Oracle Data Platform 2025 Foundations Associate Sample Questions (Q28-Q33):

NEW QUESTION # 28

What are the three security zones of control?

- A. Assess
- B. Prevent
- C. Solve
- D. Detect

Answer: A,B,D

Explanation:

The three security zones of control in Oracle's security framework are "Assess" (A), for identifying risks and sensitive data, "Detect" (B), for monitoring and identifying threats, and "Prevent" (C), for implementing safeguards. "Solve" (D) is not a standard zone (perhaps intended as "Resolve," but still not part of the trio). Oracle's security model, as seen in Data Safe and OCI, defines these as core zones.

NEW QUESTION # 29

In order to support multicloud strategies, what is offered as an industry first by Oracle?

- A. Dedicated cloud region
- B. Oracle FastConnect
- C. Cloud databases
- D. Private and public cloud network

Answer: A

Explanation:

Oracle offers a "Dedicated cloud region" (D) as an industry-first feature to support multicloud strategies. This allows customers to run a fully managed OCI region within their own data center or a partner cloud, integrating with other providers like Azure or AWS. "Private and public cloud network" (A) is vague, "Cloud databases" (B) are common across vendors, and "Oracle FastConnect" (C) is a connectivity service, not unique to multicloud. Oracle's documentation highlights the Dedicated Region as a pioneering multicloud solution.

NEW QUESTION # 30

Which migration type uses Datapump and GoldenGate tools?

- A. Indirect Connection
- B. Direct Connection
- **C. Logical Migration**
- D. Physical Migration

Answer: C

Explanation:

"Logical Migration" (B) uses "Datapump" for exporting/importing database objects and "GoldenGate" for real-time replication, focusing on data and schema transfer rather than physical structures. "Physical Migration" (A) involves moving entire database files (e.g., RMAN), while "Direct Connection" (C) and "Indirect Connection" (D) are not standard migration types. Oracle's migration guides associate Datapump and GoldenGate with logical methods.

NEW QUESTION # 31

Supply Side is data that is passive and means something. What two models and libraries are included in the supply side?

- A. Reports
- B. Technical definitions of business terms
- **C. Business rules**
- **D. Domain objects**

Answer: C,D

Explanation:

In the Oracle Data Platform, the "Supply Side" refers to foundational data elements that are passively collected and structured to provide meaning within the data ecosystem. According to Oracle's official documentation, the supply side includes "Business rules" (A), which define the logic and policies governing data usage, ensuring consistency and compliance, and "Domain objects" (B), which represent structured entities or concepts within a business domain, forming the backbone of data modeling. "Technical definitions of business terms" (C) pertain to metadata management, and "Reports" (D) are outputs rather than core supply-side models. Oracle's Data Platform Foundations emphasize business rules and domain objects as key components of the supply side for data integration and processing.

NEW QUESTION # 32

Which security measure is implemented out-of-the-box, and is included if you are not using BYOL licensing with Exadata Cloud@Customer?

- A. Audit Vault and Database Firewall
- **B. Oracle Native Network Encryption and TDE (Transparent Data Encryption)**
- C. Oracle Key Vault
- D. Database Vault and Data Masking Pack

Answer: B

Explanation:

For "Exadata Cloud@Customer" without Bring Your Own License (BYOL), "Oracle Native Network Encryption and TDE (Transparent Data Encryption)" (D) are implemented out-of-the-box. Native Network Encryption secures data in transit, while TDE encrypts data at rest, both enabled by default to ensure baseline security compliance. "Oracle Key Vault" (A), "Audit Vault and Database Firewall" (B), and "Database Vault and Data Masking Pack" (C) are advanced security options requiring additional configuration or licensing, not automatically included without BYOL. Oracle's Exadata Cloud@Customer documentation confirms these encryption features as standard.
