Try C1000-130 Dumps to ensure your success in

exam with money back guarantee.

IBM Cloud Pak for Integration V2021.2 Administration Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which statement is true about the removal of individual subsystems of API Connect on OpenShift or Cloud Pak for Integration?

- A. They can be deleted if API Connect was deployed using a single top level CR.
- B. They can be deleted regardless of the deployment methods.
- **C. They cannot be deleted if API Connect was deployed using a single top level CR.**
- D. They cannot be deleted if API Connect was deployed using a single top level CRM.

Answer: C

Explanation:

In IBM Cloud Pak for Integration (CP4I) v2021.2, when deploying API Connect on OpenShift or within the Cloud Pak for Integration framework, there are different deployment methods:

Single Top-Level Custom Resource (CR) - This method deploys all API Connect subsystems as a single unit, meaning they are managed together. Removing individual subsystems is not supported when using this deployment method. If you need to remove a subsystem, you must delete the entire API Connect instance.

Multiple Independent Custom Resources (CRs) - This method allows more granular control, enabling the deletion of individual subsystems without affecting the entire deployment.

Since the question specifically asks about API Connect deployed using a single top-level CR, it is not possible to delete individual subsystems. The entire deployment must be deleted and reconfigured if changes are required.

- A. NFS
- B. base64
- C. AES128
- **D. Portworx**

Answer: D

Explanation:

<https://www.ibm.com/docs/en/cloud-paks/cp-integration/2020.3?topic=configuration-installation>

NEW QUESTION # 44

Which statement is true about enabling open tracing for API Connect?

- A. This feature is only available in non-production deployment profiles
- B. Trace data can be viewed in Analytics dashboards
- **C. Only APIs using API Gateway can be traced in the Operations Dashboard.**
- D. API debug data is made available in OpenShift cluster logging.

Answer: C

NEW QUESTION # 45

How can OLM be triggered to start upgrading the IBM Cloud Pak for Integration Platform Navigator operator?

- A. Navigate to the Installed Operators, select the Platform Navigator operator and select the latest channel version on the

Subscription tab.

- B. Open the Platform Navigator web interface and select Update from the main menu.
- C. Navigate to the Installed Operators, select the Platform Navigator operator and click the Upgrade button on the Details page.
- D. Navigate to the Installed Operators, select the Platform Navigator operator, select the operand instance, and select Upgrade from the Actions list.

Answer: D

NEW QUESTION # 46

An account lockout policy can be created when setting up an LDAP server for the Cloud Pak for Integration platform. What is this policy used for?

- A. It deletes the user account.
- B. It restricts access to the account if multiple login attempts fail.
- C. It warns the administrator if multiple login attempts fail.
- D. It prompts the user to change the password.

Answer: D

NEW QUESTION # 47
