## SC-100 Exam Pass4sure & SC-100 Torrent VCE: Microsoft Cybersecurity Architect

The SC-100 exam is the right way to learn new in-demand skills and upgrade knowledge. After passing the Microsoft Cybersecurity Architect (SC-100) exam the successful candidates can gain multiple personal and professional benefits with the real Microsoft SC-100 Exam Questions. Validation of skills, more career opportunities, increases in salary, and increases in the chances of promotion

are some prominent benefits of the Microsoft SC-100 certification exam

Microsoft SC-100 Certification Exam is a great way to boost your career in the cybersecurity industry. By passing the exam, you will demonstrate your expertise in securing Microsoft technologies and become a certified Microsoft Cybersecurity Architect. Microsoft Cybersecurity Architect certification will help you stand out to potential employers and increase your earning potential. Additionally, you will have access to a network of certified professionals and resources to help you stay up-to-date with the latest cybersecurity trends and technologies.

## Microsoft Cybersecurity Architect Sample Questions (Q18-Q23):

### NEW QUESTION # 18

For a Microsoft cloud environment, you are designing a security architecture based on the Microsoft Cloud Security Benchmark. What are three best practices for identity management based on the Azure Security Benchmark?

Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Enable threat detection for identity and access management.
- **B. Use a centralized identity and authentication system.**
- C. Manage the lifecycle of identities and entitlements.
- **D. Protect identity and authentication systems.**
- **E. Manage application identities securely and automatically.**

**Answer: B,D,E**

Explanation:

<https://learn.microsoft.com/en-us/security/benchmark/azure/security-controls-v2-identity-management>

### NEW QUESTION # 19

You have a Microsoft 365 subscription that contains a Microsoft SharePoint Online site named Site1. Site1 stores documents that are based on a predefined form and include confidential employee information.

You monitor access to Site1 by using a Microsoft Defender for Cloud Apps session policy.

You need to ensure that step-up authentication is triggered when a user downloads documents that are based on the predefined form. The solution must minimize administrative effort.

Which Microsoft Data Classification Service inspection method should you use, and which Conditional Access option should you add to the session policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The screenshot shows a Microsoft interface for selecting an inspection method and a Conditional Access option. The 'Inspection method' dropdown is open, showing 'Exact data match (EDM)' as the selected option. The 'Option' dropdown is also open, showing 'Custom control' as the selected option. The interface includes the Microsoft logo and a watermark for 'certkingdompokdf.com'.

**Answer:**

Explanation:

This is a duplicate of the screenshot above, showing the same interface for selecting an inspection method and a Conditional Access option. The 'Inspection method' dropdown is open, showing 'Exact data match (EDM)' as the selected option. The 'Option' dropdown is also open, showing 'Custom control' as the selected option. The interface includes the Microsoft logo and a watermark for 'certkingdompokdf.com'.

Explanation:

Answer Area

Inspection method:

Option:

#### NEW QUESTION # 20

You need to recommend a strategy for App Service web app connectivity. The solution must meet the landing zone requirements. What should you recommend? To answer, select the appropriate options in the answer area. NOTE Each correct selection is worth one point.

For connectivity from App Service web apps to virtual machines, use:

☐ Private endpoints

☐ Service endpoints

☐ Virtual network integration

For connectivity from virtual machines to App Service web apps, use:

☐ Private endpoints

☐ Service endpoints

☐ Virtual network integration

Answer:

Explanation:

For connectivity from App Service web apps to virtual machines, use:

☐ Private endpoints

☐ Service endpoints

☒ Virtual network integration

For connectivity from virtual machines to App Service web apps, use:

☒ Private endpoints

☐ Service endpoints

☐ Virtual network integration

Explanation:

Box 1: Virtual Network Integration - correct

Virtual network integration gives your app access to resources in your virtual network, but it doesn't grant inbound private access to your app from the virtual network.

Box 2: Private Endpoints. - correct

You can use Private Endpoint for your Azure Web App to allow clients located in your private network to securely access the app over Private Link.

#### NEW QUESTION # 21

Your company wants to optimize using Azure to protect its resources from ransomware.

You need to recommend which capabilities of Azure Backup and Azure Storage provide the strongest protection against

ransomware attacks. The solution must follow Microsoft Security Best Practices.  
What should you recommend? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

**Answer Area**

Azure Backup: Encryption by using platform-managed keys  
Access policies  
Access tiers  
Encryption by using platform-managed keys  
Immutable storage  
A security PIN

Azure Storage: Immutable storage  
Access policies  
Access tiers  
Encryption by using platform-managed keys  
Immutable storage  
A security PIN

**Answer:**

**Explanation:**

**Answer Area**

Azure Backup: Encryption by using platform-managed keys  
Access policies  
Access tiers  
Encryption by using platform-managed keys  
Immutable storage  
A security PIN

Azure Storage: Immutable storage  
Access policies  
Access tiers  
Encryption by using platform-managed keys  
Immutable storage  
A security PIN

## NEW QUESTION # 22

You have an Azure subscription that has Microsoft Defender for Cloud enabled.  
You are evaluating the Azure Security Benchmark V3 report as shown in the following exhibit.

Home > Microsoft Defender for Cloud

**Microsoft Defender for Cloud** ...

Showing subscription 'Subscription1'

Download report Manage compliance policies Open query Audit reports ...

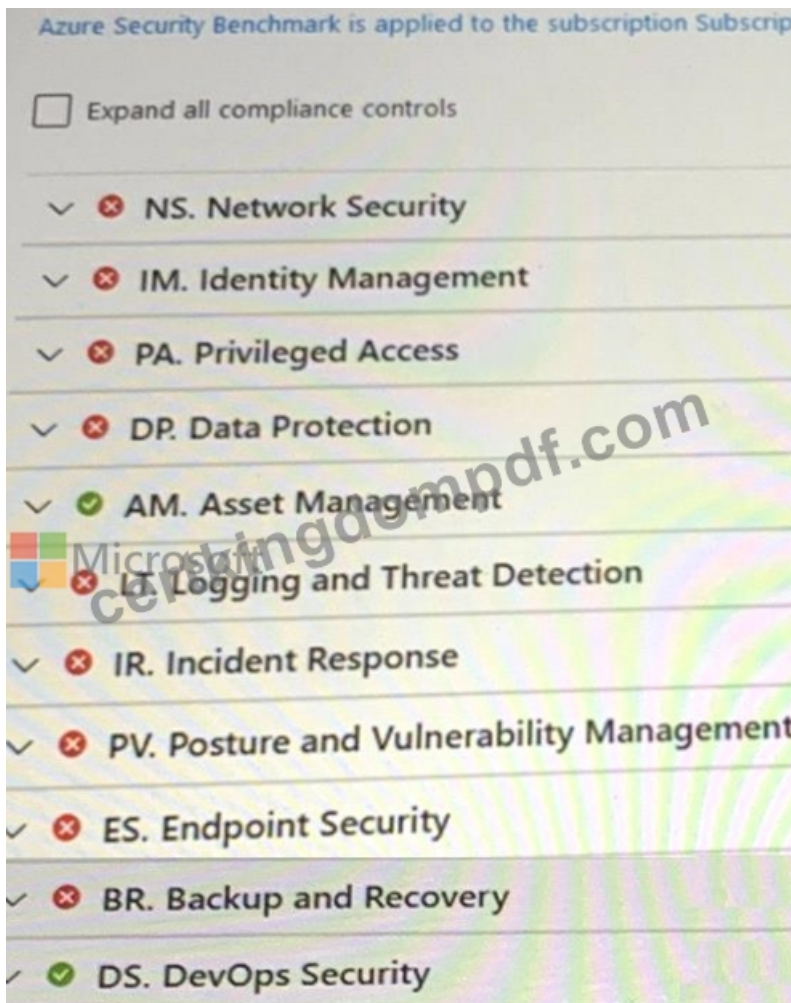

**Azure Security Benchmark V3** ISO 27001 PCI DSS 3.2.1 SOC TSP HIPAA HITRUST ...

You can now fully customize the standards you track in the dashboard. Update your dashboard by selecting 'Manage compliance policies' above.

Under each applicable compliance control is the set of assessments run by Defender for Cloud that are associated with that control. If they are all green, it means those assessments are currently passing; this does not ensure you are fully compliant with that control. Furthermore, not all controls for any particular regulation are covered by Defender for Cloud assessments, and therefore this report is only a partial view of your overall compliance status.

Azure Security Benchmark is applied to the subscription Subscription1

You need to verify whether Microsoft Defender for servers is installed on all the virtual machines that run Windows. Which compliance control should you evaluate?

- A. Posture and Vulnerability Management
- B. Incident Response
- C. Data Protection
- D. Asset Management
- E. Endpoint Security

**Answer: E**

#### NEW QUESTION # 23

.....

Our company will provide first class service on SC-100 exam questions for our customers. As a worldwide leader in offering the best SC-100 exam guide, we are committed to providing comprehensive service to the majority of consumers and strive for constructing an integrated service.
