

Free PDF APMG-International - Newest ISO-IEC-27001-Foundation Brain Exam

In compliance with syllabus of the exam, our ISO-IEC-27001-Foundation practice materials are determinant factors giving you assurance of smooth exam. Our ISO-IEC-27001-Foundation practice materials comprise of a number of academic questions for your practice, which are interlinked and helpful for your exam. So, they are specified as one of the most successful ISO-IEC-27001-Foundation practice materials in the line. They can renew your knowledge with high utility with Favorable prices. So, they are reliably rewarding ISO-IEC-27001-Foundation practice materials with high utility value.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	Information Management (IM): Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.
Topic 2	Self Confidence: Self-confidence is the belief in one’s abilities, competence, and value, reflecting a sense of assurance and inner strength.
Topic 3	Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.
Topic 4	Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 5	Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 6	Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 7	Compliance: Regulatory compliance refers to an organization’s commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.
Topic 8	Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.

ISO-IEC-27001-Foundation Reliable Exam Bootcamp & Exam ISO-IEC-

27001-Foundation Quiz

The existence of our ISO-IEC-27001-Foundation learning guide is regarded as in favor of your efficiency of passing the ISO-IEC-27001-Foundation exam. At the same time, our company is becoming increasingly obvious degree of helping the exam candidates with passing rate up to 98 to 100 percent. All our behaviors are aiming squarely at improving your chance of success. We are trying to developing our quality of the ISO-IEC-27001-Foundation Exam Questions all the time and perfecting every detail of our service on the ISO-IEC-27001-Foundation training engine.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which of the following statements about the differences between an internal audit and a certification audit is true?

An internal audit is conducted at planned intervals and a certification audit is conducted annually An internal audit is known as a 1st party audit and a certification audit is known as a 3rd party audit

- A. Neither 1 or 2 is true
- B. Only 1 is true
- C. Only 2 is true
- D. Both 1 and 2 are true

Answer: C

Explanation:

ISO/IEC 27001 Clause 9.2 requires internal audits to be conducted at planned intervals, but it does not specify an annual frequency. Certification audits, under ISO/IEC 17021 rules, typically occur on a 3-year cycle with annual surveillance, not strictly "annually."

This makes statement 1 inaccurate.

Audit types are defined in ISO/IEC 19011:

First-party audits: conducted internally by or on behalf of the organization (internal audits).

Third-party audits: conducted by independent external certification bodies.

Thus, statement 2 is correct. Therefore, the accurate choice is B: Only 2 is true.

NEW QUESTION # 40

Which benefit is NOT relevant by implementing an ISMS for an organization?

- A. Information security controls are tailored to suit the organization's specific circumstances
- B. Information security staff will be qualified to ISO/IEC 27001 Foundation level
- C. Information security compliance will increase stakeholder trust in the organization
- D. Information security risks are assessed and the probability and/or impact reduced

Answer: B

Explanation:

The benefits of implementing an ISMS under ISO/IEC 27001 are well established. Clause 0.1 (General) explains that an ISMS provides a systematic approach to managing sensitive information and "preserves confidentiality, integrity, and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed."

Option A is correct as a benefit, since trust and confidence from stakeholders is an outcome of compliance.

Option C is also a benefit, since controls are chosen and tailored based on organizational context and risk assessment (Clause 6.1.3). Option D reflects another real benefit-reducing the probability and/or impact of incidents through effective risk management. However, staff qualifications (option B) are not guaranteed benefits of implementing an ISMS. While training and competence (Clause 7.2) are required, the standard does not require or provide ISO/IEC 27001 Foundation-level certification for staff. That is an external training/certification scheme, not an ISMS outcome.

Therefore, the benefit NOT relevant to implementing ISO/IEC 27001 is B.

NEW QUESTION # 41

Which International Standard can be used to implement an integrated management system with ISO/IEC 27001?

- A. ISO 9001
- **B. ISO/IEC 27013**
- C. None of the above
- D. ISO/IEC 27003

Answer: B

Explanation:

ISO/IEC 27013 provides specific guidance on the integration of ISO/IEC 27001 (Information Security Management) and ISO/IEC 20000-1 (IT Service Management). It offers practical advice for organizations seeking a unified management system approach. While ISO/IEC 27003 (A) provides guidance on ISMS implementation, it does not address integration. ISO 9001 (C) is the Quality Management Standard and can be integrated, but the specific standard designed for integrating 27001 with ITSM is ISO/IEC 27013. Therefore, the correct answer is B: ISO/IEC 27013, as it is explicitly published for this purpose.

NEW QUESTION # 42

Which output is a required result from risk analysis?

- **A. Determined levels of risk**
- B. Risk acceptance criteria
- C. Risk treatment control options
- D. Prioritized risks for treatment

Answer: A

Explanation:

Clause 6.1.2 (d) states that during risk analysis, the organization shall:

- * "assess the potential consequences that would result if the risks identified... were to materialize;"
- * "assess the realistic likelihood of the occurrence of the risks identified;"
- * "determine the levels of risk."

This makes it clear that the required output of risk analysis is the determined levels of risk. Risk acceptance criteria (A) are set earlier in 6.1.2(a), treatment control options (C) belong to 6.1.3, and prioritization (D) is part of risk evaluation (6.1.2 e). Therefore, the verified correct output is B: Determined levels of risk.

NEW QUESTION # 43

Which is a control title within Annex A of ISO/IEC 27001?

- A. Protection of documents
- B. Responsibilities and procedures
- **C. Information security in supplier relationships**
- D. Change control

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

In ISO/IEC 27002:2022, which provides control guidance for Annex A of ISO/IEC 27001, Clause 5.19 is titled: "Information security in supplier relationships." This control requires organizations to ensure that information security is addressed in supplier agreements and relationships. It is part of the Organizational Controls theme. The other options are not control titles in Annex A:

- * "Responsibilities and procedures" (B) was used in older standards like ISO/IEC 27001:2005 but no longer exists.
- * "Protection of documents" (C) relates to document control but is not a specific Annex A control.
- * "Change control" (D) is relevant to ITIL/ITSM but not listed as a control title in Annex A.

Therefore, the correct Annex A control title is A: Information security in supplier relationships.

NEW QUESTION # 44

.....

Our ISO-IEC-27001-Foundation training materials provide three different versions to the client and they include the PDF version, PC version, APP online version. Each version's using method and functions are different but the questions and answers of our ISO-

IEC-27001-Foundation Study Materials is the same. The client can decide which version of our ISO-IEC-27001-Foundation exam questions to choose according their hobbies and their practical conditions.
