As long as what you are looking for is high quality and accuracy practice materials, then our GH-300 training guide is your indispensable choices. We are sufficiently definite of the accuracy and authority of our GH-300 practice materials. So lousy materials will lead you end up in failure. They cannot be trusted unlike our GH-300 Study Materials. Come together and our materials will serve as a doable way to strengthen your ability to solve questions on your way to success.

Microsoft GH-300 Exam Syllabus Topics:

Topic	Details
Topic 1	Developer Use Cases for AI: Targeting Software Engineers and Technical Leads, this domain elaborates on how AI improves developer productivity across common tasks like learning new languages, translation, documentation, debugging, data science, and refactoring. It discusses Copilot's support in software development lifecycle management and highlights its limitations. Use of the productivity API to track Copilot's impact is also included.

Topic 2	Domain 4: Prompt Crafting and Prompt Engineering This section measures skills of Software Developers and AI Interaction Designers in effectively crafting prompts to optimize Copilot's output. It reviews foundational concepts such as prompt components, the role of language in prompting, zero-shot vs. few-shot prompting, and how chat history influences responses. Best practices and engineering principles for prompt design and training methods are also covered.
Topic 3	GitHub Copilot Plans and Feature: This domain targets Product Managers and DevOps Engineers and focuses on understanding the various GitHub Copilot subscription plans like Individual, Business, and Enterprise, including distinctions and management features. It covers how Copilot is integrated into IDEs, different triggering methods for code suggestions, organizational policy management, subscription administration via API, and effective use of Copilot Chat and Knowledge Bases. Candidates also learn about CLI usage and configuration.
Topic 4	How GitHub Copilot Works and Handles Data: Designed for Machine Learning Engineers and Data Privacy Specialists, this section covers the data lifecycle and processing behind Copilot's code suggestions. It explains how context is gathered, prompts constructed, responses generated, and post-processed through proxy services. Candidates understand Copilot's data policies, handling of inputs, and limitations such as context window size and data age influencing suggestion relevance.
Topic 5	Responsible :This section of the exam measures skills of AI Ethics Officers and Risk Managers and covers the responsible and ethical usage of AI technologies. It explains the risks and limitations associated with generative AI tools, including biases in training data and the need to validate AI outputs. Candidates learn how to operate AI responsibly by identifying potential harms such as bias, fairness, privacy concerns, and mitigating these harms by applying ethical AI principles.

GH-300 Reliable Test Experience 100% Pass | Latest Microsoft Study GitHub Copilot Reference Pass for sure

Download the free GH-300 demo of whatever product you want and check its quality and relevance by comparing it with other available study contents within your access. GH-300 study guides will prove their worth and excellence. Check also the feedback of our clients to know how our products proved helpful in passing the exam. VCEEngine ensures your success with money back assurance. There is no chance of losing the exam if you rely on GH-300 Study Guides. If you do not get through the exam, you take back your money. The money offer is the best evidence on the remarkable content of GH-300.

Microsoft GitHub Copilot Sample Questions (Q25-Q30):

NEW QUESTION # 25

What are the effects of content exclusions? (Each correct answer presents part of the solution. Choose two.)

- A. The excluded content is no longer used while debugging the code.
- B. The IDE will not count coding suggestions in the excluded content.
- C. GitHub Copilot suggestions are no longer available in the excluded files.
- D. The excluded content is not directly available to GitHub Copilot to use as context.

Answer: C,D

Explanation:

Content exclusions prevent GitHub Copilot from using the excluded content as context and stop suggestions from being generated in those files.

Reference: GitHub Copilot content exclusion documentation.

NEW QUESTION # 26

When can GitHub Copilot still use content that was excluded using content exclusion?

- A. If the contents of an excluded file are referenced in code that is not excluded, for example function calls.
- B. When the repository-level settings allow overrides by the user.
- C. If the content exclusion was configured at the enterprise level, and is overwritten at the organization level.
- D. When the user prompts with @workspace.

Answer: A

Explanation:

"If excluded content is referenced by non-excluded code, such as through function calls, Copilot may still use that reference context."

This confirms that excluded content can indirectly appear if referenced elsewhere.

References: GitHub Copilot content exclusions limitations documentation.

NEW QUESTION # 27

What GitHub Copilot feature can be configured at the organization level to prevent GitHub Copilot suggesting publicly available code snippets?

- A. GitHub Copilot Chat in GitHub Mobile
- B. GitHub Copilot duplication detection filter
- C. GitHub Copilot Chat in the IDE
- D. GitHub Copilot access to Bing

Answer: B

Explanation:

The duplication detection filter can be configured at the organization level to prevent GitHub Copilot from suggesting publicly available code snippets.

NEW QUESTION # 28

Which of the following prompts can be used to guide GitHub Copilot Chat in refactoring code for quality improvements? (Each correct answer presents part of the solution. Choose two.)

- A. "Show me how to improve the readability of this function."
- B. "Predict future coding trends and update my codebase accordingly."
- C. "Suggest ways to enhance the maintainability of this code segment."
- D. "Refactor my application to meet the latest coding standards."

Answer: A,C

Explanation:

Effective prompts for refactoring include requests that focus on specific quality improvements, such as readability and maintainability.

These prompts guide GitHub Copilot to provide relevant and actionable suggestions.

Reference: GitHub Copilot prompt engineering best practices.

NEW QUESTION # 29

Which GitHub Copilot plan allows for prompt and suggestion collection?

- A. GitHub Copilot Codespace
- B. GitHub Copilot Enterprise
- C. GitHub Copilot Business
- D. GitHub Copilot Individuals

Answer: B

Explanation:

GitHub Copilot Enterprise allows for prompt and suggestion collection, enabling organizations to analyze and improve their usage of the tool.

Reference: GitHub Copilot Enterprise data collection documentation.
