

Free PDF Oracle - Trustable 1z0-1080-25 - Oracle Planning 2025 Implementation Professional Useful Dumps

BONUS!!! Download part of VCEPrep 1z0-1080-25 dumps for free: https://drive.google.com/open?id=1_pCwNbodfC2qKVmUtY8VXO-mJo8DYO_

The language of our 1z0-1080-25 qualification test guide is simple. The learners may come from many social positions and their abilities to master our 1z0-1080-25 test materials are varied. Based on this consideration we apply the most simple and easy-to-be-understood language to help the learners no matter he or she is the students or the in-service staff, the novice or the experienced employee which have worked for many years. 1z0-1080-25 Certification guide use the simple language to explain the answers and detailed knowledge points to help pass the 1z0-1080-25 exam.

Oracle 1z0-1080-25 Exam Syllabus Topics:

Topic	Details
Topic 1	Identify metadata and data load options: This section of the exam measures the skills of a Planning Administrator and introduces options available for importing and managing metadata and data within the system.
Topic 2	Describe Planning features: This section of the exam measures the skills of an EPM Consultant and focuses on recognizing key Planning features that help organizations manage and analyze financial data efficiently.
Topic 3	Planning Overview: This section of the exam measures the skills of an EPM Consultant and covers the general features of Planning. It includes how Planning works, its core capabilities, and how it fits into enterprise performance management.
Topic 4	Create and manage navigation flows: This section of the exam measures the skills of an EPM Consultant and involves organizing navigation flows to simplify user interaction in Planning.

Topic 5	• Introduction to Planning Modules: This section of the exam measures the skills of an EPM Consultant and introduces the available Planning modules, their integration, and use cases.
Topic 6	• Create Reports: This section of the exam measures the skills of a Planning Administrator and involves creating reports that summarize planning activities and outcomes.
Topic 7	• Design forms and dashboards: This section of the exam measures the skills of an EPM Consultant and covers designing planning input forms and visual dashboards to support decision-making.
Topic 8	• Explain required and user-defined dimensions; how dimension hierarchies impact Planning
Topic 9	• This section of the exam measures the skills of a Planning Administrator and includes understanding how standard and custom dimensions are used, and how dimension hierarchies affect planning structure and outcomes.
Topic 10	• Assign access permissions to artifacts and cells in Planning: This section of the exam measures the skills of a Planning Administrator and involves granting permissions to users for accessing specific Planning objects and data.
Topic 11	• Map data across applications: This section of the exam measures the skills of an EPM Consultant and includes how to map and align data structures between Planning and other connected applications.
Topic 12	• Import and export metadata into Planning: This section of the exam measures the skills of a Planning Administrator and involves understanding how to bring metadata in and out of Planning applications.
Topic 13	• Explain the benefits of using Groovy Rules: This section of the exam measures the skills of an EPM Consultant and explains how Groovy scripting enhances rule flexibility and performance.
Topic 14	• Report on EPM data: This section of the exam measures the skills of a Planning Administrator and covers using reporting tools to analyze data stored in EPM applications.
Topic 15	• Create and run data integrations: This section of the exam measures the skills of an EPM Consultant and involves building data integration flows between different data sources and Planning.
Topic 16	• Manage Rules: This section of the exam measures the skills of an EPM Consultant and covers designing and managing business logic using rules and rulesets to automate calculations.
Topic 17	• Report on Planning Data: This section of the exam measures the skills of a Planning Administrator and focuses on generating reports to analyze and present Planning data effectively.
Topic 18	• Set up Planning and FreeForm Applications: This section of the exam measures the skills of a Planning Administrator and involves setting up Planning applications, including FreeForm apps, to support flexible planning and modeling needs.
Topic 19	• Design business rules and rulesets: This section of the exam measures the skills of an EPM Consultant and focuses on creating logic structures to perform calculations and automate processes in Planning.

Free PDF Quiz 2025 Oracle 1z0-1080-25 – Efficient Useful Dumps

To make sure your situation of passing the Oracle Planning 2025 Implementation Professional certificate efficiently, our 1z0-1080-25 practice materials are compiled by first-rank experts. So the proficiency of our team is unquestionable. They help you review and stay on track without wasting your precious time on useless things. They handpicked what the 1z0-1080-25 Study Guide usually tested in exam recent years and devoted their knowledge accumulated into these 1z0-1080-25 actual tests. We are on the same team, and it is our common wish to help your realize it. So good luck!

Oracle Planning 2025 Implementation Professional Sample Questions (Q46-Q51):

NEW QUESTION # 46

You want to customize the business process interface. Which Planning feature enables you to customize the vertical and horizontal tabs that are displayed on a card?

- A. Configure
- B. Infolets
- C. Navigation flows
- D. Valid intersections

Answer: C

NEW QUESTION # 47

Your administrator set up a Planning job using the integration Pipeline job type. Which statement about using Pipeline is true?

- A. Pipelines structure the workflow and formalize authority levels as you prepare budget data.
- B. Pipelines structure provide quick insights into data that guide your decision and actions.
- C. Pipelines give you an overview to key information and let you enter changes and save data.
- D. Pipelines help you to organize, track and prioritize your workload.
- E. Pipelines help you to orchestrate Oracle Enterprise Performance Management Cloud jobs across instance from one location.

Answer: E

NEW QUESTION # 48

Which two statements describe types of insights that can be configured?

- A. Revel hidden bias in forecast submitted by planners by analyzing historical data
- B. Assign a range of possible value to inputs that are uncertain and analyze how that uncertainty affects related accounts
- C. Either user a prebuilt forecasting method or a freeform formula that you build
- D. Detected outlier values that vary widely from other values

Answer: A,D

NEW QUESTION # 49

With Machine Learning, which type of prediction would you define to predict revenue using several input variables such as price, promotions, industry market size, and climate?

- A. Source Prediction
- B. Forecast Prediction
- C. Dimension Prediction
- D. Multivariate Prediction

Answer: D

Explanation:

In Oracle Planning 2024's Machine Learning capabilities, particularly with the "Bring Your Own ML" feature, predictions can be defined based on the type of analysis required. To predict revenue using multiple input variables such as price, promotions, industry market size, and climate, the appropriate prediction type is:

- * A. Dimension Prediction: Incorrect. This type is not a standard term in Oracle's ML framework for Planning; it suggests predicting across dimensions, which isn't specific to multi-variable revenue prediction.
- * B. Source Prediction: Incorrect. This is not a defined prediction type in Oracle Planning's ML documentation; it might imply source data analysis, but it's not applicable here.
- * C. Forecast Prediction: Incorrect. While forecasting involves predicting future values, "Forecast Prediction" is not a specific ML type in Oracle, and it doesn't emphasize the use of multiple variables.

* D. Multivariate Prediction: Correct. Multivariate prediction involves using multiple input variables (e.g., price, promotions, market size, climate) to predict an outcome (e.g., revenue). Oracle's ML integration supports importing PMML models that handle multivariate analysis, aligning with this scenario. The Oracle documentation confirms that Multivariate Prediction is the type suited for complex predictions with several input variables, making D the correct answer.

NEW QUESTION # 50

You want to allocate project expenses to one or more capital assets.

Which two statements describe what you need to set up in Projects or Capital to share the data?

- A. In Capital, under Expenses, select Integration from Projects.
- B. In Capital, on the Enable page, in Map/Rename Dimensions, add a custom dimension called Project.
- C. In Projects, under Expenses, select Integration with Capital.
- D. In Projects, on the Enable page, enable projects of type Capital.

Answer: C,D

Explanation:

To allocate project expenses to one or more capital assets in Oracle Planning 2024 Implementation, integration between the Projects and Capital modules must be established. Two specific setup steps are required to enable this data sharing:

* B. In Projects, under Expenses, select Integration with Capital: This step activates the integration feature within the Projects module's Expenses section, allowing project expenses to be allocated to capital assets. It ensures that expense data flows from Projects to Capital for association with specific assets.

* D. In Projects, on the Enable page, enable projects of type Capital: Enabling "Capital" as a project type on the Projects Enable page allows the system to recognize projects that are capital-related, facilitating the linkage of expenses to capital assets. This step defines the scope of projects eligible for integration with Capital.

* A. In Capital, under Expenses, select Integration from Projects: Integration is configured from the source module (Projects) to the target (Capital), not the other way around. Capital receives data but does not initiate the integration.

* C. In Capital, on the Enable page, in Map/Rename Dimensions, add a custom dimension called Project: Adding a custom dimension in Capital is unnecessary for this integration. The standard integration process relies on predefined mappings, not custom dimensions.

Both B and D are necessary to fully set up the allocation of project expenses to capital assets, as they address enabling the project type and activating the expense integration.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Administering Projects - Integration with Capital" (docs.oracle.com, updated 2024). Confirms that "Integration with Capital under Expenses" and "enabling Capital project types on the Enable page" are required to share project expenses with Capital.

* Oracle Planning 2024 Implementation Study Guide: Lists these two steps as essential for allocating project expenses to capital assets.

NEW QUESTION # 51

.....

For the purposes of covering all the current events into our 1z0-1080-25 study guide, our company will continuously update our training materials. And after payment, you will automatically become the VIP of our company, therefore you will get the privilege to enjoy free renewal of our 1z0-1080-25 practice test during the whole year. No matter when we have compiled a new version of our training materials our operation system will automatically send the latest version of the 1z0-1080-25 Preparation materials for the exam to your email, all you need to do is just check your email then download it.
