

Free PDF Newest NSE7_EFW-7.2 - Exam Fortinet NSE 7 - Enterprise Firewall 7.2 Questions Fee

P.S. Free & New NSE7_EFW-7.2 dumps are available on Google Drive shared by Getcertkey: https://drive.google.com/open?id=1sk0GEejHnYk1jwKEWhNF6gnZ_jzNyqi2

With the help of NSE7_EFW-7.2 study materials, you can conduct targeted review on the topics which to be tested before the exam, and then you no longer have to worry about the problems that you may encounter a question that you are not familiar with during the exam. With NSE7_EFW-7.2 study materials, you will not need to purchase any other review materials. We have hired professional IT staff to maintain NSE7_EFW-7.2 Study Materials and our team of experts also constantly updates and renew the question bank according to changes in the syllabus. With NSE7_EFW-7.2 study materials, you can study at ease, and we will help you solve all the problems that you may encounter in the learning process.

Fortinet NSE7_EFW-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Security profiles: Using FortiManager as a local FortiGuard server is discussed in this topic. Moreover, it delves into configuring web filtering, application control, and the intrusion prevention system (IPS) in an enterprise network.
Topic 2	<ul style="list-style-type: none">VPN: Implementing IPsec VPN IKE version 2 is discussed in this topic. Additionally, it delves into implementing auto-discovery VPN (ADVPN) to enable on-demand VPN tunnels between sites.
Topic 3	<ul style="list-style-type: none">System configuration: This topic discusses Fortinet Security Fabric and hardware acceleration. Furthermore, it delves into configuring various operation modes for an HA cluster.
Topic 4	<ul style="list-style-type: none">Routing: It covers implementing OSPF to route enterprise traffic and Border Gateway Protocol (BGP) to route enterprise traffic.
Topic 5	<ul style="list-style-type: none">Central management: The topic of Central management covers implementing central management.

NSE7_EFW-7.2 Authorized Pdf - NSE7_EFW-7.2 Certification Exam Cost

Do you have registered for Fortinet NSE7_EFW-7.2 exam? With the drawing near of the examination, I still lack of confidence to pass NSE7_EFW-7.2 test. Then I have not enough time to read reference books. About the above problem, how should I do? Is there shortcut to pass the exam? Do you have such a mood like that, now? There is no need for hurry. Even if the examination time is near, you are also given the opportunity to prepare for NSE7_EFW-7.2 Certification test. And what is the opportunity? It is Getcertkey NSE7_EFW-7.2 dumps which is the most effective materials and can help you prepare for the exam in a short period of time. What's more, Getcertkey practice test materials have a high hit rate. 100% satisfaction guarantee! As well as you memorize these questions and answers in our dumps, you must pass Fortinet NSE7_EFW-7.2 certification.

Fortinet NSE 7 - Enterprise Firewall 7.2 Sample Questions (Q10-Q15):

NEW QUESTION # 10

Examine the output of the 'get router info ospf interface' command shown in the exhibit; then answer the question below.

```

# get router info ospf interface port4
port4 is up, line protocol is up
  Internet Address 172.20.121.236/24, Area 0.0.0.0, MTU 1500
  Process ID 0, Router ID 0.0.0.4, Network Type BROADCAST, Cost: 1
  Transmit Delay is 1 sec, State DROther, Priority 1
  Designated Router (ID) 172.20.140.2, Interface Address 172.20.121.2
  Backup Designated Router (ID) 0.0.0.1, Interface Address
  172.20.121.239
  Timer intervals configured, Hello 10.000, Dead 40, Wait 40, Retransmit
  5
    Hello due in 00:00:05
  Neighbor Count is 4, Adjacent neighbor count is 2
  Crypt Sequence Number is 411
  Hello received 106, sent 27, DD received 7 sent 9
  LS-Reg received 2 sent 2, LS-Upd received 7 sent 5
  LS-Ack received 4 sent 3, Discarded 1
```

Which statements are true regarding the above output? (Choose two.)

- A. The local FortiGate has been elected as the OSPF backup designated router
- B. The port4 interface is connected to the OSPF backbone area.
- C. There are at least 5 OSPF routers connected to the port4 network.
- D. Two OSPF routers are down in the port4 network.

Answer: B,C

Explanation:

On BROADCAST network there are 4 neighbors, among which 1*DR +1*BDR. So our FG has 4 neighbors, but create adjacency only with 2 (with DR and BDR). 2 neighbors DROther (not down).

NEW QUESTION # 11

Exhibit.

```
# diagnose webfilter fortiguard cache dump

Saving to file [/tmp/urcCache.txt]
Cache Contents:
FORTINET
Cache Mode: TTL
Cache DB Ver: 23.6106

Domain |IP      DB Ver  T URL
34000000|34000000 23.6106 P Http://training.fortinet.com/
25000000|25000000 23.6106 E Https://twitter.com/...

# get webfilter categories
...
g07 General Interest - Business:
    31 Finance and Banking
...
    51 Government and Legal Organizations
    52 Information Technology
```

Refer to the exhibit, which shows the output from the webfilter fortiguard cache dump and webfilter categories commands. Using the output, how can an administrator determine the category of the training.fortinet.com website?

- A. The administrator must add both the Pima in and Iphex values of 34 to get the category number
- B. The administrator must convert the first two digits of the Domain hex value to a decimal value
- C. The administrator can look up the hex value of 34 in the second command output.
- D. The administrator must convert the first three digits of the IP hex value to binary

Answer: C

Explanation:

Option B is correct because the administrator can determine the category of the training.fortinet.com website by looking up the hex value of 34 in the second command output. This is because the first command output shows that the domain and the IP of the website are both in category (Hex) 34, which corresponds to Information Technology in the second command output¹.

Option A is incorrect because the administrator does not need to convert the first three digits of the IP hex value to binary. The IP hex value is already in the same format as the category hex value, so the administrator can simply compare them without any conversion².

Option C is incorrect because the administrator does not need to add both the Pima in and Iphex values of 34 to get the category number. The Pima in and Iphex values are not related to the category number, but to the cache TTL and the database version respectively³.

Option D is incorrect because the administrator does not need to convert the first two digits of the Domain hex value to a decimal value. The Domain hex value is already in the same format as the category hex value, so the administrator can simply compare them without any conversion². Reference: =

1: Technical Tip: Verify the webfilter cache content⁴

2: Hexadecimal to Decimal Converter⁵

3: FortiGate - Fortinet Community⁶

4: Web filter | FortiGate / FortiOS 7.2.0 - Fortinet Documentation⁷

NEW QUESTION # 12

Exhibit.

```

config vpn ipsec phase1-interface
edit "tunnel"
    set interface "port1"
    set ike-version 2
    set keylife 28800
    set peertype any
    set net-device enable
    set proposal aes256gcm-prfsha256 aes256gcm-prfsha384
    set auto-discovery-receiver enable
    set remote-gw 100.64.1.1
    set psksecret fortinet
next

```

Refer to the exhibit, which contains the partial ADVPN configuration of a spoke.

Which two parameters must you configure on the corresponding single hub? (Choose two.)

- A. Set auto-discovery-sender enable
- B. Set auto-discovery-forwarder enable
- C. Set ike-version 2
- D. Set auto-discovery-receiver enable

Answer: A,D

Explanation:

The hub must be configured to send (A) and receive (D) auto-discovery messages to establish ADVPN shortcuts with spokes.

Reference: = ADVPN | FortiManager 7.2.0 - Fortinet Documentation

NEW QUESTION # 13

Refer to the exhibit, which contains a TCL script configuration on FortiManager.

Type	TCL Script
Run script on	Remote FortiGate ...
Script details	<pre> #!/ proc do_cmd {cmd} { puts [exec "\$cmd\n" "# 10"] } run_cmd "config system interface " run_cmd "edit port1" run_cmd "set ip 10.0.1.10 255.255.255.0" run_cmd "next" run_cmd "end" </pre>

An administrator has configured the TCL script on FortiManager, but the TCL script failed to apply any changes to the managed device after being run.

Why did the TCL script fail to make any changes to the managed device?

- A. The TCL procedure run_cmd has not been created.
- B. The TCL script must start with #include.
- C. There is no corresponding #! to signify the end of the script.
- D. The TCL procedure lacks the required loop statements to iterate through the changes.

Answer: A

NEW QUESTION # 14

Refer to the exhibit, which contains a partial BGP combination.

```

config router bgp
  set as 65200
  set router-id 172.16.1.254
  config neighbor
    edit 100.64.1.254
      set remote-as 65100
    next
  end
end

```

You want to configure a loopback as the OGP source.

Which two parameters must you set in the BGP configuration? (Choose two)

- A. update-source
- B. recursive-next-hop
- C. ibgp-enforce-multihop
- D. ebgp-enforce-multihop

Answer: A,D

Explanation:

To configure a loopback as the BGP source, you need to set the "ebgp-enforce-multihop" and "update-source" parameters in the BGP configuration. The "ebgp-enforce-multihop" allows EBGp connections to neighbor routers that are not directly connected, while "update-source" specifies the IP address that should be used for the BGP session.

NEW QUESTION # 15

.....

With the intense competition in labor market, it has become a trend that a lot of people, including many students, workers and so on, are trying their best to get a NSE7_EFW-7.2 certification in a short time. They all long to own the useful certification that they can have an opportunity to change their present state, but they also understand that it is not easy for them to get a NSE7_EFW-7.2 Certification in a short time. If you are the one of the people who wants to pass the NSE7_EFW-7.2 exam and get the certificate, we are willing to help you solve your problem with our wonderful NSE7_EFW-7.2 study guide.
