

Free PDF Oracle - 1Z0-1042-25 Newest Valid Test Syllabus

Oracle 1z0-1082-22 Exam Syllabus Topics:

Topic	Details
Topic 1	- Describe logic accounts and identify use cases - Perform model and rule data validation
Topic 2	- Creating and Managing Allocations - Oracle EPM Cloud Foundation - Manage the Point of View (POV)
Topic 3	- Describe Profitability and Cost Management system architecture and requirements - Create application with dimensions from flat files
Topic 4	- Perform rule balancing for application validation - Describe Profitability and Cost Management essential concepts
Topic 5	- Describe types of queries run from the Intelligence Panel - Perform batch processing - define batch, execute batch, schedule job
Topic 6	- Set up definitions for import format, locations, period mappings, category mappings - Perform a Pre-Update Analysis and Update Dimensions

Oracle Profitability and Cost Management 2022 Implementation Professional Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which are valid parts of an Analysis View Definition?

- A. a Row Dimension and multiple Column Dimensions
- B. a Row Dimension and a Column Dimension and a Rule Set
- C. a Row Dimension and a Column Dimension
- D. a Row Dimension and multiple Column Dimensions and a Rule Set
- E. a Row Dimension and a Column Dimension and a range of Rule Sets

Answer: E

NEW QUESTION # 13

Given the following possible actions:

- Register a Source System
- Register a Target Application
- Create an Import Format
- Define a Location
- Create a Point of View
- Define mappings for Period and Category
- Define mappings for all dimensions
- Define mappings for only those dimensions requiring mappings
- Create a Data Load Rule

What are the required steps in Data Management to create a data Integration for Profitability and Cost Management?

- A. 1,2,3,4,8,9

P.S. Free 2025 Oracle 1Z0-1042-25 dumps are available on Google Drive shared by ITdumpsfree: <https://drive.google.com/open?id=1EtqsLbOyt6sIGTCIpuDR51OEYd47tYqa>

ITdumpsfree's braindumps provide you the gist of the entire syllabus in a specific set of questions and answers. These study questions are most likely to appear in the actual exam. The Certification exams are actually set randomly from the database of 1Z0-1042-25. Thus most of the questions are repeated in 1Z0-1042-25 Exam and our experts after studying the previous exam have sorted out the most important questions and prepared dumps out of them. Hence ITdumpsfree's dumps are a special feast for all the exam takers and sure to bring them not only exam success but also maximum score.

Oracle 1Z0-1042-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Creating Orchestrated Integrations: This section tests the knowledge of Orchestration Developers and Business Process Analysts in managing orchestrated integrations within OIC. It includes using lookups, data mappers, and custom JavaScript libraries, configuring orchestration flow actions, implementing file handling options, and leveraging the fault-handling framework to manage errors effectively.

Topic 2	Getting Started with OIC Integrations: This section of the exam measures the skills of Integration Specialists and Cloud Engineers in understanding the foundational components of Oracle Integration Cloud (OIC). It covers key integration concepts, how integrations work, and web services fundamentals such as WSDL, SOAP, REST, and JSON. The focus is on building a strong understanding of OIC's integration capabilities.
Topic 3	Testing, Monitoring, and Troubleshooting Integrations: This section assesses the abilities of Support Engineers and Integration Administrators in managing integration lifecycles. It includes activating and deactivating integrations, testing REST-triggered integrations, importing and exporting integrations, as well as monitoring and troubleshooting integration instances to ensure smooth operations.
Topic 4	Creating Scheduled Integrations: This domain measures the skills of Automation Engineers and Cloud Administrators in defining integration schedules and converting scheduled integrations to app-driven ones. It also includes using scheduled parameters to automate workflows efficiently.
Topic 5	Using OIC Connections & Adapters: This section evaluates the expertise of Integration Developers and Solution Architects in creating and configuring OIC connections. It includes setting up trigger and invoke connections, understanding the role of the Connectivity Agent, and effectively using adapters to connect cloud and on-premises applications seamlessly.

Pass Guaranteed 2025 1Z0-1042-25: Oracle Cloud Infrastructure 2025 Application Integration Professional High Hit-Rate Valid Test Syllabus

The ITdumpsfree is one of the top-rated and renowned platforms that have been offering real and valid Oracle Cloud Infrastructure 2025 Application Integration Professional (1Z0-1042-25) practice test questions for many years. During this long time period countless Oracle Cloud Infrastructure 2025 Application Integration Professional (1Z0-1042-25) exam candidates have passed their dream Oracle Cloud Infrastructure 2025 Application Integration Professional (1Z0-1042-25) certification exam and they are now certified Oracle professionals and pursuing a rewarding career in the market.

Oracle Cloud Infrastructure 2025 Application Integration Professional Sample Questions (Q18-Q23):

NEW QUESTION # 18

To use Integration Insight to map milestones to actions in an Oracle Integration Cloud (OIC) business process implementation, certain prerequisites and conditions must be met.

Which is NOT a valid consideration for models and mapping milestones?

- A. Extraction criteria for the instance unique identifier is defined with an XPath extension.
- B. Extraction criteria for the milestone indicator is defined with an XPath expression.
- C. The model must be in Draft state in order to map a milestone to an integration action.
- **D. A business process implementation can be mapped to milestones within only one model.**
- E. Milestones in a single model can be mapped to multiple business processes.

Answer: D

Explanation:

A business process implementation can be mapped to milestones across multiple models, making B the incorrect statement. Milestones can be used in complex scenarios, shared between processes, and can be identified with XPath expressions.

NEW QUESTION # 19

Your team is responsible for an OIC package that contains five integrations. Currently, three of these integrations are active while the other two are inactive. Which statement is valid if you were to replace a connection used in this package?

- A. You can only replace the connections used by the three active integrations.
- B. You cannot replace connections unless all integrations in the package are in an active state.
- **C. You cannot replace connections unless all integrations in the package are in an inactive state.**
- D. You can only replace the connections used by the two inactive integrations.

Answer: C

Explanation:

Comprehensive and Detailed Explanation:

OIC packages group integrations:

Option A: True-replacing a connection requires all dependent integrations to be inactive to avoid runtime conflicts.

Option B: False-active integrations can't have connections replaced without deactivation.

Option C: False-replacement isn't limited to inactive ones; all must be inactive.

Option D: False-active state prevents replacement, opposite of the requirement.

A ensures stability during configuration changes.

NEW QUESTION # 20

Which Oracle Integration (OIC) XPath function can be used to retrieve data from an OIC Lookup within the Map Editor?

- A. get-value-from-lookup
- B. get-content-as-string
- C. getLookup
- **D. lookupValue**

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

XPath in Mapper:

D: True-lookupValue retrieves lookup data.

NEW QUESTION # 21

When leveraging the Oracle Integration (OIC) Connectivity Agent for high availability on-premises environments, which two are valid considerations?

- A. You should install the connectivity agents on the same host as the target application, and then specify different Agent group identifiers for each Agent during its installation.
- B. Since the File Adapter is not supported in high-availability environments, you must use an Agent Group that uses only one installed active Agent.
- C. Each host on which the agent is installed must be configured on separate subnets and assigned to the same OIC Agent group.
- **D. You must have the OIC ServiceDeployer role or higher permissions to download and install the OIC Connectivity Agent.**
- **E. You cannot have more than two Agent instances per Agent group. Attempting to include a third Agent instance in the same group during installation results in an error.**

Answer: D,E

Explanation:

Comprehensive and Detailed Explanation:

HA Agent:

E, B: True-two-agent limit, role requirement.

NEW QUESTION # 22

As an integration developer, you are implementing an integration in Oracle Integration (OIC) to transform a payload with multiple orders. You have decided to leverage the For Each action to loop through each order and process them individually. How do you configure the For Each action to support this scenario?

- **A. Select the Repeating Element field and map the source element that contains the orders.**

- Answer: A**

C:True-map repeating element for iteration.
