

# Free PDF Quiz 2025 Accurate Oracle 1z0-1042-24 Study Guide

BTW, DOWNLOAD part of PracticeMaterial 1z0-1042-24 dumps from Cloud Storage: [https://drive.google.com/open?id=1DL-OxC7ru\\_5hZBFIP74gZeYuld2K6FG](https://drive.google.com/open?id=1DL-OxC7ru_5hZBFIP74gZeYuld2K6FG)

Our 1z0-1042-24 exam braindumps offer you a wide and full coverage of the keypoints on the career-oriented certification and help you pass the exam without facing any difficulty. And you will find that the subject is well compiled to the content of the 1z0-1042-24 training guide in our three different versions. They are the PDF, Software and APP online. The content of these versions is the same, but the displays of our 1z0-1042-24 learning questions are all different. You can choose the favorite one.

Our 1z0-1042-24 exam dumps are famous for instant access to download, and you can receive the downloading link and password within ten minutes, so that you can start your practice as soon as possible. Moreover, we offer you free demo to have a try, so that you can know what the complete version is like. We are pass guarantee and money back guarantee for 1z0-1042-24 Exam Dumps, if you fail to pass the exam, we will give refund. Online and offline chat service are available, they possess the professional knowledge for 1z0-1042-24 exam materials, and if you have any questions, you can consult us.

## 1z0-1042-24 Boot Camp | 1z0-1042-24 Valid Exam Objectives

You won't be anxious because the available Oracle 1z0-1042-24 exam dumps are structured instead of distributed. Oracle Cloud Infrastructure 2024 Application Integration Professional (1z0-1042-24) certification exam candidates have specific requirements and anticipate a certain level of satisfaction before buying a Oracle 1z0-1042-24 Practice Exam. The Oracle 1z0-1042-24 practice exam applicants can rest assured that PracticeMaterial's round-the-clock support staff will answer their questions.

## Oracle 1z0-1042-24 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                       |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>Using OIC Connections &amp; Adapters: Candidates must demonstrate their ability to create and configure OIC connections, including trigger and invoke connections. They should be familiar with the Connectivity Agent, which facilitates on-premises connectivity to OIC services.</li></ul>                                           |
| Topic 2 | <ul style="list-style-type: none"><li>Getting Started with OIC Integrations: This section tests the ability of IT professionals and integration specialists to understand the fundamental components and concepts of Oracle Integration Cloud (OIC). Candidates are expected to describe the key features of OIC integration and explain core integration concepts.</li></ul> |

|         |                                                                                                                                                                                                                                                                                                                                                           |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 3 | <ul style="list-style-type: none"> <li>Testing, Monitoring, and Troubleshooting Integrations: This section assesses candidates abilities in testing, monitoring, and troubleshooting integrations within the OIC.</li> </ul>                                                                                                                              |
| Topic 4 | <ul style="list-style-type: none"> <li>Creating Orchestrated Integrations: This part of the exam evaluates the candidate's skills in creating and managing orchestrated integrations using OIC. Candidates should be able to manage OIC lookups, use the OIC Data Mapper, and incorporate custom JavaScript libraries into their integrations.</li> </ul> |
| Topic 5 | <ul style="list-style-type: none"> <li>Creating Scheduled Integrations: In this section of the exam, candidates are evaluated based on their skills in managing scheduled integrations. This includes converting scheduled integrations to app-driven integrations and understanding the scheduling options within the OIC.</li> </ul>                    |

## Oracle Cloud Infrastructure 2024 Application Integration Professional Sample Questions (Q100-Q105):

### NEW QUESTION # 100

Your organization has a number of active integrations in Oracle Integration (OIC). Your advice is sought out on the consequences of deactivating integration instances. Which statement concerning integration deactivation is NOT valid?

- A. You can choose to retain the event subscription, where events are resent if the integration is reactivated within six hours.
- B. You will not be able to observe any failed instances occurring after the deactivation request.
- C. All existing history, monitoring, and runtime data will be lost.
- D. Processing of any new messages will be immediately stopped.

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation:

Deactivation effects:

- \* A:True-stops processing instantly.
- \* B:False-data is retained, not lost.
- \* C:True-event retention is an option.

### NEW QUESTION # 101

You have a use case that requires a large data extract, which is more than 10MB, to be processed within an Oracle Integration Cloud (OIC) integration. Which are three valid options?

- A. Retrieve the file by invoking a SOAP API, which sends Base64 encoded data within the SOAP body, and then decode the data and make it available for processing using a Stage File action.
- B. Retrieve the file from an external endpoint using APIs that support application/blob as content type, and make it available for processing using a Stage File action.
- C. Retrieve the file by invoking a SOAP API, which sends the document as an MTOM attachment, and make it available for processing using a Stage File action.
- D. Send the file as a multipart attachment to an OIC integration using a REST trigger, and make it available for processing using a Stage File action.
- E. Upload the file to the OIC file server, and then use an FTP adapter Download File operation, which makes it available for processing using a Stage File action.

**Answer: B,C,D**

Explanation:

Comprehensive and Detailed Explanation:

Handling large files (>10MB) in OIC requires efficient mechanisms to avoid memory issues. Let's analyze each option:

- \* Option A:True-REST trigger with multipart attachments is ideal for inbound large files, processed via Stage File.
- \* Option B:False-Base64 in SOAP body bloats data (33% overhead), risking memory limits for >10MB files.
- \* Option C:True-MTOM optimizes SOAP attachments, suitable for large files, processed with Stage File.
- \* Option D:True-APIs returning application/blob handle binary data efficiently, staged for processing.

### NEW QUESTION # 102

You are developing an integration in Oracle Integration (OIC) to integrate two systems and wish to use an OIC Lookup. The goal is to transform customer status codes between the two systems. Which set of steps are essential for correctly utilizing the Lookup?

- A. Create a Lookup table with the mappings of customer status codes, and then use the Lookup function within a Map action to reference the table and perform the transformation.
- B. Design a custom script to perform the transformation, and then use the Lookup function within a Map action to reference the script and transform the customer status codes.
- C. Define a Lookup table containing the customer status code mappings, and then use the Invokeaction to call a web service for the transformation.
- D. Create a connection between the two systems, then use a SQL query to access the Lookup table directly, and map the customer status codes.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation:

Lookup Usage:

\* D:True-create table, use lookupValue in mapper.

### NEW QUESTION # 103

There are use cases in which you need to perform an advanced XSLT task that you cannot perform in the Oracle Integration Cloud (OIC) data mapper. To perform the advanced mapping tasks, you decide to use an external XSLT mapper and then import the .xsl file back to your integration.

Which is NOT a valid consideration when handling this use case?

- A. The exported archive file can include a map file that is largely complete in content or a map file that is empty of content.
- B. You must export the entire integration that contains one or more .xsl files.
- C. The exported archive must be imported into an Oracle Service Bus project in JDeveloper.
- D. Once the advanced mapping is complete, you must import the entire integration that contains the updated .xsl files.

**Answer: C**

Explanation:

There is no need to import the archive into an Oracle Service Bus project. The focus is on modifying the XSLT mapping in OIC.

### NEW QUESTION # 104

Which operation is NOT supported by an Oracle Integration Cloud (OIC) connection resource configured with FTP Adapter in the Invoke role?

- A. Read File
- B. Download File
- C. Read File in Segments
- D. Delete File
- E. Write File

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation:

The OIC FTP Adapter in theInvoke rolefacilitates interactions with an FTP server from an integration flow.

Let's break down each operation with exhaustive detail:

\* Option A: Write File

\* Supported:The FTP Adapter allows writing files to an FTP server. For example, you could use a Stage File action to prepare a CSV file and then invoke the FTP Adapter to write it to a remote directory like /inbound. This is a core capability for outbound file transfers.

\* Option B: Read File

\* Supported:Reading an entire file from an FTP server is possible in Invoke mode. You specify a file path (e.g., /outbound/data.csv),

and the adapter retrieves its contents, useful for processing complete files in one go, like a daily report.

\* Option C: Read File in Segments

\* Not Supported (Answer): This operation, which processes large files incrementally (e.g., 100 records at a time), is exclusive to the Trigger role or Stage File actions, not the Invoke role of the FTP Adapter. In Invoke mode, the adapter doesn't support segmented reading because it's designed for direct, one-shot operations rather than iterative processing. For segmented reads, you'd use a File Adapter in Trigger mode or Stage File with a Connectivity Agent.

\* Option D: Delete File

\* Supported: Deleting a file on the FTP server (e.g., /archive/oldfile.txt) is a standard Invoke operation, often used for cleanup after processing.

\* Option E: Download File

\* Supported: Downloading retrieves a file to OIC for further processing, similar to Read File but typically implies storing it locally in the integration flow (e.g., staging it).

Why C is the answer: The Invoke role focuses on discrete actions (write, read, delete, download), not iterative tasks like segmented reading, which requires a polling mechanism better suited to Trigger roles or Stage File actions.

Edge Case: If you need segmented reading from an FTP server, you'd download the file first using Invoke, then use a Stage File action to process it in segments- a workaround, not a direct capability.

Use Case Example: An integration writing a sales report to FTP (A), downloading a log file (E), and deleting an old backup (D) works fine, but attempting to read a 10GB file in segments (C) fails in Invoke mode.

## NEW QUESTION # 105

.....

It is known to us that getting the 1z0-1042-24 certification is not easy for a lot of people, but we are glad to tell you good news. The 1z0-1042-24 study materials from our company can help you get the certification in a short time. Now we are willing to introduce our 1z0-1042-24 Practice Questions to you in detail, we hope that you can spare your valuable time to have a try on our products. Please believe that we will not let you down!
