Cisco 300-620 practice materials are highly popular in the market compared with other materials from competitors whether on the volume of sales or content as well. All precise information on the Implementing Cisco Application Centric Infrastructure 300-620 Exam Questions and high accurate questions are helpful. To help you have a thorough understanding of our 300-620 training prep, free demos are provided for your reference.

Cisco 300-620 certification exam is a challenging test that validates the skills required to deploy, configure, and manage Cisco ACI

solutions. It is an essential credential for IT professionals who want to advance their careers in data center networking and demonstrates their proficiency in network protocols, routing and switching technologies, and virtualization concepts.

Cisco 300-620 certification exam is designed to test the knowledge and skills of IT professionals in implementing Cisco Application Centric Infrastructure (ACI). ACI is a software-defined networking solution that enables organizations to automate and manage their network infrastructure more efficiently. Implementing Cisco Application Centric Infrastructure certification exam is intended for network administrators and engineers who are responsible for implementing and managing ACI solutions in their organizations.

You Have Passed It. What Is Next?

Those candidates who successfully ace 300-620 test will be given the Cisco Certified Specialist – Data Center ACI Implementation certification first. With this certificate, it is believed that you are well-skilled in the field of Cisco switches in ACI.

If you want to upgrade your portfolio and acquire more knowledge in the industry, you can take and pass 350-601 DCCOR exam as well which is a core test for the CCNP Data Center accreditation. Once these two steps are completed, the certification is yours. Finally, you can check out other concentration options under this path or go for the CCIE Data Center certificate. In this case, the candidates are recommended to have 5 to 7 years of working experience in the field and be proficient in creating, deploying, optimizing complex data center solutions as well as handling other related tasks.

Free PDF Quiz Cisco - 300-620 - Implementing Cisco Application Centric Infrastructure High Hit-Rate Braindumps Pdf

The aspirants will find it easy to get satisfied by our Cisco 300-620 dumps material before actually buying it. If you wish to excel in Information Technology, the Cisco 300-620 Certification will be a turning point in your career. Always remember that Implementing Cisco Application Centric Infrastructure 300-620 exam questions change.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q242-Q247):

NEW QUESTION # 242
What is the maximum number of sites connected using spine back-to-back with a direct link in a Cisco ACI Multi-Site fabric?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:
In a Cisco ACI Multi-Site setup, back-to-back spine connectivity is limited to a direct connection between two sites. This design simplifies inter-site communication by avoiding the need for an intermediate Inter-Pod Network (IPN) or Multi-Site Orchestrator.

NEW QUESTION # 243
What is a characteristic of a Cisco ACI Multi-Pod?

- A. A VPNv4 address family is used to exchange endpoint information between spines.
- B. It eliminates the need to deploy multicast in the Layer 3 network that interconnects the pods.
- C. Spines use BGP peering with IPN to send out the TEP pool prefix for the local pod.
- D. It manages the configuration of different Cisco ACI pods using a single common Cisco APIC cluster.

Answer: D

NEW QUESTION # 244

A Cisco ACI bridge domain and VRF are configured with a default data-plane learning configuration. Which two endpoint attributes are programmed in the leaf switch when receiving traffic? (Choose two.)

- A. Remote MAC. IP
- B. Remote IP
- C. Remote Subnet
- D. Local MAC, IP
- E. Local Subnet
- F. Local IP, not MAC

Answer: A,D

NEW QUESTION # 245

New ESXi hosts are procured in a data center compute expansion project. An engineer must update the configuration on the Cisco APIC controllers to support the addition of the new servers to the existing VMM domain. Which action should be taken to support this change?

- A. Map the leaf interface selector to the AEP that is associated with the VMM domain.
- B. Create a range of internal VLANs in the associated VLAN pool.
- C. Set the encapsulation mode as VXLAN.
- D. Enable infrastructure VLAN in the associated AEP.

Answer: A

Explanation:
To support the addition of new ESXi hosts to the existing VMM domain, the action that should be taken is to map the leaf interface selector to the AEP that is associated with the VMM domain (Option D). This ensures that the correct policies are applied to the interfaces where the new ESXi hosts are connected.

NEW QUESTION # 246

A Cisco ACI fabric must detect all silent endpoints for the Layer 3 bridge domain. Which actions accomplish this goal?

- A. Enable Unicast Routing.
  Enable ARP Flooding.
- B. Disable Unicast Routing.
  Enable L2 Unknown Unicast Flood.
- C. Disable Unicast Routing.
  Enable L2 Unknown Unicast Hardware Proxy.
- D. Enable Unicast Routing.
  Disable ARP Flooding.

Answer: D

Explanation:
A silent host in Cisco ACI is an endpoint that does not actively send traffic (like ARP requests) but still needs to be detected by the fabric. Cisco ACI can detect silent endpoints using data plane learning when routing is enabled.
- Enable Unicast Routing:
This allows ACI to learn endpoints through Layer 3 mechanisms such as ARP Gleaning and routing lookups.
If Unicast Routing is enabled, the fabric can track and detect silent hosts based on ARP requests and replies.
- Disable ARP Flooding:
Disabling ARP flooding ensures that ARP requests are handled in a more controlled way using the ARP Gleaning mechanism rather than being flooded across the fabric.
This allows ACI to learn about silent hosts without requiring them to send out ARP requests.

NEW QUESTION # 247

......

Desktop-based 300-620 practice exam software is the first format that Prep4sures provides to its customers. It helps track the

progress of the candidate from beginning to end and provides a progress report that is easily accessible. This Cisco 300-620 Practice Questions is customizable and mimics the real 300-620 exam, with the same format, and is easy to use on Windows-based computers. The product support staff is available to assist with any issues that may arise.
