## AZ-104 Latest Exam Online - Pass AZ-104 Guide

You want to get the most practical and useful certificate which can reflect your ability in some area. If you choose to attend the test AZ-104 certification buying our AZ-104 study materials can help you pass the test and get the valuable certificate. Our company has invested a lot of personnel, technology and capitals on our products and is always committed to provide the top-ranking AZ-104 Study Materials to the clients and serve for the client wholeheartedly.

## Microsoft Azure Administrator Sample Questions (Q221-Q226):

### NEW QUESTION # 221

You have an Azure Active Directory (Azure AD) tenant that has the initial domain name.

You have a domain name of contoso.com registered at a third-party registrar.

You need to ensure that you can create Azure AD users that have names containing a suffix of @contoso.com.

Which three actions should you perform in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

**Actions**

Configure company branding.

Add an Azure AD tenant.

Verify the domain.

Create an Azure DNS zone.

Add a custom domain name.

Add a record to the public contoso.com DNS zone.

**Answer Area**

**Answer:**

Explanation:

**Actions**

Configure company branding.

Add an Azure AD tenant.

Verify the domain.

Create an Azure DNS zone.

Add a custom domain name.

Add a record to the public contoso.com DNS zone.

**Answer Area**

Add a custom domain name.

Add a record to the public contoso.com DNS zone.

Verify the domain.

Explanation

**Answer Area**

Add a custom domain name.

Add a record to the public contoso.com DNS zone.

Verify the domain.

The process is simple:

- \* Add the custom domain name to your directory
- \* Add a DNS entry for the domain name at the domain name registrar
- \* Verify the custom domain name in Azure AD

References: <https://docs.microsoft.com/en-us/azure/dns/dns-web-sites-custom-domain>

## NEW QUESTION # 222

You have an Azure web app named App1 that has two deployment slots named Production and Staging. Each slot has the unique settings shown in the following table.

| Setting            | Production            | Staging                  |
|--------------------|-----------------------|--------------------------|
| Web sockets        | Off                   | On                       |
| Custom domain name | App1-prod.contoso.com | App1-staging.contoso.com |

You perform a slot swap.

What are the configurations of the Production slot after the swap? To answer, select the appropriate options in the answer area.

NOTE: Each correction is worth one point.

Web sockets:

Custom domain name:   
App1-prod.contoso.com  
App1-staging.contoso.com

**Answer:**

Explanation:

Web sockets:

Custom domain name:   
App1-prod.contoso.com  
App1-staging.contoso.com

Explanation:

Which settings are swapped?

When you clone configuration from another deployment slot, the cloned configuration is editable. Some configuration elements follow the content across a swap (not slot specific), whereas other configuration elements stay in the same slot after a swap (slot specific).

The following lists show the settings that change when you swap slots.

Box 1 : On

Settings that are swapped:

General settings, such as framework version, 32/64-bit, web sockets

App settings (can be configured to stick to a slot)

Connection strings (can be configured to stick to a slot)

Handler mappings

Public certificates

WebJobs content

Hybrid connections \*

Virtual network integration \*

Service endpoints \*

Azure Content Delivery Network \*

Features marked with an asterisk (\*) are planned to be unswapped.

So web sockets settings will be swapped. So Production will have web sockets settings from "Off" to "On" after the swap slot.

Box 2: App1-prod.contoso.com

Settings that aren't swapped:

Publishing endpoints

Custom domain names

Non-public certificates and TLS/SSL settings

Scale settings

WebJobs schedulers

IP restrictions

Always On

Diagnostic settings

Cross-origin resource sharing (CORS)

So Custom domain names will not be swapped. So Production will have Custom domain names of its own after the swap slot.

## Answer Area

Web sockets:

Custom domain name:

<https://docs.microsoft.com/en-us/azure/app-service/deploy-staging-slots#what-happens-during-a-swap>

### NEW QUESTION # 223

You have an Azure subscription that contains the resource groups shown in the following table.

| Name | Lock name | Lock type |
|------|-----------|-----------|
| RG1  | None      | None      |
| RG2  | Lock      | Delete    |

RG1 contains the resources shown in the following table.

| Name     | Type              | Lock name | Lock type |
|----------|-------------------|-----------|-----------|
| storage1 | Storage account   | Lock1     | Delete    |
| VNET1    | Virtual network   | Lock2     | Read-only |
| IP1      | Public IP address | None      | None      |

RG2 contains the resources shown in the following table.

| Name     | Type              | Lock name | Lock type |
|----------|-------------------|-----------|-----------|
| storage2 | Storage account   | Lock1     | Delete    |
| VNET2    | Virtual network   | Lock2     | Read-only |
| IP2      | Public IP address | None      | None      |

You need to identify which resources you can move from RG1 to RG2, and which resources you can move from RG2 to RG1.

Which resources should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Resources that you can move from RG1 to RG2:

Resources that you can move from RG2 to RG1:

Answer:

Explanation:

Microsoft

Resources that you can move from RG1 to RG2:

IP1, VNET1, and storage1 ▼  
None  
IP1 only  
IP1 and storage1 only  
IP1 and VNET1 only  
IP1, VNET1, and storage1

Resources that you can move from RG2 to RG1:

IP2, VNET2, and storage2 ▼  
None  
IP2 only  
IP2 and storage2 only  
IP2 and VNET2 only  
IP2, VNET2, and storage2

Explanation:

Answer Area

Resources that you can move from RG1 to RG2:

IP1, VNET1, and storage1 ▼

Resources that you can move from RG2 to RG1:

IP2, VNET2, and storage2 ▼

### NEW QUESTION # 224

You have an Azure subscription that contains the resources shown in the following table.

| Name       | Type                      | Resource group | Location   |
|------------|---------------------------|----------------|------------|
| RG1        | Resource group            | Not applicable | Central US |
| RG2        | Resource group            | Not applicable | West US    |
| VMSS1      | Virtual machine scale set | RG2            | West US    |
| Proximity1 | Proximity placement group | RG1            | West US    |
| Proximity2 | Proximity placement group | RG2            | Central US |
| Proximity3 | Proximity placement group | RG1            | Central US |

You need to configure a proximity placement group for VMSS1. Which proximity placement groups should you use?

- A. Proximity2 only
- B. Proximity 1 and Proximity3 only
- C. Proximity1 only
- D. Proximity 1, Proximity2, and Proximity3

Answer: A

Explanation:

Explanation

Resource Group location of VMSS1 is the RG2 location, which is West US.

Only Proximity2, which also in RG2, is location in West US

Reference:

<https://azure.microsoft.com/en-us/blog/introducing-proximity-placement-groups/>

### NEW QUESTION # 225

You have an Azure subscription that contains the resources shown in the following table:

| Name  | Type            | Resource group | Tag            |
|-------|-----------------|----------------|----------------|
| RG6   | Resource group  | Not applicable | None           |
| VNET1 | Virtual network | RG6            | Department: D1 |

You assign a policy to RG6 as shown in the following table:

| Section    | Setting           | Value                           |
|------------|-------------------|---------------------------------|
| Scope      | Scope             | Subscription1/RG6               |
|            | Exclusions        | None                            |
| Basics     | Policy definition | Apply tag and its default value |
|            | Assignment name   | Apply tag and its default value |
| Parameters | Tag name          | Label                           |
|            | Tag value         | Value1                          |

To RG6, you apply the tag: RGroup: RG6.

You deploy a virtual network named VNET2 to RG6.

Which tags apply to VNET1 and VNET2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

VNET1:

- None
- Department: D1 only
- Department: D1, and RGroup: RG6 only
- Department: D1, and Label: Value1 only
- Department: D1, RGroup: RG6, and Label: Value1

VNET2:

- None
- RGroup: RG6 only
- Label: Value1 only
- RGroup: RG6, and Label: Value1

**Answer:**

Explanation:

VNET1:

- None
- Department: D1 only
- Department: D1, and RGroup: RG6 only
- Department: D1, and Label: Value1 only
- Department: D1, RGroup: RG6, and Label: Value1

VNET2:

- None
- RGroup: RG6 only
- Label: Value1 only
- RGroup: RG6, and Label: Value1

VNET1: Department: D1, and Label: Value1 only.

Tags applied to the resource group or subscription are not inherited by the resources.

Note: Azure Policy allows you to use either built-in or custom-defined policy definitions and assign them to either a specific resource group or across a whole Azure subscription.

VNET2: Label: Value1 only.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-resource-manager/management/tag-policies>

## NEW QUESTION # 226

.....

The clients can consult our online customer service before and after they buy our Microsoft Azure Administrator guide dump. We provide considerate customer service to the clients. Before the clients buy our AZ-104 cram training materials they can consult our online customer service personnel about the products' version and price and then decide whether to buy them or not. After the clients buy the AZ-104 study tool they can consult our online customer service about how to use them and the problems which occur during the process of using. If the clients fail in the test and require the refund our online customer service will reply their requests quickly and deal with the refund procedures promptly. In short, our online customer service will reply all of the clients' questions about the AZ-104 cram training materials timely and efficiently.
