

Free PDF Oracle - High Pass-Rate New 1Z0-771 Test Tips

P.S. Free & New 1Z0-771 dumps are available on Google Drive shared by Dupleader: https://drive.google.com/open?id=18I_iGrOGnjkyIhaStDCFCt12comqW0X

Our 1Z0-771 practice materials not only apply to students, but also apply to office workers; not only apply to veterans in the workplace, but also apply to newly recruited newcomers. Our 1Z0-771 study materials use a very simple and understandable language, to ensure that all people can learn and understand. Our 1Z0-771 real test also allows you to avoid the boring of textbook reading, but let you master all the important knowledge in the process of doing exercises. And the high pass rate of our 1Z0-771 exam questions is more than 98%. Why not have a try on our 1Z0-771 study guide?

An Oracle APEX Cloud Developer Professional (1Z0-771) practice questions is a helpful, proven strategy to crack the Oracle 1Z0-771 exam successfully. It helps candidates to know their weaknesses and overall performance. Dupleader has hundreds of Oracle APEX Cloud Developer Professional (1Z0-771) exam dumps that are useful to practice in real time. The Oracle 1Z0-771 practice questions have a close resemblance with the actual 1Z0-771 exam.

100% Pass Professional Oracle - 1Z0-771 - New Oracle APEX Cloud Developer Professional Test Tips

Dupleader has become the front-runner of this career and help exam candidates around the world win in valuable time. With years of experience dealing with 1Z0-771 exam, they have thorough grasp of knowledge which appears clearly in our 1Z0-771 exam questions. All 1Z0-771 study materials you should know are written in them with three versions to choose from. In case there are any changes happened to the 1Z0-771 Exam, the experts keep close eyes on trends of it and compile new updates constantly. It means we will provide the new updates freely for you later.

Oracle 1Z0-771 Exam Syllabus Topics:

Topic	Details
Topic 1	Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Topic 2	Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.

Topic 3	• Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Topic 4	• Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 5	• Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 6	• Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Topic 7	• Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Topic 8	• Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Topic 9	• Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Topic 10	• Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Topic 11	• Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Topic 12	• Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 13	• Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.

Oracle APEX Cloud Developer Professional Sample Questions (Q54-Q59):

NEW QUESTION # 54

Which is NOT an available Geometry Column data type for the map region?

- A. GeoJSON
- B. SDO_GEOMETRY
- C. JSON OBJECT
- D. Latitude/Longitude

Answer: C

Explanation:

The Map Region in APEX supports spatial data via:

GeoJSON: A JSON-based standard for geographic data (e.g., points, polygons).

SDO_GEOMETRY: Oracle's native spatial data type for storing geometry (e.g., SDO_GEOMETRY(2001, 4326,

SDO_POINT_TYPE(-122, 37, NULL), NULL, NULL)).

Latitude/Longitude: Separate columns for lat/long coordinates, mapped to points.

JSON OBJECT: Not a supported geometry type; while JSON can store data, it's not a specific spatial format recognized by the Map Region without GeoJSON structure.

This ensures compatibility with Oracle Spatial and common GIS standards.

NEW QUESTION # 55

An application includes a form on the EMPLOYEES table. You must limit the P1_MANAGER page item so users can select a single employee name and ID from the corresponding manager ID in the same table. Which item type can be used to display P1_MANAGER?

- A. Checkbox
- B. Switch
- C. **Popup LOV**

Answer: C

Explanation:

The requirement is to allow users to pick a single employee (name and ID) from a list tied to the MANAGER_ID column in the EMPLOYEES table, implying a dynamic, searchable selection:

A . Popup LOV: This item type displays a popup window with a searchable list of values, sourced from a SQL query (e.g., SELECT ename, empno FROM employees WHERE empno IN (SELECT DISTINCT manager_id FROM employees)). It returns a single value (e.g., EMPNO) while displaying the name, perfectly meeting the need for a single selection from a related dataset.

B . Switch: A toggle (Yes/No), unsuitable for selecting from a list of employees.

C . Checkbox: Allows multiple selections, conflicting with the "single employee" requirement.

Practical note: Popup LOVs enhance usability with filtering and pagination, ideal for large employee lists, and support returning the ID while showing the name.

NEW QUESTION # 56

Which client credentials are used for authentication during the 'Check Syntax' process?

- A. **Database schema credentials**
- B. APEX Workspace Admin credentials
- C. APEX Developer credentials

Answer: A

Explanation:

The "Check Syntax" process in APEX, typically used in SQL Workshop or when validating code, authenticates using Database schema credentials. These are the credentials of the schema associated with the APEX workspace (e.g., username/password of the schema like "HR"). This ensures the process has access to parse and validate SQL or PL/SQL against the database objects in that schema.

APEX Workspace Admin credentials: These are for managing workspaces, not executing database-level syntax checks.

APEX Developer credentials: These authenticate developers into the APEX IDE, not the database runtime environment.

This design aligns with APEX's security model, where database operations are tied to the schema, ensuring accurate validation and error reporting (e.g., missing privileges or invalid objects).

NEW QUESTION # 57

Which two Plugin types can be created in Oracle APEX?

- A. Validation
- B. Email Template
- C. **Process**
- D. **Region**

Answer: C,D

Explanation:

Plugins extend APEX's functionality beyond built-in components:

C . Process: A Process plugin executes custom server-side logic (e.g., PL/SQL) during page processing or AJAX calls. Example: A plugin to sync data with an external API after form submission. It's defined with execution points and parameters.

D . Region: A Region plugin creates custom UI areas (e.g., a dynamic chart or carousel). Example: A plugin rendering a custom dashboard. It supports attributes, templates, and refresh events.

A . Validation: While validations are customizable, they're not a plugin type; they're declarative or PL/SQL-based within APEX.

B . Email Template: Email formatting is handled via APEX_MAIL or templates in Shared Components, not as plugins.

Technical Insight: Plugins are created in Shared Components > Plug-ins, requiring PL/SQL for logic, JavaScript/CSS for UI, and a render function. For instance, a Region plugin might use apex_plugin.t_region to define its output.

Use Case: A Process plugin to log audit trails or a Region plugin for a unique data visualization.

Pitfall: Developing plugins requires advanced skills; test thoroughly to avoid runtime errors.

NEW QUESTION # 58

You use the Create Page Wizard to create a faceted search page on the EMP table. What is the default report type generated for this page?

- **A. Interactive Report**
- B. Interactive Grid
- C. Column Toggle Report
- D. Classic Report

Answer: A

Explanation:

When creating a faceted search page via the Create Page Wizard, the default report type is an Interactive Report. This pairs with the faceted search region to provide a searchable, filterable, and customizable report, leveraging the facets for dynamic filtering.

NEW QUESTION # 59

.....

It would be really helpful to purchase Oracle APEX Cloud Developer Professional exam dumps right away. If you buy this Oracle Certification Exams product right now, we'll provide you with up to 1 year of free updates for 1Z0-771 authentic questions. You can prepare using these no-cost updates in accordance with the most recent test content changes provided by the 1Z0-771 Exam Dumps. The 1Z0-771 actual questions we sell also come with a free demo.
