Quiz Huawei H19-315-ENU - HCSA-Presales-Transmission & Access Fantastic Valid Test Registration

We are aware that taking the Huawei H19-315-ENU certification exam may be quite expensive. To save you money, we provide you with up to 1 year of free H19-315-ENU exam questions updates. Moreover, you can check out the features of our iPassleader's H19-315-ENU practice exam material by downloading a free demo. We provide you with a Free H19-315-ENU Exam Questions demo to assist you in making a decision that is well-informed. We are sure that by preparing with updated our Huawei H19-315-ENU exam questions you can get success and save both time and money.

Huawei HCSA-Presales-Transmission & Access Sample Questions (Q69-Q74):

NEW QUESTION # 69

What does the board marked in red in the configurator mean?

- A. Discontinued veneer
- B. Board control

- C. The delivery time of the board is longer
- D. Normal sales of panels

Answer: B

NEW QUESTION # 70

What are the benefits of the Expressway Enhanced MSTP solution? (Multiple choice)

- A. 40G
- B. Perfect protection
- C. Soft and hard pipes
- D. ASON

Answer: A,B,C,D

NEW QUESTION # 71

For the construction of broadband speed up for the buildings that existing radio and television coaxial shafts, such as convenient hotels, school dormitories, etc., which solutions are more suitable? (Multiple Choice)

- A. FTTH
- B. FTTH
- C. D-CMTS
- D. EOC

Answer: C,D

NEW QUESTION # 72

Which of the following does Hardware redundancy of OLT products include?

- A. Power Board
- B. Uplink Port
- C. Service Port
- D. Main Control Board

Answer: A,D

Explanation:

The correct answers are Power Board and Main Control Board. Hardware redundancy is a critical feature of Optical Line Terminal (OLT) products to ensure high availability and fault tolerance in carrier-grade networks.

* Power Board Redundancy: OLTs like the Huawei EA5800 support dual power supplies to prevent downtime in case of a power supply failure. This redundancy is essential for maintaining continuous service delivery.

* Main Control Board Redundancy: The main control board manages system operations and traffic forwarding. Dual control boards ensure that if one fails, the backup takes over seamlessly, minimizing service disruption.

Other options:

* Uplink Port: While uplink ports are critical for connecting the OLT to the core network, they are not typically redundant at the hardware level. Instead, redundancy is achieved through network design (e.g., multiple uplinks).

* Service Port: Service ports connect to ONUs and are not individually redundant. However, the OLT's distributed architecture ensures that a failure in one port does not affect the entire system.

NEW QUESTION # 73

Huawei's video private network transmission network solution can provide large bandwidth and high reliability network requirements.

- A. TRUE
- B. FALSE

Answer: A

NEW QUESTION # 74
