should make sure that the RADIUS server can differentiate MAB requests from other types of requests for network access. This precaution will prevent other clients from attempting to use a MAC address as a valid credential. Cisco switches uniquely identify MAB requests by setting Attribute 6 (Service-Type) to 10 (Call-Check) in a MAB Access-Request message. Therefore, you can use Attribute 6 to filter MAB requests at the RADIUS server.
