

# Free PDF Quiz 2025 Accurate ARA-C01: SnowPro Advanced Architect Certification Reliable Test Camp

What's more, part of that GetValidTest ARA-C01 dumps now are free: <https://drive.google.com/open?id=1Wvisg5M6XatUJY1kQsyrE9eE7dCb3E6i>

As practice makes perfect, we offer three different formats of ARA-C01 exam study material to practice and prepare for the ARA-C01 exam. Our Snowflake ARA-C01 practice test simulates the real SnowPro Advanced Architect Certification (ARA-C01) exam and helps applicants kill exam anxiety. These ARA-C01 practice exams provide candidates with an accurate assessment of their readiness for the ARA-C01 test.

By reviewing these results, you will be able to know and remove your mistakes. These ARA-C01 practice exams are created as per the pattern of the SnowPro Advanced Architect Certification (ARA-C01) real examination. Therefore, SnowPro Advanced Architect Certification (ARA-C01) mock exam takers will experience the real exam environment. It will calm down their nerves so they can appear in the ARA-C01 final test without anxiety or fear.

**2025 ARA-C01 Reliable Test Camp 100% Pass | Pass-Sure ARA-C01: SnowPro Advanced Architect Certification 100% Pass**

Our company has hired the most professional team of experts at all costs to ensure that the content of ARA-C01 guide questions is

the most valuable. We also hired the most powerful professionals in the industry. So our quality of the ARA-C01 Exam Braindumps withstands severe tests and is praised by our loyal customers all over the world. At the same time, the content of the ARA-C01 practice engine is compiled to be easily understood by all our customers.

## Snowflake SnowPro Advanced Architect Certification Sample Questions (Q74-Q79):

### NEW QUESTION # 74

Which SQL alter command will MAXIMIZE memory and compute resources for a Snowpark stored procedure when executed on the snowpark\_opt\_wh warehouse?

- A. 

```
alter warehouse snowpark_opt_wh set max_concurrency_level = 1;
```
- B. 

```
alter warehouse snowpark_opt_wh set max_concurrency_level = 2;
```
- C. 

```
alter warehouse snowpark_opt_wh set max_concurrency_level = 16;
```
- D. 

```
alter warehouse snowpark_opt_wh set max_concurrency_level = 8;
```

**Answer: A**

Explanation:

To maximize memory and compute resources for a Snowpark stored procedure, you need to set the MAX\_CONCURRENCY\_LEVEL parameter for the warehouse that executes the stored procedure. This parameter determines the maximum number of concurrent queries that can run on a single warehouse. By setting it to 16, you ensure that the warehouse can use all the available CPU cores and memory on a single node, which is the optimal configuration for Snowpark-optimized warehouses. This will improve the performance and efficiency of the stored procedure, as it will not have to share resources with other queries or nodes. The other options are incorrect because they either do not change the MAX\_CONCURRENCY\_LEVEL parameter, or they set it to a lower value than 16, which will reduce the memory and compute resources for the stored procedure.

### NEW QUESTION # 75

What transformations are supported in the below SQL statement? (Select THREE).

CREATE PIPE ... AS COPY ... FROM (...)

- A. Columns can be omitted.
- B. Data can be filtered by an optional where clause.
- C. Incoming data can be joined with other tables.
- D. Type casts are supported.
- E. Columns can be reordered.
- F. The ON ERROR - ABORT statement command can be used.

**Answer: A,B,E**

### NEW QUESTION # 76

What are purposes for creating a storage integration? (Choose three.)

- A. Manage credentials from multiple cloud providers in one single Snowflake object.
- B. Control access to Snowflake data using a master encryption key that is maintained in the cloud provider's key management

service.

- C. Store a generated identity and access management (IAM) entity for an external cloud provider regardless of the cloud provider that hosts the Snowflake account.
- D. Create private VPC endpoints that allow direct, secure connectivity between VPCs without traversing the public internet.
- E. Support multiple external stages using one single Snowflake object.
- F. Avoid supplying credentials when creating a stage or when loading or unloading data.

**Answer: C,E,F**

Explanation:

The purpose of creating a storage integration in Snowflake includes: B. Store a generated identity and access management (IAM) entity for an external cloud provider - This helps in managing authentication and authorization with external cloud storage without embedding credentials in Snowflake. It supports various cloud providers like AWS, Azure, or GCP, ensuring that the identity management is streamlined across platforms. C. Support multiple external stages using one single Snowflake object - Storage integrations allow you to set up access configurations that can be reused across multiple external stages, simplifying the management of external data integrations. D. Avoid supplying credentials when creating a stage or when loading or unloading data - By using a storage integration, Snowflake can interact with external storage without the need to continuously manage or expose sensitive credentials, enhancing security and ease of operations. References: Snowflake documentation on storage integrations, found within the SnowPro Advanced: Architect course materials.

#### NEW QUESTION # 77

What does a Snowflake Architect need to consider when implementing a Snowflake Connector for Kafka?

- A. Every Kafka message is in JSON or Avro format.
- B. The default retention time for Kafka topics is 14 days.
- C. The Kafka connector supports key pair authentication, OAUTH, and basic authentication (for example, username and password).
- D. The Kafka connector will create one table and one pipe to ingest data for each topic. If the connector cannot create the table or the pipe it will result in an exception.

**Answer: B**

#### NEW QUESTION # 78

Which feature provides the capability to define an alternate cluster key for a table with an existing cluster key?

- A. External table
- B. Result cache
- C. Materialized view
- D. Search optimization

**Answer: C**

Explanation:

A materialized view is a feature that provides the capability to define an alternate cluster key for a table with an existing cluster key. A materialized view is a pre-computed result set that is stored in Snowflake and can be queried like a regular table. A materialized view can have a different cluster key than the base table, which can improve the performance and efficiency of queries on the materialized view. A materialized view can also support aggregations, joins, and filters on the base table data. A materialized view is automatically refreshed when the underlying data in the base table changes, as long as the AUTO\_REFRESH parameter is set to true.

#### NEW QUESTION # 79

.....

In GetValidTest's website you can free download study guide, some exercises and answers about Snowflake Certification ARA-C01 Exam as an attempt.

**ARA-C01 Brain Exam:** <https://www.getvalidtest.com/ARA-C01-exam.html>

Compiled by our company, ARA-C01 Exam Materials is the top-notch exam torrent for you to prepare for the exam. I strongly believe that under the guidance of our ARA-C01 test torrent, you will be able to keep out of troubles way and take everything in your stride. The latest Snowflake ARA-C01 test braindump guarantee a high score, Snowflake ARA-C01 Reliable Test Camp It really deserves your choice.

It is important for professionals to take the certification ARA-C01 because it ranks among one of the all rounded significant certifications under the Green Belt platform.

Because it contains all ARA-C01 exam information, Compiled by our company, ARA-C01 Exam Materials is the top-notch exam torrent for you to prepare for the exam.I strongly believe that under the guidance of our ARA-C01 test torrent, you will be able to keep out of troubles way and take everything in your stride.

# Pass Guaranteed 2025 Snowflake Pass-Sure ARA-C01: SnowPro Advanced Architect Certification Reliable Test Camp

The latest Snowflake ARA-C01 test braindump guarantee a high score, It really deserves your choice, Many ambitious IT professionals want to make further improvement in the IT industry and be closer to the IT peak.

Owing to our high-quality ARA-C01 real dump sand high passing rate, our company has been developing faster and faster and gain good reputation in the world.
