

Free PDF EXIN - CDCP - Certified Data Centre Professional (CDCP)–High-quality Download Free Dumps

BONUS!!! Download part of BraindumpsPass CDCP dumps for free: <https://drive.google.com/open?id=1g7jJAedHxPICDLsZL7Q7OV3aHPg-yry>

Our CDCP learning prep boosts the self-learning, self-evaluation, statistics report, timing and test stimulation functions and each function plays their own roles to help the clients learn comprehensively. The self-learning and self-evaluation functions of our CDCP guide materials help the clients check the results of their learning of the CDCP Study Materials. The timing function of our CDCP training quiz helps the learners to adjust their speed to answer the questions and keep alert and our study materials have set the timer.

Good product can was welcomed by many users, because they are the most effective learning tool, to help users in the shortest possible time to master enough knowledge points, so as to pass the qualification test, and our CDCP study materials have always been synonymous with excellence. Our CDCP Study Materials can help users achieve their goals easily, regardless of whether you want to pass various qualifying examinations, our products can provide you with the learning materials you want.

Latest CDCP Study Guide - Reliable CDCP Exam Sims

So you rest assured that with the EXIN CDCP actual questions you will not only ace the EXIN CDCP exam predation but also boost confidence to perform well in the final EXIN CDCP test. With the EXIN CDCP pdf questions you can experience the type and pattern of the final CDCP exam. In this way, you will be confident on the day of the Certified Data Centre Professional (CDCP) CDCP Exam and solve all the EXIN CDCP exam questions. The EXIN wants to make the CDCP exam preparation simple and quick. To achieve this objective the EXIN is offering the top-notch and top-rated CDCP practice test questions in three user-friendly and compatible formats.

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).
Topic 2	Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.
Topic 3	Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.
Topic 4	- Designing a Scalable Network Infrastructure: It covers ANSI - TIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.
Topic 5	- Equipment Racks: It discusses power rail - strip options, security considerations, and rack standards, properties and selection criteria.
Topic 6	Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.
Topic 7	Cooling Infrastructure: The topic focuses on liquid immersion cooling, supplemental cooling options, sensible and latent heat definitions, and temperature and humidity recommendations.
Topic 8	- Raised Floor - Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.
Topic 9	Water Supply: This topic is all about water supply techniques and application areas.
Topic 10	Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Topic 11	Data Centre Location, Building and Construction: It focuses on appropriate sites and components of an effective data centre and supporting facilities setup.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q58-Q63):

NEW QUESTION # 58

The expected time to Recover/Repair from a system from a failure is defined as.

- A. MLBF
- **B. MTTR**
- C. MTBF
- D. MCBF

Answer: B

Explanation:

The expected time to recover or repair from a system from a failure is defined as MTTR (mean time to recovery or mean time to repair). MTTR is the average time it takes to restore a system or product to its normal operation after a failure. MTTR includes the time spent on detecting, diagnosing, and fixing the problem. MTTR is an important metric for measuring the reliability and availability of a system or product, as well as the efficiency and effectiveness of the incident management process. A lower MTTR indicates a faster and more reliable recovery or repair process.

*Explained: All Meanings of MTTR and Other Incident Metrics

NEW QUESTION # 59

Which type of Fire Detection Device is recommended for protecting a Data Center?

- A. Heat detector
- B. None of the above
- C. Flame detector
- **D. Smoke detector**

Answer: D

Explanation:

According to the CDCP Preparation Guide, smoke detectors are the most common type of fire detection devices used in data centers, as they can detect a fire in its early stages and provide early warning to the occupants and authorities. Smoke detectors can be either spot-type or air-aspirating, depending on the design and goals of the data center. Spot-type detectors are inexpensive and simple, but may cause activation delay and false alarms. Air-aspirating detectors are more sensitive and reliable, but may require more maintenance and installation costs. Both types of detectors should be installed in accordance with the relevant standards and codes, such as NFPA 72 and EN 54.

Fire Detection and Suppression Systems in a Data Center.

NEW QUESTION # 60

is the ability of a system or component to perform its required functions under stated conditions for a specified period of time.

- A. Agility
- **B. Reliability**
- C. Scalability
- D. Availability

Answer: B

Explanation:

According to the IEEE definition, reliability is the ability of a system or component to perform its required functions under stated conditions for a specified period of time. Reliability is a measure of how often a system or component fails, and how long it takes to recover from a failure. Reliability is closely related to availability, which is the degree to which a system or component is operational and accessible when required for use. Reliability and availability are both affected by factors such as design, maintenance, testing, and environmental conditions.

NEW QUESTION # 61

Which type of Humidifier is composed of water-filled canister containing electrodes?

- A. Ultrasonic Humidifier
- B. Water Canister Humidifier
- C. Infrared Humidifiers
- **D. Steam Canister Humidifier**

Answer: D

Explanation:

A steam canister humidifier is a type of humidifier that uses electricity to heat water in a canister containing electrodes. The water conductivity and the water level determine the amount of current and steam production.

The steam canister humidifier is also known as an electrode boiler humidifier or an electrode steam humidifier¹²³.

NEW QUESTION # 62

Which one of the following is an Audible Signaling and Notification Device?

- A. Strobes
- B. Alarms
- C. Sirens
- D. Clocks

Answer: C

Explanation:

According to the CDCP Preparation Guide, an audible signaling and notification device is a device that produces a sound to alert or notify the occupants of a data center of an event or condition. Sirens are examples of such devices, as they can emit loud and distinctive tones to warn of fire, emergency, or security incidents.

Strobes, on the other hand, are visual signaling and notification devices that produce flashes of light to attract attention or convey information. Alarms and clocks are not specific types of devices, but rather general terms that can refer to various audible or visual devices.
